The End of Empires Michael Gehler, Robert Rollinger, Philipp Strobl, 2022-11-21 The articles of this comprehensive edited volume offer a multidisciplinary, global and comparative approach to the history of empires. They analyze their ends over a long spectrum of humankind's history, ranging from Ancient History through Modern Times. As the main guiding question, every author of this volume scrutinizes the reasons for the decline, the erosion, and the implosion of individual empires. All contributions locate and highlight different factors that triggered or at least supported the ending or the implosion of empires. This overall question makes all the contributions to this volume comparable and allows to detect similarities, differences as well as inconsistencies of historical processes.

The Mughal Empire and Its Decline Andrea Hintze, 1997 The book examines major developments and recent trends in the historiography of the Mughal Empire and post-Mughal state systems. The aim is to integrate the research of the past twenty to thirty years in a theoretical framework in order to achieve a better understanding of the transition period of the late 17th and early 18th century in India. The book outlines organizational structures and power relationships in the Mughal Empire and accounts for the redistribution of power on the Indian subcontinent in the context of long-term structural change in the Indian Ocean region. Rather than signalling social stagnation and decay, the decline of the imperial order and the transformation of the political system appear to reflect a process in which the state dynamically adjusted to changes in Indian society and economy. By integrating new social groups and incorporating various new technical means of resources management, the state significantly enhanced its organizational power and its capacity for social control.
