THE TRUTH OF THE ORIGIN OF THE UNIVERSE Dr. Sabrie Soloman, 2024-08-01 The topic of undeserving credit given to the Big Bang and UFOs is a controversial one, with many people having strong opinions on the matter. While both the Big Bang theory and the existence of UFOs have been widely accepted, the author argues that they are given too much credit and recognition without sufficient evidence to support their claims. The Big Bang theory is widely accepted as the most plausible explanation for the origin of the universe. Some critics argue that it is not the only possible explanation for the universe's origins. Some alternative theories, such as the steady-state theory or the oscillating universe theory, have been proposed as alternatives to the Big Bang theory. Similarly, the existence of UFOs is a topic that has been hotly debated for decades. While there have been countless reports of UFO sightings and encounters, there is a lack of concrete evidence to support the existence of extraterrestrial visitors. While the Big Bang theory and UFOs may be popular topics in popular culture, it is important to approach them with a critical eye and to consider the evidence before giving them undeserving credit.

Storm on the Horizon Sylvia McKelvey, 2019-08-19 Is there a covert plan for humanity? Are we on the brink of discovery? Every day huge cumbersome radio telescopes around the world scan the farthest regions of space; listening, probing, waiting. Waiting for that one tone, that one ring, that one sound, that would set the world ablaze with unbridled excitement never before seen on this planet. We will have made contact with Extraterrestrials! Some say they are already here. Some say they have already made contact. Some say they have a plan. Is there a Mastermind behind them? Could Extraterrestrials be part of the largest deception ever to take place on this Earth? Some theorist say yes, and this may be how they do it.

THE TRUTH OF THE ORIGIN OF THE UNIVERSE Sabrie Soloman, 2024-06-12 In a world filled with scientific explanations and theories, it can be easy to lose sight of the ultimate truth of our existence. The truth is that the universe, with all its intricate complexities, did not come into being by mere chance or a random explosion. It was carefully designed and orchestrated by a higher power, a Creator who holds everything together. When we look up at the night sky and see the countless stars and galaxies stretching out into infinity, we cannot help but be in awe of the sheer magnitude and beauty of it all. The heavens declare the glory of God, as it says in the Bible, and remind us of the greatness of the one who made it all.

The theory of the Big Bang, which posits that the universe began as a singular point and expanded over billions of years, is a flawed explanation for the origin of the universe. It fails to account for the intricate design and order that we see in the cosmos, as well as the existence of life on earth. The marvel of our planet Earth, with its perfect conditions for sustaining life, points to a Creator who had a purpose and a plan in mind when he made it. The countless galaxies and stars that we observe in the universe are a testament to the power and creativity of God. They show us that we are part of a vast and wondrous creation, one that was made by an intelligent designer who had a vision for it all. The theory of evolution, put forth by Charles Darwin, is another flawed explanation for the diversity of life on earth. It fails to explain the intricate complexities of living organisms and their unique design, as well as the existence of the human soul. It is clear that we are not the product of blind chance or random mutations, but rather the handiwork of a loving and powerful Creator. "The truth of the origin of the universe" points to a Creator who holds everything together and has a purpose and a plan for it all. God stretches out the heavens and allows light to reach us here on earth, showing us his care and provision for his creation. We are not the product of random chance or blind evolution, but rather the cherished creation of a loving God who made us in his image. Let us never forget the marvel and wonder of the universe, and the greatness of the one who made it all.

The UFO Show Illinois State University. University Galleries, 2000 To say that UFOs have captured the popular imagination of contemporary America would be an understatement -- while appearances of blinking ellipsoids, whirling orbs, and have been reported throughout history, nowhere has the idea of contact with extraterrestrials taken hold so much as in the postwar United States. The UFO Show presents these phenomena in an unexpected way -- as inspiration and subject matter for contemporary visual art. Creating two- and three-dimensional work relating directly or symbolically to discs, saucers, and other images common to the subject of UFOs, 12 artists -- including Mariko Mori, Ionel Talpazan, Keith Haring, Panamarenko, Oliver Wasow, Claire Jervet, and Paul Laffoley -- confront, each in their own way, a historically ingrained and commercially reinforced locus of millennial obsession. Also included here are several provocative essays on the subject.
