The Titanic in Myth and Memory Tim Bergfelder, Sarah Street, 2004-08-27 Since its maiden voyage and sinking in April 1912, Titanic has become a monumental icon of the 20th century and has inspired a wealth of interpretations across literature, art and media. This book offers a comprehensive discussion of the diverse representations of the connections and differences in the way generations of artists and audiences have approached and used the tragedy. In the final section is an in-depth study of James Cameron's blockbuster film Titanic.

The Spectre of Sound Kevin Donnelly, 2019-07-25 This book is a major new study - dealing with notions of film music as a device that desires to control its audience, using a most powerful thing: emotion. The author emphasises the manipulative and ephemeral character of film music dealing not only with traditional orchestral film music, but also looks at film music's colonisation of television, and discusses pop music in relation to films, and the historical dimensions to ability to possess audiences that have so many important cultural and aesthetic effects. It challenges the dominant but limited conception of film music as restricted to film by looking at its use in television and influence in the world of pop music and the traditional restriction of analysis to 'valued' film music, either from 'name' composers' or from the 'golden era' of Classical Hollywood. Focusing on areas as diverse as horror, pop music in film, ethnic signposting, television drama and the soundtrack without a film- this is an original study which expands the range of writing on the subject.
