Deep Freeze Michael C. Grumley, 2024-01-09 From the bestselling author of the Breakthrough series: In his next near-future thriller, Michael C. Grumley explores humanity's thirst for immortality—at any cost... "A fast-paced juggernaut of a story, where revelations pile upon revelations, building to a stunning conclusion that will leave readers clamoring for more." —James Rollins, #1 New York Times bestselling author of the Sigma Force series The accident came quickly. With no warning. In the dead of night, a precipitous plunge into a freezing river trapped everyone inside the bus. It was then that Army veteran John Reiff's life came to an end. Extinguished in the sudden rush of frigid water. There was no expectation of survival. None. Let alone waking up beneath blinding hospital lights. Struggling to move, or see, or even breathe. But the doctors assure him that everything is normal. That things will improve. And yet, he has a strange feeling that there's something they're not telling him. As Reiff's mind and body gradually recover, he becomes certain that the doctors are lying to him. One by one, puzzle pieces are slowly falling into place, and he soon realizes that things are not at all what they seem. Critical information is being kept from him. Secrets. Supposedly for his own good. But who is doing this? Why? And the most important question: can he keep himself alive long enough to uncover the truth? Leap Michael C. Grumley, 2019-06-06 It was one of the greatest breakthroughs in human history. And it was just the beginning. Just one year ago Alison Shaw and her team of marine biologists stunned the world with an incredible breakthrough. And now, they're about to do it again. But an ocean away, something strange is unfolding. Along a lonely coast in South America, an experimental Russian submarine, long thought to have been dismantled, has suddenly resurfaced. And the U.S. Navy has taken notice, sending officers John Clay and Steve Caesare to investigate. The sub has been studying a group of unmarked soldiers, disappearing into the jungle each night beneath the cover of darkness. Something has been discovered... something big. And it's about to fall into the wrong hands. Unless Alison Shaw and her team can find something that no one else can.

Ripple Michael C. Grumley, 2019-10-03 Hundreds of thousands of years ago in Ethiopia, a handful of genetic mutations split the primates from man and humanity was born. Now, eons later, further splits from the apes are being unearthed. And with them, a disturbing realization. Our split was only one of many. And yet we survived because humans had something the others did not - a unique ingredient that has only now been rediscovered. First in the mountains of South America, where it was promptly destroyed by the Chinese. And now a second source in Africa. The epicenter of mankind's very inception. A place that John Clay and Alison Shaw must find quickly. Because the Russians already know what we are searching for. And the Chinese want back what is rightfully theirs. The mother of all secrets awaits the world, in Africa. One that will not only explain who we are, but will decipher the very code within our own DNA.

Catalyst Michael C. Grumley, 2019-08 The future of the world has begun... In 1984 a doomsday vault was constructed on a remote island in the Arctic Ocean to preserve Earth's genetic history in the event of a global catastrophe. Now, decades later, a second vault has been uncovered. This one resting where no one ever expected. And the problem is... it's not ours. Even more curious is the seeds inside the vault. Millions of seeds, each with a genetic embryo untouched and perfectly preserved. Waiting. No one knows who built it. Or when. Now a small group of marine biologists and navy investigators have been assigned to find out. Before anyone else does. But Alison Shaw and John Clay are not prepared for what they are about to uncover. Beginning with the truth behind our own evolution.

Evan After Michael C. Grumley, 2014-02-04 It began with an accident. It will end in a sacrifice. Two weeks after his eighteenth birthday, Evan Nash's life changes forever. When strange problems from an accident drive him to seek help from a skeptical psychiatrist, the full extent of his metamorphosis begins to reveal itself. But Dr. Shannon Mayer has troubles of her own. Trying hopelessly to cope with a devastating past, one that is slowly destroying her, Mayer now finds herself with nowhere left to turn. Even worse, she soon realizes that Evan is caught in a very real struggle of life and death. Two battles. Both are losing. Together, they must discover that even in the darkest days, when all seems lost, there always remains a glimmer of hope.

Echo Michael C. Grumley, 2021-02-25 It began with a breakthrough. In interspecies communication. Leading both John Clay and Alison Shaw through a series of startling discoveries and life-altering revelations. Divulging who we really are as a species. Why we are here...and who is here with us. And the greatest lesson of all, that our brains are not as rare and unique as humans had assumed. But rather just one of three brains between three extraordinary species. All influenced by a fluke of evolution that should never have existed on Earth in the first place. Something we are now finally on the cusp of understanding. It will take more than just one brain to do it. More than just one species. And courage from all three. Courage in the face of those still trying to stop Clay and Alison before their stranglehold on the world is lost. But Clay and his team already know the truth. That there is no courage without fear, and no victory without sacrifice.

Breakthrough Michael Grumley, 2017-09-11 Manche Rätsel sollten besser ungelöst bleiben ... Im Karibischen Meer muss ein U-Boot von einer Sekunde auf die andere seine Mission abbrechen. Dann verschwindet es spurlos. Die näheren Umstände sind ungeklärt. In seiner Verzweiflung wendet sich Sonderermittler John Clay an die Meeresbiologin Alison Shaw, der das scheinbar Unmögliche gelungen ist: Sie hat einen Weg gefunden, mit Delfinen zu kommunizieren. Clay schickt Alisons Schützlinge los, in der Hoffnung, die hochintelligenten Tiere könnten eine Spur des verschollenen U-Boots finden. Doch was sie auf dem Grund des Ozeans entdecken, wird die Menschheit in ihren Grundfesten für immer erschüttern...
