This book is a good example of outcome thinking in practice as Vishwanathan demonstrates how to start with ideas, refining and validating them and finally achieve clear, targeted learning outcomes. Ananth Ramachandran Senior Banker Singapore Outcome thinking is a change in mindset. Thinking in outcomes can help an organization to focus and clarify its mission by forcing it to clearly state and communicate its goals — particularly to its stakeholders. Our stakeholders value us for the outcomes we bring. When these outcomes can be reliably delivered in new ways that are demonstrably cheaper, better, quicker or more convenient than the current offering in today's day and age of AI, we can expect disruption in our lives and work hence outcome thinking is important to constantly reinvent yourself. Pocket Square Rajiv Mathur,2024-02-07 During the challenging times of the pandemic, technology played a crucial role in maintaining virtual connectivity. A YouTube channel named Jaane-Anjaane was initiated to showcase the lighter side of well-known security professionals. Subsequently, this journey was transformed into a book titled Pocket Square, which not only delves into the YouTube show but also explores the author's passion for pocket squares. The book narrates the stories of 24 individuals in the security field, drawing parallels to the unfolding of a pocket square to reveal its hidden design. Risk vs. Rewards in Driving Capital Movement Nikhil Kamath,2019-10-24 This book begins with two hard truths about investment risks and rewards - one is that despite a general understanding of what we would like our rewards to be, the risk is mostly what we don't see coming, until we do. The other is that from the crazy, unseen, unknown, disconnected, and counterintuitive unpredictabilities, we can extract lasting and impactful rewards. A necessity, after all, has always been the mother of all inventions. Unpredictability is the inflection point for new opportunities. Rewards only lie in how well you react to those risks, measure them, learn from them, and create fresh possibilities.

Dropping Out of School into the Markets Nikhil Kamath,2020-12-26 There is yet to be a chess player who can calculate the entire game right from the beginning to the end. Even the best supercomputer capable of brute-computing millions of positions to defeat the mighty Kasparov can see a limited number of moves ahead. Beginnings are tricky. Beginnings also matter the most, lest life capitalizes on your errors to deal a lethal 'Fool's Mate'. Like chess - the game, my

life so far can be traced back to a tale of '1001 blunders' – as the legendary Grandmaster Savielly Tartakower put it – 'a struggle against one's own errors'. And trust me when I say that I have made many, many mistakes. I will also maintain that I can't wait to make many new ones.

Wealth Management 101 Nikhil Kamath,2020-08-12 Money. 'Coined liberty' as Dostoevsky put it. 'Incarnate desire' as James Buchanan put it. Also one of the most fundamental misunderstandings in basic economics. We spend our whole lives being managed by money. We spend a great deal talking about it, worrying about it, often struggling to collect enough to meet our immediate needs. If we are one of the lucky ones to have a lot of money, we use it to buy our dream car, dream house, or set out on that dream vacation. Money is also considered to be a 'tool of power'. It can be used to fund a good cause or even a war. Some are willing to break laws, destroy families, wage battles, or even get married in exchange for it. Some go beyond their measure to empower themselves with individual creativity and drive good for others around them. Feed a hungry soul seeking food. Enlighten a hungry mind seeking knowledge. Is money good or bad? Or do we have it all wrong?
