The Quality of Literature Willie van Peer, 2008 Evaluation is central to literary studies and has led to an impressive list of publications on the status and history of the canon. Yet it is remarkable how little attention has been given to the role of textual properties in evaluative processes. Most of the chapters in *The Quality of Literature* redress this issue by dealing with texts or genres ranging from classical antiquity, via Renaissance to twentieth century. They provide a rich textual and historical panorama of how critical debate over literary quality has influenced our modes of thinking and feeling about literature, and how they continue to shape the current literary landscape. Four theoretical chapters reflect on the general state of literary evaluation while the introduction weaves the different threads together aiming at further conceptual clarification. This book thus contributes to a deeper understanding of the problems that are at the heart of past and present debates over literary quality.

Gnosis and Hermeticism from Antiquity to Modern Times R. van den Broek, Wouter J. Hanegraaff, 1998-01-01 This volume introduces what has sometimes been called the third component of western culture. It traces the historical development of those religious traditions which have rejected a world view based on the primacy of pure rationality or doctrinal faith, emphasizing instead the importance of inner enlightenment or gnosis: a revelatory experience which was typically believed to entail an encounter with one's true self as well as with the ground of being, God. The contributors to this book demonstrate this perspective as fundamental to a variety of interconnected traditions. In Antiquity, one finds the gnostics and hermetics; in the Middle Ages several Christian sects. The medieval Cathars can, to a certain extent, be considered part of the same tradition. Starting with the Italian humanist Renaissance, hermetic philosophy became of central importance to a new religious synthesis that can be referred to as Western Esotericism. The development of this tradition is described from Renaissance hermeticists and practitioners of spiritual alchemy to the emergence of Rosicrucianism and Christian theosophy in the seventeenth century, and from post-enlightenment aspects of Romanticism and occultism to the present-day New Age movement.
