Homelessness in America Stephen Eide, 2022-06-02 The last thirty years have witnessed an urban renaissance in America. Major cities have managed to drive down the murder rate, improve the schools, restore the built environment, and revitalize their economies. Middle class families are putting down roots in neighborhoods once given up for dead. But solutions to homelessness have eluded even the most successful cities. While the South Bronx was once synonymous across the globe for “slum,” now, San Francisco and Los Angeles are just as internationally notorious for their homelessness crises. Indeed, the same cities with the worst homelessness crises rank among America’s most successful. One of the crisis’ more perplexing features is how cities that have met with so much success with respect to economic development, crime and public education have failed to even ease their homelessness crisis, much less end it. In *Homelessness in America*, Stephen Eide examines the history, governmental and private responses, and future prospects of this intractable challenge. The “chronic” nature of the challenge should be understood, he argues, by reference to American history and American ideals. The history of homelessness is bound up with industrialization and urbanization, the closing of the West, the Great Depression, and the post WWII decline and subsequent revival of great American cities. Though we’ve used different terms (“tramp” “hobo” “bum”) at other times, something like homelessness has always been with us and the debate over causes and solutions has always involved conflicts over fundamental values. After explaining why homelessness persists in America and correcting popular misconceptions about the issue, Eide offers concrete recommendations for how we can do better for the homeless population. *Homelessness in America* engages readers by answering the most common questions their audience brings to the topic and exploring other questions that are no less important for being not as commonly asked. Homelessness intersects with multiple other policy areas: education, urban development, criminal justice reform, mental health. By exploring the intersection of homelessness with so many other policy areas, this book aspires to provide a comprehensive account of the challenge.

Truths Vivek Ramaswamy, 2024-09-24 New York Times bestselling author, accomplished entrepreneur, and former presidential candidate Vivek Ramaswamy has a plan to save America, and it begins with telling the truth. Today’s conservatives know what they’re against. They’re anti-woke, anti-globalist, anti-big government. But what exactly do they stand for? The fact that this is a hard question to answer is a damning indictment of the modern Republican Party which has

abjectly failed to articulate an affirmative alternative to the left's vision. Ramaswamy calls on the conservative movement to articulate exactly what it stands for, or else warns of another illusory "red wave" in 2024. Vivek Ramaswamy is not a politician. He is a first generation American, the founder of several successful companies, and a bestselling author. Ramaswamy decided he needed to step in the arena to stop the lies and tell the American people the truth. That's why he ran for president and became a leading voice in the America First movement. In *Truths: The Future of America First*, Ramaswamy shows exactly how honesty about the most important issues will get our country back on track. The America First movement emphasizes the issues that bring us together, not what divides us. It asks that we put our country over politics, merit over grievance, and truth over lies. Ramaswamy tells us the truth about our political system, and the people who control it, and exhorts us to exercise our right to self-governance again. America First is bigger than any man or woman. It's a movement. In *Truths*, Vivek Ramaswamy explains exactly why that movement needs to succeed now more than ever. Our country's future depends on it.

Everyday Utopia Kristen R. Ghodsee, 2023-05-16 A "fascinating" (The Wall Street Journal), "spirited and inspiring" (Jacobin) tour through the ages in search of the thinkers and communities that have dared to reimagine how we might better live our daily lives. In the 6th century BCE, the Greek philosopher Pythagoras—a man remembered today more for his theorem about right-angled triangles than for his progressive politics—founded a commune in a seaside village in what's now southern Italy. The men and women there shared their property, lived as equals, and dedicated themselves to the study of mathematics and the mysteries of the universe. Ever since, humans have been dreaming up better ways to organize how we live together, pool our resources, raise our children, and determine who's part of our families. Some of these experiments burned brightly for only a brief while, but others carry on today: from the Danish cohousing communities that share chores and deepen neighborly bonds, to matriarchal Colombian ecovillages where residents grow their own food; and from Connecticut, where new laws make it easier for extra "alloparents" to help raise children not their own, to China where planned microdistricts ensure everything a busy household might need is nearby. One of those startlingly rare books that upends what you think is possible, *Everyday Utopia* provides a "powerful reminder that dreaming of better worlds is not just some fantastical project, but also a political one" (Rebecca Traister, New York Times bestselling author of *Good and Mad*). This "must-read" (Thomas Piketty, New York Times bestselling author of *A Brief History of Equality*) offers a radically hopeful vision for how to build more contented and connected societies, alongside a practical guide to what we all can do in the meantime to live the good life each and every day.

Family Life, Family Law, and Family Justice Marsha Garrison, 2022-10-28 *Family Life, Family Law, and Family Justice: Tying the Knot* combines history, social science, and legal analysis to chart the evolution and interdependence of family life and family law, portray current trends in family life, explain the pressing policy challenges these trends have produced, and

analyze the changes in family law that are essential to meeting these challenges. The challenges are large and pressing. Across the industrialized West, nonmarital birth, relational stress, multi-partner fertility, and relationship dissolution have increased, producing a dramatic rise in single parenthood, poverty, and childhood risk. This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility. Although the divide is most pronounced in the United States, the same patterns now affect families throughout the Western world. Across the European Union, there are 9.2 million lone parents, and just under half of their families live in poverty. *Tying the Knot* demonstrates how today's family patterns are deeply rooted in long-standing, class-based differences in family life and explains why these class-based differences have accelerated. It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty-first century families. The book will be of considerable interest to family specialists from a number of fields, including law, demography, economics, history, political science, public health, social policy, and sociology.

Nuclear Family Meltdown CONRAD. RIKER,2025-03-16 Your Children Are Being Stolen-Not by Crime, but by 'Care'. Are you tired of being labeled a tyrant for teaching your son accountability? What if the system wants your family broken to feed its foster-industrial complex? Why are kids in progressive states 100x more likely to die under state custody than with problematic dads? -

Restitching the American Marital Quilt Lisa Milot,2015 Part I of this Note will trace the various threads of American marriage law, particularly the perception that marriage is unraveling today due to an unprecedented divorce crisis. Part II

will disentangle the conflicting patterns of contract law and status regimes that variously govern marriage, focusing on the uneven enforcement of antenuptial contracts and the implications of such. Part III will argue that the true focus of regulation is the status of the nuclear family, not of marriage per se. Finally, Part IV will propose a bifurcation of the legal regimes governing marriage and the family, recognizing the ability of individuals to order their private lives without state involvement until third parties-children-are involved. Laws designed to regulate, and arguably protect, families need to be extended to include those families that are formed outside legal marriages and limited to exclude married couples without children.
