Sebastian Brünink

Human Factors in Organizational Design and Management-VI P. Vink,E.A.P. Koningsveld,S. Dhondt,1998-08-14 This book contains a series of papers that were presented during the Sixth IEA International Symposium on Human Factors in Organizational Design and Management (ODAM '98). The Symposium was sponsored jointly by the International Ergonomics Society, the Dutch Ergonomics Society, NIA TNO and The Ministry of Social Affairs and Employment. These experiences include new ideas, research results, tools, and applications of human-organization interface technology to improving work systems. New technology, changing work force demographics, changing attitudes and values about work and what constitutes real quality of work life, have heightened the need for a true systems approach to optimizing the interfaces between humans, technology and organizational structures and processes. Growing world competition, and the related need to make organizations more productive and efficient, have further intensified this need to improve work systems. This need is reflected in the rapid development of macroergonomics methods and applications since the first of these ODA Symposia in 1984. What then was recognized by only a few researchers and practitioners has now become a widely accepted part of the human factors/ergonomics discipline. As demonstrated by the papers contained herein, application of macroergonomics is having a very real positive impact on sociotechnical systems internationally. Included in this volume are a broad selection of papers on theory, methodology, tools, research findings, and case studies from leading professionals throughout the world. This volume thus provides the reader with some of the latest developments in human-organization interface technology. Collectively, these papers should provide the reader with a good conceptual understanding of the ergonomic approach to work system design, and of its tremendous potential for improving work systems and the human condition in all cultures.

The Legislature as an Organization Marvin Andrew Harder, Raymond G. Davis, 1979 An innovative approach to legislative study, this volume views the Kansas legislature from the perspective of organization theory. Authors Marvin A. Harder and Raymond G. Davis examine the technical and procedural aspects of the legislature that most scholars have overlooked. They provide a careful, precise, theoretical study of the organization and structure, administrative and staff relationships, and formal processes of the legislature. Applying the concepts of organization theory, Harder and Davis describe and analyze how the Kansas legislature works. They cover the legislative staff, the networks of communication and socialization, the role of leadership, the committees, and the legislative functions of lawmaking and of overseeing. They also discuss recent changes in the legislature and give a profile of the legislators. This book breaks new ground by focusing on organization theory, rather than political analysis, to explain the dynamics of legislative operations. Of particular value to Kansas legislators and students of Kansas legislative process, it will also contribute to the general literature about American legislative institutions.
