

King Philip II Of Macedonia

Don Nardo

Philip II of Macedonia Richard A. Gabriel, 2010-08-31 Philip II of Macedonia (382-336 BCE), unifier of Greece, author of Greece's first federal constitution, founder of the first territorial state with a centralized administrative structure in Europe, forger of the first Western national army, first great general of the Greek imperial age, strategic and tactical genius, and military reformer who revolutionized warfare in Greece and the West, was one of the greatest captains in the military history of the West. Philip prepared the ground, assembled the resources, conceived the strategic vision, and launched the first modern, tactically sophisticated and strategically capable army in Western military history, making the later victories of his son Alexander possible. Philip's death marked the passing of the classical age of Greek history and warfare and the beginning of its imperial age. To Philip belongs the title of the first great general of a new age of warfare in the West, an age that he initiated with his introduction of a new instrument of war, the Macedonian phalanx, and the tactical doctrines to ensure its success. As a practitioner of the political art, Philip also had no equal. In all these things, Philip exceeded Alexander's triumphs. This book establishes Philip's legitimate and deserved place in military history, which, until now, has been largely minimized in favor of his son by the classicist writers who have dominated the field of ancient biography. Richard Gabriel, renowned military historian, has given us the first military biography of Philip II of Macedonia.

King Philip II and King Alexander III Mary Lukes Stamoulis, 2012-07-01 Story of King Philip II of Macedonia and his multiple romances and marriages. He was a brilliant military strategist in the many successful battles he fought, some of which were with the divided Athenian city-states. He unified them into the League of Corinth and appointed himself as their Captain-General. His greatest accomplishment was in his fourth marriage with the Molossian princess Olympias, who bore him a son who became King Alexander III, The Great. He surpassed his father in military genius with the battles he fought conquering most of the known world in his search for the Persian King Darius III to make him and his ancestors pay for their past destruction of Greece. In the area of romance, he was completely different from his father. He wooed, in a tender romance, and won the beautiful Persian princess Roxane.

Philip II of Macedonia Ian Worthington, 2008 Alexander the Great is probably the most famous ruler of antiquity. But what of his father, Philip II, who united Macedonia, created the best army in the world at the time, and conquered and annexed Greece? This biography brings to light Philip's political, economic, military, social, and cultural accomplishments.

The Courts of Philip II and Alexander the Great Frances Pownall, Sulochana R. Asirvatham, Sabine Müller, 2022-01-19

Recent scholarship has recognized that Philip II and Alexander the Great adopted elements of their self-fashioning and court ceremonial from previous empires in the Ancient Near East, but it is generally assumed that the advent of the Macedonian court as a locus of politics and culture occurred only in the post-Alexander landscape of the Hellenistic Successors. This volume of ground-breaking essays by leading scholars on Ancient Macedonia goes beyond existing research questions to assess the profound impact of Philip and Alexander on court culture throughout the ages. The papers in this volume offer a thematic approach, focusing upon key institutional, cultural, social, ideological, and iconographical aspects of the reigns of Philip and Alexander. The authors treat the Macedonian court not only as a historical reality, but also as an object of fascination to contemporary Greeks that ultimately became a topos in later reflections on the lives and careers of Philip and Alexander. This collection of papers provides a paradigm-shifting recognition of the seminal roles of Philip and Alexander in the emergence of a new kind of Macedonian kingship and court culture that was spectacularly successful and transformative.

Philip II, the Father of Alexander the Great Edward M. Anson, 2020-10-01 Philip II was not only the father of Alexander the Great, but in many respects was also the father of his son's incredible career. It was the father who unified Macedonia into the first European nation and who created the army with which his son conquered the Persian Empire and inaugurated the Hellenistic Age. This volume is not the standard biography, but rather an examination of the major controversies concerning his life and reign. How did Philip in roughly twenty years transform a divided territory and little more than a geographical conception into a national state? How did he change the very nature of ancient Western warfare? How did he transform this formerly exploited region into the master of the Greek world? Each chapter discusses one of the major academic controversies surrounding this transformative figure, bringing new clarity to the career of a man whose reputation has been so overshadowed by his illustrious son.

