**HANG ON! Navigating the Emotional Roller Coaster of Raising a Child with a Disability** Melvin J. Miller MA in Special Education M.Ed. in Educational Leadership, 2021-01-21 Every three minutes, a child is born with a disability. Every three minutes, a parent is tossed upon an emotional roller coaster of raising a child with a disability. The steep climbs and sharp curves of emotions in raising a child with a disability are not something a parent is prepared for. These parents will flounder around in a maelstrom of negative emotions for months or years until they can finally work their way out. Hang On! Navigating the Emotional Roller Coaster of Raising a Child with a Disability addresses these issues to allow parents to recognize when they are in the grasp of a negative emotion and how to overcome its impact. In doing so, the parent can then move on to the positive emotions that can be experienced in raising their child with a disability. Hang On! first addresses the negative emotions parents of a child with a disability face by Providing a brief description of twelve negative emotions Examining the dangers of experiencing each negative emotion Allowing the parent to recognize if they are experiencing that emotion Providing ways to leave that negative emotion behind Hang On! then continues to the fourteen positive emotions a parent can experience in raising a child with a disability by Providing a brief description of fourteen positive emotions Examining the benefits derived from each emotion Providing ways to enhance the experiences of each of these positive emotions

These lessons are easily incorporated into the present curriculum as an introduction to a math concept, a homework piece, or an extra challenge. Teacher notes and suggestions for the classroom are followed by extension problems and additional background material. This is a great way to spark student interest in math. Grades 5-12.

**Human Enhancement** Julian Savulescu, Nick Bostrom, 2009-01-22 To what extent should we use technological advances to try to make better human beings? Leading philosophers debate the possibility of enhancing human cognition, mood, personality, and physical performance, and controlling aging. Would this take us beyond the bounds of human nature? These are questions that need to be answered now.

*The Perfect Child* Lucinda Berry, 2019 A Washington Post and Amazon Charts bestseller. A page-turning debut of suspense about a young couple desperate to have a child of their own--and the unsettling consequences of getting what they always wanted. Christopher and Hannah are a happily married surgeon and nurse with picture-perfect lives. All that's missing is a child. When Janie, an abandoned six-year-old, turns up at their hospital, Christopher forms an instant connection with her, and he convinces Hannah they should take her home as their own. But Janie is no ordinary child, and her damaged psyche proves to be more than her new parents were expecting. Janie is fiercely devoted to Christopher, but she acts out in increasingly disturbing ways, directing all her rage at Hannah. Unable to bond with Janie, Hannah is drowning under the pressure, and Christopher refuses to see Janie's true nature. Hannah knows that Janie is manipulating Christopher and isolating him from her, despite Hannah's attempts to bring them all together. But as Janie's behavior threatens to tear Christopher and Hannah apart, the truth behind Janie's past may be enough to push them all over the edge.
