David Etkin

The Rise and Fall of the Library of Alexandria Jean-Arcady Meyer, 2023-07-10 The project to bring together all the books of the world in Alexandria was not only intended to contribute to the glory of the Ptolemies, but also aimed to attract scholars to the city, who would be capable of exploiting these books to produce others and to thus advance the literature and science of their time. This book demonstrates that the availability and critical study of the 500,000 scrolls which the Library of Alexandria probably contained made possible the production of some remarkable pieces of Alexandrian literature and philosophy, the considerable increase in historical and geographical knowledge, as well as outstanding contributions to the history of mathematics, astronomy, mechanics, and medicine. The book recalls how Alexandria was founded and became the most beautiful city in the ancient world. It also recalls the incredible series of wars, popular revolts, assassinations, palace intrigues, and debaucheries that brought about the inexorable decline of this city and its Library.

Burning the Books Richard Ovenden, 2020-11-17 Libraries preserve the knowledge and ideas on which rights depend; no wonder they are so often attacked. Richard Ovenden tells the history of this deliberate destruction of knowledge—from library burnings to digital attacks and contemporary underfunding—and makes a passionate plea for the importance of these threatened institutions.

Books on Fire Lucien X. Polastron, 2007-08-13 Almost as old as the idea of the library is the urge to destroy it. Author Lucien X. Polastron traces the history of this destruction, examining the causes for these disasters, the treasures that have been lost, and where the surviving books, if any, have ended up. Books on Fire received the 2004 Societe des Gens de Lettres Prize for Nonfiction/History in Paris.

"Burning Interiors" Thomas Fink, Joseph R. Lease, 2007-06 Possessing a singular musical gift, David Shapiro problematizes self and culture and challenges conventional notions of fixed and commodified identity in work that discovers and resists meaning. This title features essays that illuminate a useful range of Shapiro's major texts through diverse critical approaches.

Christianity, Book-Burning and Censorship in Late Antiquity Dirk Rohmann, 2016-07-25 It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by

academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.

Burning Desire Paul Linke, 2020-08-19 The book provides some of the information everyone is unconsciously looking for. It mentions subjects only a philosopher would know about and more. It provides an idea to change the age old belief that there is not enough to go around, and therefore we war about the most fundamental resources we can find on Earth. The book explains (to the best of my knowledge) that the universe is a giving entity, and all we have to do is learn how this is possible. This giving entity is fundamentally two particles in union, which is a self-contained unit at every scale. This union is a dynamic entity which looks like a Torus that generates everything. Ancient arts like sacred geometry and others are testimony that there is a fundamental geometric structure in all things, and the book highlights this sacred structure (known as the Metatrons Cube) which is governed by a conscious mind that generates all physical things we are so familiar with. It also mentions motion which relates to the golden ratio and how algorithmic functions can explain some of the infinite possibilities we are confronted with.

Burning Books M. Fishburn, 2008-05-21 This provocative new work examines the years between the Nazi book fires and the publication of Ray Bradbury's *Fahrenheit 451* (1953), a period when book burning captured the popular imagination. It explores how embedded the myths of book burning have become in our cultural history, and illustrates the enduring appeal of a great cleansing bonfire.

Disaster Theory David Etkin, 2014-12-26 *Disaster Theory: An Interdisciplinary Approach to Concepts and Causes* offers the theoretical background needed to understand what disasters are and why they occur. Drawing on related disciplines, including sociology, risk theory, and seminal research on disasters and emergency management, *Disaster Theory* clearly lays out the conceptual framework of the emerging field of disaster studies. Tailored to the needs of advanced undergraduates and graduate students, this unique text also provides an ideal capstone for students who have already been introduced to the fundamentals of emergency management. *Disaster Theory* emphasizes the application of critical thinking in understanding disasters and their causes by synthesizing a wide range of information on theory and practice, including input from leading scholars in the field. - Offers the first cohesive depiction of disaster theory - Incorporates material from leading thinkers in

the field, as well as student exercises and critical thinking questions, making this a rich resource for advanced courses - Written from an international perspective and includes case studies of disasters and hazards from around the world for comparing the leading models of emergency response - Challenges the reader to think critically about important questions in disaster management from various points of view

