

Aprender Ciencias En El Jardin De Infantes

Nora Ros

Aprender ciencias en el jardín de infantes, 2019 ¿Cómo acompañar a los niños y niñas del jardín de infantes en sus primeros pasos con las ciencias? ¿Por dónde comenzar? ¿Cómo planificar proyectos, secuencias y unidades que despierten la curiosidad y las ganas de explorar el mundo? ¿Cómo generar buenas preguntas y planificar investigaciones en la sala? En este libro las autoras nos invitan a pensar la enseñanza de las Ciencias Naturales en el nivel inicial como una aventura creativa y emocionante para los niños y también para las docentes. A través de un lenguaje sencillo y fluido, con relatos y experiencias de docentes de jardines de infantes en contextos diversos, cada capítulo combina ideas teóricas, propuestas de actividades, momentos de reflexión y ejemplos de la práctica. Pero además, en ese camino de renovar el trabajo de cada sala, nos proponen dar un paso más allá y construir un proyecto institucional en el que las Ciencias jueguen un rol fundamental en la experiencia educativa. --Contratapa.

Aprendizaje y desarrollo pleno Susana Mendive, Jaime Balladares, Pilar Cox, 2025-10-05 Hoy, el ejercicio docente enfrenta profundos desafíos derivados de los cambios culturales y de las nuevas perspectivas sobre el aprendizaje y el desarrollo. Desde estos enfoques contemporáneos, se invita a las y los educadores a potenciar las fortalezas individuales de cada niño y niña, promoviendo el desarrollo de habilidades cognitivas, sociales, emocionales y motivacionales, así como la construcción de una identidad positiva que les permita adaptarse y afrontar los retos de un mundo en constante transformación. En este contexto, académicas y académicos del Departamento de Aprendizaje y Desarrollo de la Facultad de Educación de la Pontificia Universidad Católica de Chile reúnen en esta obra un valioso aporte para la comunidad educativa nacional e hispanohablante. A lo largo de catorce capítulos, se presentan miradas integradoras desde la psicología educativa, la inclusión y la neurociencia, con el objetivo de articular teoría, evidencia y experiencia práctica. El libro recoge la trayectoria de sus autores como formadores de formadores, las vivencias de estudiantes de pedagogía durante su proceso de formación, y el trabajo colaborativo con docentes en ejercicio en el sistema escolar chileno. De esta manera, se ofrece a formadores, futuros docentes y profesionales en ejercicio una propuesta rigurosa y actualizada, con herramientas teóricas y prácticas para enfrentar los desafíos del aula con una mirada integral, contextualizada y transformadora.

Rutinas y rituales en la educación infantil Nora Ros, 2003

El cuaderno en la agenda didáctica del jardín de infantes María Renée Candia, 2022-11-01 María Renée Candia

desarrolla en esta obra múltiples miradas sobre el cuaderno como objeto escolar, como mapa, como testimonio y, principalmente, como un dispositivo didáctico que posibilita inscribir con autoría la lectura del mundo que realizan lxs niñxs en su travesía por el jardín. Se ofrece una amplia gama de textos gráficos verbales y no verbales para que dichos registros sean más ricos y a la vez potencien los procesos de alfabetización en sentido amplio. El cuaderno es un campo problemático atravesado por tensiones que llevan a encontrar las formas de uso que salvaguarden la identidad del Nivel Inicial, posicionándolo como parte de su agenda didáctica. Asimismo, en tanto documento escolar autorizado, deja registro o huellas de prácticas alfabetizadoras que son tomadas como objeto de análisis posibilitando adentrarse en el campo de la alfabetización en sentido estricto. Esta obra aporta, desde un minucioso estudio, a la comprensión de cómo las herencias pedagógicas formatean dichas prácticas.

El ojo ilustrado Elliot W. Eisner,1998 He aquí el primer libro dedicado a construir sistemáticamente, en el campo de la educación, una metodología para la investigación de ideas propias de las artes y las humanidades. El ojo ilustrado, así, forma parte del creciente interés por la investigación y la evaluación cualitativas, pero, a diferencia de muchas obras publicadas en ese sentido, deriva sus conceptos clave del trabajo de artistas y críticos de arte. De este modo, conocimiento, el arte de la percepción, y crítica, el arte de la divulgación, son las principales ideas conceptuales en torno a las cuales se desarrolla dicha metodología. Y el libro acaba estimulando no sólo a considerar la investigación y la evaluación como vías para describir relaciones y valorar sus circunstancias, sino, lo que es más importante, como un camino para mejorar la práctica educativa.
