Youth, Identity, and Digital Media David Buckingham,2007-11-30 Contributors discuss how growing up in a world saturated with digital media affects the development of young people's individual and social identities. As young people today grow up in a world saturated with digital media, how does it affect their sense of self and others? As they define and redefine their identities through engagements with technology, what are the implications for their experiences as learners, citizens, consumers, and family and community members? This addresses the consequences of digital media use for young people's individual and social identities. The contributors explore how young people use digital media to share ideas and creativity and to participate in networks that are small and large, local and global, intimate and anonymous. They look at the emergence of new genres and forms, from SMS and instant messaging to home pages, blogs, and social networking sites. They discuss such topics as “girl power” online, the generational digital divide, young people and mobile communication, and the appeal of the “digital publics” of MySpace, considering whether these media offer young people genuinely new forms of engagement, interaction, and communication. Contributors Angela Booker, danah boyd, Kirsten Drotner, Shelley Goldman, Susan C. Herring, Meghan McDermott, Claudia Mitchell, Gitte Stald, Susannah Stern, Sandra Weber, Rebekah Willett

Our Children and Other Animals Matthew Cole, Kate Stewart, 2016-05-23 Focusing on the socialization of the human use of other animals as resources in contemporary Western society, this book explores the cultural reproduction of human-nonhuman animal relations in childhood. With close attention to the dominant practices through which children encounter animals and mainstream representations of animals in children's culture - whether in terms of the selective exposure of children to animals as pets or as food in the home or in school, or the representation of animals in mass media and social media - *Our Children and Other Animals* reveals the interconnectedness of studies of childhood, culture and human-animal relations. In doing so it establishes the importance of human-animal relations in sociology, by describing the sociological importance of animals in children's lives and children in animals' lives. Presenting a new typology of the various kinds of human-animal relationship, this conceptually innovative book constitutes a clear demonstration of the relevance of sociology to the interdisciplinary field of human-animal relations and will appeal to readers across the social sciences with interests in sociology, childhood studies, cultural and media studies and human-animal interaction.

Working the Double Shift Christine Motokane, 2014-02-18 "Working the Double Shift" is a raw honest autobiography from a young woman with autism. Feeling that the current books on autism were not a fit for her, Christine decided to write a memoir covering different topics as well as the emotional process of a person with autism. The book covers her journey from birth to college and how she learned to find her voice and path in life as well as interventions and approaches that worked for her. This memoir also brings awareness to different social issues regarding autism and adulthood.

Cuteness Engineering Aaron Marcus, Masaaki Kurosu, Xiaojuan Ma, Ayako Hashizume, 2017-10-30 This state of the art monograph presents a unique introduction to thinking about cuteness and its incorporation into modern, especially computer-based, products and services. Cuteness is defined and explored in relation to user-centered design concepts and methods, in addition to considering the history of cuteness and cuteness in other cultures, especially in relation to eastern Asia. The authors provide detailed analyses and histories of cuteness in Japan and in China, the rise of Kawaii and Moe cultural artifacts, and their relation to social, psychological, and design issues. They also attempt an initial taxonomy of cuteness. Finally, detailed interviews with leading designers of cute products and services, such as Hello Kitty, provide an understanding of the philosophy and decision-making process of designers of cuteness. *Cuteness Engineering: Designing*

Adorable Products and Services will be of interest and use to a wide range of professionals, researchers, academics, and students who are interested in exploring the world of cuteness in fresh new ways and gaining insights useful for their work and studies.

Anytime Playdate Dade Hayes, 2008-05-06 In this eye-opening book, the first to investigate the explosion of the multibillion-dollar preschool entertainment business and its effects on families, Dade Hayes -- an entertainment expert, author, and concerned father -- lifts the veil on the closely guarded process of marketing to the ultra-young and their parents. Like many parents, Dade Hayes grabbed me time by plopping his daughter in front of the TV, relaxing while Margot delighted in the sights and sounds of Barney and the Teletubbies. But when Margot got hooked, screaming whenever the TV was turned off, Hayes set out to explore the vast universe of this industry in which preschoolers devour \$21 billion worth of entertainment. Going behind the scenes to talk with executives, writers, and marketers who see the value of educational TV, Hayes finds compelling research that watching TV may raise IQs and increase vocabularies. On the other side, he brings in the voices of pediatricians and child psychologists who warn against babysitter TV and ask whether TV trance is healthy -- in spite of the relaxation that the lull affords exhausted parents -- as recent studies link early television viewing with obesity, attention and cognitive problems, and violence. Along the way, Hayes narrates the fascinating evolution of Nickelodeon's bilingual preschool gamble, *Ni Hao, Kai-lan*, from an art student's Internet doodles to its final product: an educationally fortified, Dora-inflected, test audience-approved television show. At the show's debut, jittery experts hold their breath as the tweaked and researched Kai-lan faces Mr. Potato Head in the battle for a three-year-old's attention. *Anytime Playdate* reveals the marketing science of capturing a toddler's attention, examining whether Baby Einstein and its ilk will make babies smarter, or if, conversely, television makes babies passive and uncritical, their imaginations colonized by marketing schemes before they even speak. It tells us why the raucous Dora the Explorer has usurped Blues Clues for preschool primacy, why the Brit hit *In the Night Garden* won't follow Teletubbies into American tot stardom, and why the comparatively quiet and wholesome Sesame Street has reigned for decades. Hayes vividly portrays the educators, psychologists, executives, parents,

and, lest we forget, kids who have shaped the history of children's television, uncovering the tensions between the many personalities, the creative foment that combines story, music, and message in this medium to produce today's almost dizzying array of products and choices. In the end, Hayes gives readers a provocative but balanced portrait of an age in technological transition, and shows that what's at stake in the Rattle Battle is nothing less than the character of the next generation.
