Islam and Muslims in Australia Jan A Ali, 2020-12-01 Islam has long been a part of the multicultural landscape of major urban centres in Australia and encompasses a great diversity of theological, jurisprudential and cultural practices. Despite this, in popular discourse, media presentations, and political debates Muslims are represented as a homogeneous group. This timely book examines the growing presence of Islam and Muslims in Australia and how it is transforming, and transformed by, social, cultural and religious spaces. Employing critical analysis and macrosociology, *Islam and Muslims in Australia* provides valuable insights into this growth and development and illuminates how socio-cultural, economic, and political processes maintain and manage the ways Australian Muslims build their religious lives and identities and engage in the wider world, while facing the inevitable effects of modernity. This book argues that Islam in different parts of the world as well as in Australia is more than just a religion, a cultural system or a social structure, but is a complex composite of diverse institutional processes and functions, social routines and norms, and sacred rituals and practices responsible for shaping the lives of Muslims. This volume focuses on five broad areas of sociological analysis namely Muslim settlement, Muslim integration, shari'ah, Muslim education, and global terrorism.

Fair Trade for Teachers James Anthony Keevy, Jonathan Jansen, Jonathan D. Jansen, 2010 International teacher migration poses a wide range of challenges to the recognition and transferability of teacher qualifications across borders. This study aims to enhance recognition of teacher qualifications across borders and between the member countries of the Commonwealth.

So You Want to Be a Teacher? Phil Ridden, Tracey Gray, 2013-01-01 *So You Want to Be a Teacher?* is an Australian guide designed to assist current and prospective teaching students in making the right decision about their future career. The book explores: Why you might want to be a teacher & why you might not The personal qualities required, so that you can consider whether you fit the profile What teachers actually do, the pay and the conditions How you will train to be a teacher The many options a teaching qualification offers and areas of specialisation The professional teaching standards within a national curriculum framework Throughout the book, the realities of teaching across all educational sectors are encapsulated through the voices of successful teachers - many of whom are finalists in the National Excellence in Teaching Awards. In addition, the account of one teacher's journey from struggling student to educational leader provides an inspirational tale. Fully

referenced, with an appendix listing teaching courses throughout each state and territory, *So You Want to Be a Teacher?* will ensure that if you do pursue a career in teaching, it will be with true conviction and the passion to thrive.

Humanizing Grief in Higher Education Nicole Sieben, Stephanie Shelton, 2021-03-29 By showcasing asset-based approaches inspired by individual reflection, research, and experience, this volume offers a fresh and timely perspective on grief and trauma within higher education and illustrates how these approaches can serve as opportunities for hope and allyship. Featuring a broad range of contributions from scholars and professionals involved in educational research and academia, *Humanizing Grief in Higher Education* explores the varied ways in which students, scholars, and educators experience and navigate grief and trauma. Set into four distinct parts, chapters deploy personal narratives situated within interdisciplinary and transdisciplinary research frameworks to illustrate how issues such as race, gender, socio-economic class, and politics intersect with experiences of personal and professional grief in the academy. A variety of intersectional fields of study – from positive psychology, counselling, feminist and queer theories, to trauma theory and disability studies – inform an interdisciplinary framework for processing traumatic experiences and finding ways to hope. These narrative explorations are positioned as key to developing a sense of hope amongst the grieving and those supporting them. This text will benefit researchers, doctoral students, and academics in the fields of Higher Education, teacher education, trauma studies, and mental health education. Those interested in positive and educational psychology, as well as grief counselling in adults, will also enjoy this volume. Finally, this collection serves as a companion for those who find themselves grappling with losses, broadly defined.

Career Pathways Elaine Makas Howard, Elaine Makas, Pamela J. Ill, 2004 Howard and Ill have given educators a stunning encyclopedic handbook on career pathways. Loaded with helpful lists and charts, and written in a clear, conversational tone, *Career Pathways* is the new indispensable resource for superintendents, principals, counselors, and teachers. Elaine Johnson, Honorary Fellow Huron College *Career Pathways* is the most comprehensive curriculum approach to achieving the dual goal

of academic and career maturity. High school educators who seek to promote not just college admissions but college success should consider the career pathways approach. Kenneth Gray, Professor Penn State University Just imagine all students in your high school taking ownership of their own learning! This is exactly what happens in a student-centered Pathways High School. Instructionally based, the Collaborative Career Pathways approach is to help all students add relevancy to their school work by preparing for the future. Collaborative Pathway High Schools allow students to self manage and problem-solve to better prepare for their future. This excellent resource brings together three crucial pillars: the classroom, the community, and the counseling processes that are found in all high schools. Students begin this process by learning about their aptitudes, skills, and interests and then selecting one of several broad career paths (such as Human Services or Science and Industry). Students experience ongoing goal-setting and decision making. Through the classroom, community, and counseling processes, your students will be able to design and implement a plan that is just right them. This is what student-centered learning is all about! Classroom processes remain the key to student-centered and self-directed learning. Integration occurs naturally as students have the opportunity to participate in integrated learning units that include the four core subject areas, technology, and one or two electives that all align to state and national standards and benchmarks. Community opportunities begin with guest speakers, chat partners, and field trip visits and then progress to job shadowing, internships, mentorships, and senior capstone projects. Counseling becomes a key component for students in the areas of academic, career, and social and personal skill development. Ample opportunities abound for role modeling and practice in teaming, problem solving, conflict resolution, character development, self-management, goal setting, and decision making. By employing the Career Pathways model, your school can add relevancy to what students learn and do during their high school years. Help students be more focused and team-oriented, and the true drivers of their own learning!
