Benedict XIV and the Enlightenment Rebecca Messbarger, Christopher M.S. Johns, Philip Gavitt, 2016-01-01 Pope Benedict XIV Lambertini (r. 1740-58) was one of the driving forces behind the Italian Enlightenment of the eighteenth century. His campaign to reconcile faith and empirical science, re-launch a dialogue between the Church and the European intellectual community, and expand papal patronage of the arts and sciences helped restore Italy's position as a center of intellectual and artistic innovation. Benedict XIV and the Enlightenment offers a broad and nuanced assessment of Benedict's engagement with Enlightenment art, science, spirituality, and culture. The collection's essays, written by international experts in the field, cover topics ranging from Benedict's revisions to the Church's procedures for beatification and sanctification to his patronage of women scientists and mathematicians at the university in Bologna, his birthplace.

Where Have All the Heavens Gone? John P. McCarthy, Edmondo F. Lupieri, 2017-05-04 Twenty years before his famous trial, Galileo Galilei had spent two years carefully considering how the results of his own telescopic observations of the heavens as well as his convictions about the truth of the Copernican theory could be aligned with the Catholic Church's position on biblical interpretation and the authority of the magisterium. The product of these two years was an unpublished letter to the Grand Duchess Christina of Tuscany, the mother of his patron, Cosimo II de' Medici. Much has changed since this letter was written in 1615, but much has remained the same. This collection of articles by renowned international scholars provides the historical context of the letter as well as a description of the scientific world of Galileo. It also explores those issues that make this 1615 letter a document for our time: the public role of religious authority, the truth of the Bible, and the relationship of scientific inquiry to social justice. Galileo's letter to Christina has become a classic text in the history of the relationship between science and religion in the West for good reason; this volume explores why the letter has earned its rightful place as a classic even for today.

IL CASO GALILEO: Perché Galileo aveva torto e la Chiesa Cattolica ragione Carlo Maria Pace,2020-02-28 Si sente parlare comunemente del Caso Galileo come di un grave errore di cui si sarebbe macchiata la Chiesa Cattolica; si afferma, più specificatamente, che il sistema tolemaico era sbagliato mentre il sistema copernicano era giusto, accusando con questo la Chiesa Cattolica, per il passo ormai celeberrimo del «Fermati, o Sole» di Giosuè, di aver affermato solennemente cose false. Ma, in realtà, queste affermazioni comuni sono completamente sbagliate. Pertanto, per ristabilire la verità, questo libro, a partire dalle principali fonti storiche documentali, mostra chiaramente, non solo da un punto di vista logico ma anche e soprattutto da un punto di vista rigorosamente scientifico, che, riguardo al Caso Galileo, Galileo Galilei aveva torto e la Chiesa Cattolica aveva ragione. Di conseguenza chi, basandosi sulla fisica, attacca la Chiesa Cattolica riguardo al famoso passo biblico del «Fermati, o Sole» di Giosuè manifesta malafede o ignoranza su questo argomento. Infine, in questa opera si fa vedere che la Chiesa Cattolica, con la giusta condanna inflitta a Galileo Galilei (riguardo al Caso Galileo), non solo non ha ostacolato, ma anzi ha contribuito all'avanzamento della scienza moderna.

Galileo's Telescope Massimo Bucciattini,Michele Camerota,Franco Giudice,2015-03-23 Between 1608 and 1610 the canopy of the night sky was ripped open by an object created almost by accident: a cylinder with lenses at both ends. Galileo's Telescope tells how this ingenious device evolved into a precision instrument that would transcend the limits of human vision and transform humanity's view of its place in the cosmos.