An Archaeology of the Soul Robert L. Hall, 1997 The richness and the range of Native American spirituality has long been noted, but it has never been examined so thoroughly, nor with such an eye for the amazing interconnectedness of Indian tribal ceremonies and practices, as in *An Archaeology of the Soul*. In this monumental work, destined to become a classic in its field, Robert Hall traces the genetic and historical relationships of the tribes of the Midwest and Plains--including roots that extend back as far as 3,000 years. Looking beyond regional barriers, *An Archaeology of the Soul* offers new depths of insight into American Indian ethnography. Hall uncovers the lineage and kinship shared by Native North Americans through the perspectives of history, archaeology, archaeoastronomy, biological anthropology, linguistics, and mythology. The wholeness and panoramic complexity of American Indian belief has never been so fully explored--or more deeply understood.

In Search Of The Lost Testament of Alexander the Great David Grant, 2017-01-28 A unique 'backstory' of Alexander and his successors: the biased historians, deceptions, wars, generals, and the tale of the literature that preserved them. 'Babylon, mid-June 323 BCE, the gateway of the gods; prostrated in the Summer Palace of Nebuchadnezzar II on the east bank of the Euphrates, wracked by fever and having barely survived another night, King Alexander III, the ruler of Macedonia for 12 years and 7 months, had his senior officers congregate at his bedside. Abandoned by Fortune and the healing god Asclepius, he finally acknowledged he was dying. Some 2,340 years on, five barely intact accounts survive to tell a hardly coherent story. At times in close accord, though more often contradictory, they conclude with a melee of death-scene rehashes, all of them suspicious: the first portrayed Alexander dying silent and intestate; he was Homeric and vocal in the second; the third detailed his Last Will and Testament though it is attached to the stuff of romance. Which account do we trust?' *In Search Of The Lost Testament Of Alexander The Great* is the result of a 'decade of contemplations on Alexander' presented as a rich thematic narrative Grant describes as the 'backstory behind the history' of the great Macedonian and his generals. Taking an uncompromising investigative perspective, Grant delves into the challenges faced by Alexander's unique tale: the forgeries and biased historians, the influences of rhetoric, romance, philosophy and religion on what was written and how. Alexander's own mercurial personality is vividly dissected and the careers and the wars of his successors are presented with a unique

eye. But the book never loses sight of central aim: to unravel the mystery behind Alexander's 'unconvincingly reported' intestate death. And out of Grant's research emerges one unavoidable verdict: after 2,340 years, the Last Will and Testament of Alexander III of Macedonia needs to be extracted from 'romance' and reinstated to its rightful place in mainstream history: Babylon in June 323 BCE. Although the result a decade of academic research, *In Search Of The Lost Testament Of Alexander The Great* is written in an entertaining and engaging style that opens the subject to both scholars and the casual reader of history looking to learn more about the Macedonian king and the men who 'made' his story. It concludes with a wholly new interpretation of the death of Alexander the Great and the mechanism behind the wars of succession that followed.

The Truth About Islam Ibn El-Neil, 2008-11-01 Non-Muslims in Islamic countries are exposed to the religion of Islam 24 hours, seven days a week, for their entire life (No freedom of choice here). They hear five prayers between 6: 00 AM and 8: 00 PM everyday on radio, television, Loud Speakers and other public address systems that cover every square inch of the country, whether they want to or not. They get to hear the Koran recited for hours every day. The non-Muslim is a second class citizen who is not allowed to rule or hold key position in the country. He can live in the abode of Islam as long as he doesn't preach his religions outside his community, doesn't insult Islam or criticize the Prophet, and he must pay a religion tax. The punishment for leaving Islam is death (most recently a young woman killed in Saudi Arabia and one in Jordan for leaving Islam; Sept. 2008]. Islam gives its followers the right to kill non-Muslims, and take their wives, children, and possessions as a booty blessed by the Koran and the Hadith. Only a Muslim man can legally lie to his wives, and his enemies.

The Life and Fate of the Ancient Library of Alexandria Mostafa El-Abbadi, 1990 A thoroughly researched study on the history of both the Museum and the Alexandria Library, showing the important role they played in the transmission of Greco-roman civilization. The tragic fate of both institutions have long been of great fascination for both writers and readers.

