Manifesto for the Noosphere Jose Arguelles,2011-09-06 The noosphere, identified in the early twentieth century as intrinsic to the next stage of human and terrestrial evolution, is defined as the Earth's "mental sphere" or stratum of human thought. *Manifesto for the Noosphere*, the final work by renowned author José Argüelles, predicts that the noosphere will be fully accessed on December 21, 2012—but warns that we will only successfully make this evolutionary jump through an act of collective consciousness among humans on Earth. The ascension to the noosphere or Supermind (using the terminology of Sri Aurobindo), Argüelles says, will be an unprecedented "mind shift" that mirrors the emergence of life itself on the planet. *Manifesto for the Noosphere* is intended to inform and prepare humanity for the nature and magnitude of this shift. Argüelles brings in the Mayan long-count calendar, radical theories on the nature of time, advanced states of consciousness, and the possible intervention of galactic intelligence. He carefully details the role of the noosphere in relation to other planetary strata (hydrosphere, biosphere, atmosphere) as well as the history and nature of the biosphere-noosphere transition and the intermediary phases of the technosphere and cybersphere. About the Imprint: EVOLVER EDITIONS promotes a new counterculture that recognizes humanity's visionary potential and takes tangible, pragmatic steps to realize it. EVOLVER EDITIONS explores the dynamics of personal, collective, and global change from a wide range of perspectives. EVOLVER EDITIONS is an imprint of North Atlantic Books and is produced in collaboration with Evolver, LLC.

Apocalypse 2012 Lawrence E. Joseph,2007-01-23 "Updated to include dramatic new evidence from NASA and the National Academy of Sciences pointing to a knockout of the electrical power grid by solar systems expected to climax in 2012-2013." Don't look up! It won't help. You can't get out of the way, you can't dig a hole deep enough to hide. The end is coming, and there's nothing you can do about it. So why read this book? Because you can't look away when not just the religious fanatics are saying we're all going to be destroyed but the scientists are in on the act too. Here's what they're saying: We're a million years over due for a mass extinction. The sun at radiation minimum is acting much worse than at solar maximum, and one misdirected spewing of plasma could fry us in an instant. The magnetic field—which shields us from harmful radiation—is developing a mysterious crack. Our solar system is entering an energetically hostile part of the galaxy. The Yellowstone supervolcano is getting ready to blow, and if it does, we can look forward to nuclear winter and 90 percent annihilation. The Maya, the world's greatest timekeepers ever, say it's all going to stop on December 21, 2012. So, see?

There's nothing you can do, but you might as well sit back and enjoy the show. You'll get a good chuckle. That's why you should read this book.

Manifiesto por la Noosfera José Argüelles, 2012-05-01 En este libro, José Argüelles que, con su libro *El factor maya* mostró al mundo la fecha del 2012 como eje de un cambio fundamental en la evolución humana, explora nuestro potencial para acceder a la consciencia colectiva de la noosfera y propiciar una nueva era de armonía y paz. La Noosfera consiste en un paradigma multisistémico que une profecía y análisis de las tendencias actuales del mundo. Es una percepción de que la transformación de la biosfera está conduciendo de modo inevitable a una nueva época geológica y a un nuevo ciclo evolutivo, y esta nueva era -la Noosfera-, está surgiendo merced al impacto del pensamiento humano en el entorno. Argüelles muestra que estamos en el umbral de un cambio sin precedentes en la historia del ser humano.

Framing cosmologies Allen Abramson, Martin Holbraad, 2016-05-16 How might the anthropological study of cosmologies – the ways in which the horizons of human worlds are imagined and engaged – illuminate understandings of the contemporary world? This book addresses this question by bringing together anthropologists whose research is informed by a concern with cosmological dimensions of social life in different ethnographic settings. Its overall aim is to reaffirm the value of the cosmological frame as a continuing source of analytical insight. Attending to the novel cosmological formations that emerge in such fields as modern markets, political landscapes, digital media and popular cinema, the book's key task is to explore how modern circumstances are constituted within the variable imagination of worlds and their horizons. It will be of interest to all students and researchers in anthropology, as well as scholars in fields as diverse as film studies, cultural studies, comparative religion, science and technology studies, and broader social theory.

Travel and Identity: Studies in Literature, Culture and Language Jakub Lipski, 2018-02-19 This book presents a selection of research papers dealing with the notions of travel and identity in Anglophone literature and culture. Collectively, the chapters ponder such notions as self and other, race, centre and periphery, thus shedding new light on a number of issues that are highly relevant in the context of the ongoing migration crisis. The contributors employ a diverse range of theoretical standpoints – from close reading to deconstruction, from historically informed approaches to linguistic analysis – and thus offer a nuanced panorama of these issues, especially from the nineteenth century onwards.

Is Collective Cosmic Consciousness for Humanity possible? - Synergizing Spirituality and Science to manifest Micro- and Macrocosmic Peace Dr. Mark O'Doherty, 2014-02 This book contains a dissertation, written by Mark O Doherty, that has been approved by the Examining Committee for the dissertation requirement for the Doctor of Theocentric Psychology degree of the University of Metaphysics. What makes this dissertation of interest for the entire global community, is that it gives

concrete guidelines how to attain Cosmic Consciousness, and how one's personal attunement with God can be utilized for the benefit of counseling and life-coaching on a micro-level, and to attain new insights of how humanity can be assisted on a macro-level. Especially the latter aim of assisting humanity on a macro-level requires not only intuition on the highest spiritual and emotional level, but also a fine scientific mind; and the realization that spirituality and science complement each other, and are both necessary for humanity's evolution.

Cosmic Consciousness Richard Maurice Bucke, 2009-04-23 Acclaimed by William James as an addition to psychology of first-rate importance, this pioneering work constitutes a classic modern study of the mystical experience. Author Richard Maurice Bucke, a distinguished progressive psychiatrist, explores the phenomenon of transcendent realization, or illumination. Bucke draws upon his firsthand experience of a life-altering insight to explore the theory of cosmic consciousness, an advance in mental evolution with the potential to raise existence to a higher plane. As valuable today as it was upon its 1901 publication, this landmark survey treats illumination from the standpoint of psychology, as a rare but definite and well-documented mental condition. It cites instances of sudden enlightenment experienced by mystics, philosophers, writers, and artists throughout history, noting an increasing frequency of episodes consistent with an evolutionary trend. Numerous case studies offer intriguing, real-life particulars of people and their personal epiphanies — from Buddha, Jesus, and Mohammed, to Dante, William Blake, Walt Whitman, and lesser-known individuals. A work of uplift and promise, this book offers readers a vista of extraordinary possibilities and a renewed capacity for hope and wonder.