Philip II of Macedon Alfred S. Bradford, 1992-10-26 Philip II of Macedon is a unique compilation of fragments of ancient writings, epitomes, and passages from the orators that together form a contemporary biography of one of the most influential figures of the ancient world. Alfred Bradford has collected, translated, and integrated all the significant classical writings about Philip II, the father of Alexander the Great, and he presents them in a readable and lively manner, telling the story of Philip from his precarious childhood, when his life was threatened by his own mother, to his bloody death, when he was murdered by a bodyguard. Philip II, the conqueror of Athens, was the dominant man of his time. A great military tactician and strategist--as evidenced by the analysis of the Battle of Chaeronea provided in this book--Philip built the army that Alexander the Great used to conquer the known world. Knowledge of Philip's life and military achievements is requisite for an understanding of Macedonia and Greece during the Age of Philip. Illustrated with maps by Alfred Bradford and

drawings (based on ancient artifacts) by Pamela Bradford, this compelling biography will be of interest to students of ancient history as well as to military historians.

Disability in Ptolemaic Egypt and the Hellenistic World Alexandra F. Morris, 2024-12-20 This is one of the first single-authored books to utilise Critical Disability Studies and the lens of embodiment to comprehensively unveil, explore, and celebrate disability in Ptolemaic Egypt and the Hellenistic world through a critical examination of art, artefacts, texts, and human remains. Through a thoughtful investigation, this volume reveals often-overlooked narratives of disability within Ptolemaic Egypt and the larger Hellenistic world (332 BCE to 30 BCE). Chapters explore evidence of physical and intellectual disability, ranging from named individuals; representations of people and mythological figures with dwarfism, blindness and vision impairments; cerebral palsy; mobility impairments; spinal disability; and medicine, healing, and prosthetics. Morris examines the historiographical ways in which disability has been approached, and how ancient disability histories are (mis)represented in various contemporary spaces. It uses terminology informed by the disability community and offers guidance for disability inclusivity in curatorial and pedagogical museum and university contexts, as well as prioritizing disability as an essential area of research in ancient world studies and assisting readers with the identification of ancient disability artefacts. The first-book length treatment of the subject, *Disability in Ptolemaic Egypt and the Hellenistic World* provides a much-needed resource for students and scholars of ancient Egypt, Egyptology, Classics, Classical Studies, and disability in the ancient world. It is also suitable for researchers in Disability Studies, practitioners in broader Ancient World Studies, and museum and heritage professionals. It is accessible to disabled people curious about their own history, as well as nondisabled people interested in disability history and those interested in a more accurate view of ancient Egyptian history.

Philip II of Macedon Mark Luttenberger, 2019-10-17 The topic of inquiry is a political, military, and economic history of ancient Macedon during the reign of Philip II (359-336) in the fourth century BC. The first two chapters analyze the early history of Macedon and the development of the political, military, social, and economic institutions of the Macedonian kingdom. The balance of the book discusses the rise of Macedon from a small kingdom on the periphery of the Greek world to become the master of ancient Hellas and the Balkan world south of the Danube River. The central figure of the book is Philip II who ascended the throne as a young man in his early twenties after the defeat and death of his brother and six thousand Macedonians by the hostile Illyrians. The book follows his twenty-three-year reign as he guides the Macedonian people to the pinnacle of power and dominance over their neighbors in the Balkan world. You will witness the political, military, and economic growth of the kingdom that Philip created through his numerous reforms and conquests. His energetic, cunning, and inspired leadership will be revealed in these accomplishments. At Philip's death in 336, the foundation of power was established that his son Alexander the Great would use to conquer the Persian Empire. As Philip's power grew, you will

encounter his seven wives that formed the basis of his diplomatic arrangements to protect the kingdom. You will be introduced to the leading characters whether family, friend, or foe. These include his wife and son Olympias and Alexander; friends Antipater and Parmenio; and foes Bardylis, Onomarchus, Demosthenes, and Artaxerxes III. The book concludes with an analysis of the assassination of Philip and Alexander's consolidation of power in the Balkan world in 335 BC before he embarks on his legendary journey.
