Who Are You & What Have You Done with My Kid? Amanda Craig, 2022-09-20 So you have a Tween! What now? Dr. Amanda Craig knows what it's like to watch your child go from sweet elementary student to moody tween in the span of just a few years and she's here to help navigate you through it! How do we keep our kids close while cultivating the confidence they'll need to grow up? How do we navigate the inevitable dips, divides, and potholes? Where do we find the strength, self-awareness, and wisdom that amount to a path forward? Despite the parenting opportunities in the tween years, we often spend time focused on academics and the social concerns of elementary school then quickly pivot to worries about safety, drugs, sex and the rebellious behavioral issues of the teen years. We think we're connecting but we're not. We miss the neurological explosion that is taking place before us as tweens experience four significant changes that shake them (and us) to their core. Their brains are changing. They feel and experience emotions they do not recognize. They're hyperaware of themselves. They do not know how to express themselves. Most importantly, parents still have a "seat at the table" to make positive impressions on their tweens as they prepare them for the teenage years.

Uncommonly Good Ideas Sandra Murphy,Mary Ann Smith,2015-04-03 This innovative resource provides teachers with a road map for designing a comprehensive writing curriculum that meets Common Core State Standards. The authors zero in on several big ideas that lead to and support effective practices in writing instruction, such as integrating reading, writing, speaking, and listening; teaching writing as a process; extending the range of the students' writing; spiraling and scaffolding a writing curriculum; and collaborating. These ideas are the cornerstone of best research-based practices as well as the CCSS for writing. The first chapter offers a complete lesson designed around teaching narrative writing and illustrates tried-and-true practices for teaching writing as a process. The remaining chapters explore a broad range of teaching approaches that help students tackle different kinds of narrative, informational, and argumentative writing as well as complexities like audience and purpose. Each chapter focuses on at least one of the uncommonly good ideas and illustrates how to create curricula around it. Uncommonly Good Ideas includes model lessons and assignments, mentor texts, teaching strategies, student writing, and practical guidance for moving the ideas from the page into the classroom.
