Strategic Analysis and Recommendations for Red Bull , 2023-01-16 Seminar paper from the year 2022 in the subject Business economics - Review of Business Studies, , language: English, abstract: Red Bull GmbH is one of the largest companies globally in terms of innovation. It is this competitive edge in innovation that enabled the company to transition its product from an unstable drink to a leading energy drink globally. The Austrian company was founded in 1987 and has so far grown to occupy the largest share of the energy drink market, selling 7.5 billion cans in the year ending 2019. Red Bull's main strength is in its marketing campaigns. Instead of following a traditional approach to mass marketing, Red Bull

generates brand awareness through the creation of a brand myth by engaging customers in multiple activities and experiences, including extreme sports events. Red Bull also owns sports teams such as Formula One team, football clubs such as Red Bull Salzburg and so on. Other marketing activities include music engagement through Red Bull Records, as well as celebrity endorsements. Apart from its sports-centred marketing being innovative, the cost of this approach is lower than the conventional methods used by other beverage companies such as Coca-Cola. Despite its marketing success, the company faces the problem of lacking a patent for the company's product formula. As such, many companies used Red Bull's secret ingredients to develop competing products. Furthermore, Red Bull has received negative press regarding the potential health risks associated with some of its products.

**Market definition and analysis of Pepsi-Cola** Benjamin Pommer, 2014-08-25 Seminar paper from the year 2014 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,3, University of Applied Sciences Essen, language: English, abstract: PepsiCo is a global consumption goods company with a focus on beverages and "junk" food. The total revenue in 2013 underlines its global significance. Compared to Coca-Cola Company, PepsiCo is stronger in North America and around the globe, but that is a direct result of PepsiCo's diversified portfolio. When it comes to brand value and numbers of sold cola beverages, Coca-Cola Co has a unique market share. Especially on the cola-market, both companies are the most successful competitors worldwide. Pepsi-Cola has a very long history, but had only been a domestic product in the United States until the late 1940s. Therefore, Coca-Cola has an advantage regarding international distribution. In Germany, Pepsi-Cola entered the market almost 30 years after Coca-Cola. Nonetheless, Pepsi proved to be strong opponent by initiating clever marketing campaigns. After the so-called "Pepsi-Challenge" in the 1970s PepsiCo could succeed temporarily in winning the consumers' hearts. However, the German market for cola products is much more competitive behind Coca-Cola than the US-market. Traditionally, Coca-Cola is the main producer of cola in Germany followed by local products from discount markets. Next to the big international players, the German beverage industry is very diversified and oriented locally. Pepsi-Cola is available in nearly every German supermarket. It is also very present due to PepsiCo's strong focus on advertising and sponsorship. But among German consumers Coca-Cola still maintains its pole position supported by a dominant brand image. This turns out to be one of the most obvious threat to Pepsi-Cola's market position. Additionally, Pepsi-Cola's image as a cheap cola drink is firming, because of PepsiCo's focus on distribution through discount markets. The development on the German beverage market shows the importance of sustainable packaging and ingredients. Therefore, Pepsi-Cola has to rely on its niche position in order to offer an alternative meeting consumers' requirements in the future.

**Beyond the Boardroom** Dr. Piali Haldar, Dr. Brijlal Malik, 2025-06-19 The book Beyond the Boardroom: Practical

Management Cases in Indian Context is a timely and valuable contribution to the field of management education and practice in India. As management education is continuously evolving in a competitive environment, there is a growing need for resources that go beyond theoretical frameworks and provide real-world insights into decision-making, problem-solving, and leadership. This edited volume responds to that need by offering a comprehensive collection of 100 carefully selected and well-structured case studies drawn from the Indian business environment. By blending theory with practice, the book bridges the gap between classroom learning and the complex realities faced by managers and organisations in diverse industries. At its core, the book recognises the importance of contextualising management knowledge. Much of management literature, historically, has been dominated by Western perspectives and examples. While global theories provide a strong foundation, management students and practitioners in India often struggle to connect them with the unique socio-cultural, economic, political, and legal environment of Indian businesses. It examines how Indian companies, both large corporations and emerging start-ups, navigate challenges and opportunities while responding to the local environment. Such an approach not only enhances the relevance of management education in India but also encourages learners to appreciate the nuances of decision-making in emerging economies. The case studies cover a wide spectrum of management disciplines, ensuring that readers gain a holistic perspective. In the area of Marketing, the book spans both traditional marketing practices and digital marketing strategies, reflecting the transformation Indian businesses are undergoing in reaching consumers. In the field of Human Resource Management (HRM), the book explores cases on talent acquisition, workforce diversity, performance appraisal, and employee engagement. The Finance section includes case studies that shed light on capital structuring, investment decisions, risk management, and financial planning within Indian businesses. Strategic Management and Policy form another significant focus of the book. The cases under this domain explore mergers and acquisitions in the Indian corporate sector, the impact of globalization on domestic firms, and the strategies adopted by organisations to remain competitive in highly dynamic markets. The General Management and Operations section deals with the day-to-day challenges that managers encounter. Cases in this area cover topics such as supply chain disruptions, quality management, lean operations, project management, and customer relationship management. One of the strengths of this book is its interdisciplinary nature. By offering cases that cut across multiple functions, it highlights the interconnectedness of business decisions. Through these interlinkages, the book encourages readers to adopt a holistic mindset and view management problems not in isolation but as part of an integrated system. For educators, the book serves as an invaluable teaching aid. The case method of learning, which has long been recognised as an effective pedagogical tool, allows students to engage actively with real scenarios, debate alternative courses of action, and develop problem-solving skills. With 100 diverse cases, instructors have ample material to design course modules, assign group discussions, and encourage applied research. The richness and variety of cases ensure that the book can be used across undergraduate, postgraduate, and executive education

programs. For students, the book provides an opportunity to sharpen analytical, decision-making, and leadership skills. By situating cases within the Indian business environment, it fosters a sense of relevance and relatability. Students not only learn theoretical concepts but also witness how those concepts manifest in real organisations. This prepares them to become managers who can adapt theory to practice with confidence. In conclusion, *Beyond the Boardroom: Practical Management Cases in Indian Context* is more than just a collection of case studies; it is a comprehensive learning resource that reflects the vibrancy and complexity of Indian business. By covering all major management disciplines—Marketing, Digital Marketing, HR, Finance, Strategic Management, General Management, and Operations—the book provides a 360-degree view of organisational challenges. For academicians, students, and practitioners alike, this book is an essential companion in the journey of bridging theory and practice in management education.
