The Last Train from Hiroshima Charles Pellegrino, 2010-01-19 Drawing on the voices of atomic-bomb survivors and the new science of forensic archaeology, Charles Pellegrino describes the events and aftermath of two days in August when nuclear devices detonated over Japan changed life on Earth forever. *Last Train from Hiroshima* offers readers a stunning “you are there” time capsule, gracefully wrapped in elegant prose. Charles Pellegrino’s scientific authority and close relationship with the A-bomb’s survivors make his account the most gripping and authoritative ever written. At the narrative’s core are eyewitness accounts of those who experienced the atomic explosions firsthand—the Japanese civilians on the ground and the American flyers in the air. Thirty people are known to have fled Hiroshima for Nagasaki—where they arrived just in time to survive the second bomb. One of them, Tsutomu Yamaguchi, is the only person who experienced the full effects of the cataclysm at ground zero both times. The second time, the blast effects were diverted around the stairwell in which Yamaguchi had been standing, placing him and a few others in a shock cocoon that offered protection, while the entire building disappeared around them. Pellegrino weaves spellbinding stories together within an illustrated narrative that challenges the “official report,” showing exactly what happened in Hiroshima and Nagasaki—and why.

To Hell and Back Charles Pellegrino, 2015-08-06 Drawing on the voices of atomic bomb survivors and the new science of forensic archaeology, Charles Pellegrino describes the events and the aftermath of two days in August when nuclear devices, detonated over Japan, changed life on Earth forever. *To Hell and Back* offers readers a stunning, “you are there” time capsule, wrapped in elegant prose. Charles Pellegrino’s scientific authority and close relationship with the A-bomb survivors make his account the most gripping and authoritative ever written. At the narrative’s core are eyewitness accounts of those who experienced the atomic explosions firsthand—the Japanese civilians on the ground. As the first city targeted, Hiroshima is the focus of most histories. Pellegrino gives equal weight to the bombing of Nagasaki, symbolized by the thirty people who are known to have fled Hiroshima for Nagasaki—where they arrived just in time to survive the second bomb. One of them, Tsutomu Yamaguchi, is the only person who experienced the full effects of both cataclysms within Ground Zero. The second time, the blast effects were diverted around the stairwell behind which Yamaguchi’s office conference was convened—placing him and few others in a shock cocoon that offered protection while the entire building disappeared around them. Pellegrino weaves spellbinding stories together within an illustrated narrative that challenges the “official

report,” showing exactly what happened in Hiroshima and Nagasaki—and why. Also available from compatible vendors is an enhanced e-book version containing never-before-seen video clips of the survivors, their descendants, and the cities as they are today. Filmed by the author during his research in Japan, these 18 videos are placed throughout the text, taking readers beyond the page and offering an eye-opening and personal way to understand how the effects of the atomic bombs are still felt 70 years after detonation.

Text, Lies and Cataloging Jana Brubaker, 2018-07-09 What do James Frey's *A Million Little Pieces*, Margaret B. Jones' *Love and Consequence* and Wanda Koolmatrie's *My Own Sweet Time* have in common? None of these popular books are what they appear to be. Frey's fraudulent drug addiction memoir was really a semi-fictional novel, Jones' chronicle of her life in a street gang was a complete fabrication, and Koolmatrie was not an Aboriginal woman removed from her family as a child, as in her seemingly autobiographical account, but rather a white taxi driver named Leon Carmen. Deceptive literary works mislead readers and present librarians with a dilemma. Whether making recommendations to patrons or creating catalog records, objectivity and accuracy are crucial--and can be difficult when a book's authorship or veracity is in doubt. This informative (and entertaining!) study addresses ethical considerations for deceptive works and proposes cataloging solutions that are provocative and designed to spark debate. An extensive annotated bibliography describes books that are not what they seem.

The Atomic Bomb in Japanese Cinema Matthew Edwards, 2015-07-03 Seventy years after the nuclear attacks on Hiroshima and Nagasaki, Japan is still dealing with the effects of the bombings on the national psyche. From the Occupation Period to the present, Japanese cinema had offered a means of coming to terms with one of the most controversial events of the 20th century. From the monster movies *Gojira* (1954) and *Mothra* (1961) to experimental works like *Go Shibata's* *NN-891102* (1999), atomic bomb imagery features in all genres of Japanese film. This collection of new essays explores the cultural aftermath of the bombings and its expression in Japanese cinema. The contributors take on a number of complex issues, including the suffering of the survivors (*hibakusha*), the fear of future holocausts and the danger of nuclear warfare. Exclusive interviews with *Go Shibata* and critically acclaimed directors *Roger Spottiswoode* (*Hiroshima*) and *Steven Okazaki* (*White Light/Black Rain*) are included.

Killing the Rising Sun Bill O'Reilly, Martin Dugard, 2016-09-13 Across the globe in Los Alamos, New Mexico, Dr. J. Robert Oppenheimer and his team of scientists are preparing to test the deadliest weapon known to mankind. In Washington, DC, FDR dies in office and Harry Truman ascends to the presidency, only to face the most important political decision in history: whether to use that weapon. And in Tokyo, Emperor Hirohito, who is considered a deity by his subjects, refuses to surrender, despite a massive and mounting death toll. Told in the same page-turning style of *Killing Lincoln*, *Killing Kennedy*, *Killing Jesus*, *Killing Patton*, and *Killing Reagan*, this epic saga details the final moments of World War II like never before.

Ghosts of Hiroshima Charles Pellegrino,2025-08-05 SOON TO BE A MAJOR MOTION PICTURE FROM ACADEMY AWARD-WINNING FILMMAKER JAMES CAMERON From the acclaimed New York Times bestselling author of *Her Name, Titanic*, this masterpiece of nonfiction arrives in time to honor the eightieth anniversary of the bomb dropping on Hiroshima. For all humanity, it was, literally and figuratively, childhood's end. No one recognized the flashes of bright light that filled the sky. Survivors described colors they couldn't name. The blast wave that followed seemed to strike with no sound. In that silence came the dawn of atomic death for two hundred thousand souls. On August 6, 1945, twenty-nine-year-old naval engineer Tsutomu Yamaguchi was on the last day of a business trip, looking forward to returning home to his wife and infant son, when the bomb was dropped on Hiroshima. He survived the atomic blast and got on a train to Nagasaki, only to be bombed again. Jacob Beser, a Manhattan Project engineer, looked down on Hiroshima and saw the ground boiling. Years afterward, he referred to what he witnessed as "the most bizarre and spectacular two events in the history of man's inhumanity to man." From that first millionth of a second, people began to die in previously unimaginable ways. Near Hiroshima's hypocenter, teeth were scattered on the ground, speckles of incandescent blood were converted to carbon steel, a child's marbles melted to blobs of molten glass. From the bombs were born radioactive substances that mimicked calcium in growing bones and which, ten years later, filled hospitals with a shocking truth: nuclear weapons, more than anything else, were child-killers. Based on years of forensic archaeology combined with interviews of more than two hundred survivors and their families, *Ghosts of Hiroshima* is a you-are-there account of ordinary human beings thrust into extraordinary events, during which our modern civilization entered its most challenging phase—a nuclear adolescence that, unless we are very wise and learn from our past, we may not survive.