Lights of God Murat Ugray, 2020-07-11 Are you ready to learn the world's biggest and scariest secret? One day, Moses saw something very interesting in the Desert. A Bush was on fire such as a fireball, yet it was not consumed. (Bible, Exodus, 3) Archaeologist John Smith, finds a very interesting ancient Roman 2000-year-old silver coin in the ancient city of Pompeii, Italy in 2036. He sets out with his wife Sara and daughter Elsa to Cairo, the capital of Egypt, to visit his friend Professor Gregory Kravnik to analyze the coin which has some strange figures and some dates written in Roman numerals. When he arrives in Cairo, a sphere with a source of unknown, shining like a fireball with a big explosion, descends from the sky and illuminates the whole city with its light in the uninhabited desert somewhere near the Great Pyramids. Meanwhile, John Smith, who was close to the incident, received a very important information from his friend Gregory, about analyzing the symbols and what the symbols on it were saying and when he returned to his hotel, his car stopped suddenly after that explosion. A mysterious hand touches the back of his car and he shouts 'Help!' But that night he has never even passed through his mind that the person, whom he will take in his car, is the one who will change the future and will be one of the

most important figures in the history of mankind that three great religions await. At the same time, John's friend Professor Gregory Kravnik and his assistant Katya, who have been working at Archeology Institute of Cairo State University, is about to uncover the world's most mysterious sect, which has changed the history of the world and had kept a secret for 500 years. This Medieval Jesuit sect known as the 'Jesuits', coded it into everything and described it in encrypted form in the paintings of famous painters. However, Gregory and John will find out before it's too late that these two big secrets with the same goal have a very important connection with the light sphere descending into the desert that night. Moreover, this Earth's Biggest Secret that they will learn that night, has the power to change all known Religions History. All these connections and codes point to a very important event that could change the world in 2036. But it won't be easy for them to learn this, a deadly hustle and bustle waiting for them will also start at the same time. All intelligence organizations around the world including Vatican, FBI and CIA, are into this incident and besides, John and his family's life are now in danger. Beyond all this, the great prophecy, which is mentioned in all Holy Books and is depicted symbolically in the Old Testament, the New Testament and the Qur'an, is about to come true. Now, with the realization of this prophecy, humanity has to either face God or fight with the devil and find a new way to stop the Doomsday.

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.

Myth-Busting in Science and Religion Jim Slagle, 2025-07-14 "Science and religion" is one of those subjects where everyone knows a lot of things that just ain't so. This is because of the numerous urban legends about how the two fields have interacted historically and how they do so today. These false beliefs are ubiquitous in Western civilization, especially in academia, prompting many people to oversimplify the issues. This book corrects many of these urban legends and confusions involving premodern cosmology, the alleged persecution or even martyrdom of scientists for discoveries that challenged the religious status quo, the history and nature of biological evolution, the potential discovery of rational extraterrestrial life, and whether miracles would somehow conflict with the laws that science has discovered. As one might expect, reality turns out to be much more complex than the stories suggest.

Ante-Nicene Christian Library: Clement of Alexandria, v. 1 (1871) Alexander Roberts, Sir James Donaldson, 1867
A World History of Higher Education Exchange Teresa Brawner Bevis, 2019-04-11 This book examines the origins of

higher learning, and then traces education exchange to the aftermath of World War II, when the United States was internationally recognized as the epicenter of critical thinking and scientific discovery. As centers of learning arose in the ancient world, the gathering of students they drew invariably included “foreigners”—those not native to the immediate local area. Then as now, inquisitive minds compelled humans to explore, crossing borders to seek enlightenment in faraway places before returning to their homelands. Few societies have been so remote that they could not be affected by the acquisition of imported information. The number of international students and scholars in the United States now exceeds one million. This book narrates the complex and colorful history of intrepid individuals, inspired programs, and world events that have given direction to the path of education exchange, as well as the global dissemination of American scholarship.

Identifying a Free Society Milan Zafirovski, 2017-05-15 In **Identifying a Free Society** Milan Zafirovski offers a holistic sociological approach to modern free society as a total social system. The book examines the main conditions and indicators of modern free society such as democracy, a free economy, a free culture, and a free civil society, hence political, economic, cultural, and individual liberty entwined with equality and justice. It provides specific and aggregate free-society estimates for Western and related societies based on a variety of objective rankings, data, and reports. On the basis of these estimates, the book identifies liberal societies as the freest as a whole, and their anti-liberal opposites as the most unfree.
