Integrated Computer Technologies in Mechanical Engineering - 2024 Oleksii Lytvynov, Volodymyr Pavlikov, Dmytro Krytskyi, 2025-08-20 This book covers areas such as information technology in engine design and production; information technology in the creation of rocket and space systems; aerospace engineering; transport systems and logistics; big data and data science; nanomodeling; artificial intelligence and intelligent systems; networks and communications; cyber-physical systems and IoE; as well as software engineering and IT infrastructure. The materials were tested during the International Scientific and Technical Conference Integrated Computer Technologies in Mechanical Engineering—Synergetic Engineering (ICTM) was established by the National Aerospace University Kharkiv Aviation Institute. The ICTM'2024 conference was held in Kharkiv, Ukraine, in December 2024. During this conference, technical exchange between the scientific community was carried out in the form of keynote speeches, panel discussions and a special session. More than 140 papers from different countries were received at ICTM'2024. The book offers us a lot of valuable information and is very useful for the exchange of experience between scientists in the field of modeling and simulation. ICTM was created to bring together outstanding researchers and practitioners in the field of information technology in the design and manufacture of engines; the creation of rocket and space systems, aerospace engineering from all over the world to exchange experiences and expertise.

Integrated Computer Technologies in Mechanical Engineering - 2023 Mykola Nechyporuk, Volodymyr Pavlikov, Dmytro Krytskyi, 2024-05-23 The International Scientific and Technical Conference “Integrated Computer Technologies in Mechanical Engineering” – Synergetic Engineering (ICTM) was established by National Aerospace University “Kharkiv Aviation Institute”. The Conference ICTM'2023 was held in Kharkiv, Ukraine, during December, 2023. During this conference, technical exchanges between the research community were carried out in the forms of keynote speeches, panel discussions, as well as special session. In addition, participants were treated to a series of receptions, which forge collaborations among fellow researchers. ICTM'2023 received 202 papers submissions from different countries. All of these offer us plenty of valuable information and would be of great benefit to the experience exchange among scientists in modeling and simulation. The organizers of ICTM'2023 made great efforts to ensure the success of this conference. We hereby would like to thank all the members of ICTM'2023 Advisory Committee for their guidance and advice, the members of

program committee and organizing committee, and the referees for their effort in reviewing and soliciting the papers, and all authors for their contribution to the formation of a common intellectual environment for solving relevant scientific problems. Also, we grateful to Springer - Janusz Kacprzyk and Thomas Ditzinger as the editor responsible for the series "Lecture Notes in Networks and Systems" for their great support in publishing these selected papers.

Integrated Computer Technologies in Mechanical Engineering - 2021 Mykola Nechyporuk, Vladimir Pavlikov, Dmitriy Kritskiy, 2022-02-21 The International Scientific and Technical Conference "Integrated Computer Technologies in Mechanical Engineering" - Synergetic Engineering (ICTM) was established by National Aerospace University "Kharkiv Aviation Institute". The Conference ICTM'2021 was held in Kharkiv, Ukraine, during October 28-29, 2021. During this conference, technical exchanges between the research community were carried out in the forms of keynote speeches, panel discussions, as well as special session. Proceedings of the 2nd International Workshop on Advances in Civil Aviation Systems Development Ivan Ostroumov, Maksym Zalisky, 2024-05-14 This book includes high-quality research papers presented at 2nd International Workshop on Advances in Civil Aviation Systems Development (ACASD 2024), which was at National Aviation University, Kyiv Ukraine, on March 26, 2024. This book presents original results of a scholarly study of unique research teams and market leaders on the development in civil aviation systems and its application. The book topics include major research areas focused on advances in air traffic management, data processing in civil aviation, automatic control in civil aviation systems, modern trends in navigation systems development, methods of operational efficiency improvement, human factor, and application of artificial intelligence in civil aviation systems. This book is useful for scholars and professionals in the civil aviation domain.

Dependable IoT for Human and Industry Vyacheslav Kharchenko, Ah Lian Kor, Andrzej Rucinski, 2022-09-01 There are numerous publications which introduce and discuss the Internet of Things (IoT). In the midst of these, this work has several unique characteristics which should change the reader's perspective, and in particular, provide a more profound understanding of the impact of the IoT on society. Dependable IoT for Human and Industry covers the main aspects of Internet of Things and IoT based systems such as global issues of applications, modeling, development and implementation of dependable IoT for different human and industry domains. Technical topics discussed in the book include: Introduction in Internet of vital and trust Things Modelling and assessment techniques for dependable and secure IoT systems Architecting

and development of IoT systems Implementation of IoT for smart cities and drone fleets; business and blockchain, transport and industry Training courses and education experience on Internet and Web of ThingThe book contains chapters which have their roots in the International Conference IDAACS 2017, and Workshop on Cyber Physical Systems and IoT Dependability CyberIoT-DESSERT 2017.

Cases on Modern Computer Systems in Aviation Shmelova, Tetiana, Sikirda, Yuliya, Rizun, Nina, Kucherov, Dmytro, 2019-02-19 Because trainees need to learn about the underlying technologies to use automation safely and efficiently, the development of automated aviation systems training is a growing challenge. Task analysis has been singled out as the basis of the training, but it can be more time-consuming than traditional development techniques. *Cases on Modern Computer Systems in Aviation* is an essential reference source that covers new information technology use in aviation systems to streamline the cybersecurity, decision-making, planning, and design processes within the aviation industry. Featuring coverage on a broad range of topics such as computer systems in aviation, artificial intelligence, software-defined networking (SDN), air navigation systems, decision support systems (DSS), and more, this publication is ideally designed for aviation specialists and industry professionals, technicians, practitioners, researchers, and academicians seeking current research on modern modeling approaches to streamline management in aviation.
