Brenda Rollins

Critical Thinking Richard Paul, Linda Elder, 2021-12-15 Written by international authorities on critical thinking, this book details an integrated, universal concept of critical thinking that is both substantive and applicable to any and every situation in which human thinking is necessary. It provides students with the basic intellectual tools needed for life-long learning, helping them understand the mind and how its three functions-thinking, feeling, motivating-influence one another. Critical Thinking fosters the development of fair-minded critical thinking and explores essential intellectual standards of clarity, precision, accuracy, logicalness, significance, depth, breadth, and fairness; the importance of skilled and deep questioning; and how to take thinking apart in order to find problems in thinking and then improve thinking. The fourth edition features Think for Yourself activities Glossary of critical thinking terms New chapter on argumentation New chapters on critical thinking in the professions (including critique of disciplines) Discussion of the Internet's effects on our lives Updated discussions of media bias and political propaganda, as well as egocentric and sociocentric thought as barriers to critical thinking. The Foundation for Critical Thinking continually offers new supplementary resources on its website (CriticalThinking.org) and in its online critical thinking community (CriticalThinkingCommunity.org).

Partners for Innovation in Teaching and Learning Sharon L. Silverman, Martha E. Casazza, 2005 *Partners for Innovation in Teaching and Learning: A Shared Responsibility* highlights the work of six creative and innovative teachers who developed learner-centered environments in their classrooms. Educational consultants, Sharon Silverman and Martha Casazza, worked with these teachers from the College of Professional Studies at New Jersey City University where they developed a forum on excellence in teaching and learning. The results are showcased with a focus on connecting theory and research to educational practice. The theme of shared responsibility for learning is presented throughout. Some examples include: Developing teacher-student partnerships to create a course syllabus Using questions as a way to promote active participation Building community in the online classroom Using emotions and thoughts as a basis for learning Creating a new approach that reflects problem-based learning, learning communities and collaborative learning The ideas presented are unique and engaging. They stimulate others to take risks and embrace innovation. Challenges and successes are shared to show that implementing new teaching ideas can be both daunting and very rewarding.
