Contemporary Art About Architecture Nora Wendl, 2017-07-05 An important resource for scholars of contemporary art and architecture, this volume considers contemporary art that takes architecture as its subject. Concentrated on works made since 1990, *Contemporary Art About Architecture: A Strange Utility* is the first to take up this topic in a sustained and explicit manner and the first to advance the idea that contemporary art functions as a form of architectural history, theory,

and analysis. Over the course of fourteen essays by both emerging and established scholars, this volume examines a diverse group of artists in conjunction with the vernacular, canonical, and fantastical structures engaged by their work. I? Manglano-Ovalle, Matthew Barney, Monika Sosnowska, Pipo Nguyen-duy, and Paul Pfeiffer are among those considered, as are the compelling questions of architecture's relationship to photography, the evolving legacy of Mies van der Rohe, the notion of an architectural unconscious, and the provocative concepts of the unbuilt and the unbuildable. Through a rigorous investigation of these issues, Contemporary Art About Architecture calls attention to the fact that art is now a vital form of architectural discourse. Indeed, this phenomenon is both pervasive and, in its individual incarnations, compelling - a reason to think again about the entangled histories of architecture and art.
