Qualitytime-Esl Marianne Raynaud, 2009 Learning another language can often be a challenging task. Teacher and author Marianne Raynaud has developed an intensive program to aid teachers and students with materials that really work. Filled with unique and motivating activities, the ideas presented will help all teachers of foreign languages to assist their students to effectively and efficiently learn a new language. With more than twenty-four years of experience teaching, Raynaud details her philosophy and the techniques she has developed. The text is accompanied by a Digital Document Annex that includes more than 1,500 ready-to-use teaching materials focusing on listening, comprehension, grammar, vocabulary, and translations. The annex also contains PowerPoint presentations, audio recordings, short videos, and examples of student work. Chapters provide information about: Incorporating teamwork Establishing a core curriculum Individualizing teaching Helping students enjoy labs Writing exercises that correspond to student needs Providing a challenging workload Intended to help teachers establish a successful program, *QualityTime-ESL: The Digital Resource Book* provides an extensive toolbox of teaching materials from which teachers can freely choose and then adapt. This detailed guide will help teachers to create a dynamic learning course to further the teaching of English.

The Routledge Handbook of World Englishes Andy Kirkpatrick, 2020-12-31 The Routledge Handbook of World Englishes constitutes a comprehensive introduction to the study of World Englishes. Split into six sections with 40 contributions, this Handbook discusses how English is operating in a wide range of fields from business to popular culture and from education to new literatures in English and its increasing role as an international lingua franca. Bringing together more than 40 of the world's leading scholars in World Englishes, the sections cover historical perspectives, regional varieties of English from across the world, recent and emerging trends and the pedagogical implications and the future of Englishes. The Handbook provides a thorough and updated overview of the field, taking into account the new directions in which the discipline is heading. This second edition includes up-to-date descriptions of a wide range of varieties of English and how these reflect the cultures of their new users, including new chapters on varieties in Bangladesh, Uganda, the Maldives and South Africa, as well as covering hot topics such as translanguaging and English after Brexit. With a new substantial introduction from the editor, the Handbook is an ideal resource for students of applied linguistics, as well as those in related degrees such as applied English language and TESOL/TEFL.

Identity and Diversity on the International Bench Freya Baetens, 2020 A distinctive feature of modern international society is the increase in the number of international judicial bodies and dispute settlement and implementation control bodies; in their case-loads; and in the range and importance of the issues they are called upon to address. These factors reflect a new stage in the delivery of international justice. The International Courts and Tribunals series has been established to encourage the publication of independent and scholarly works which address, in critical and analytical fashion, the legal and policy aspects of the functioning of international courts and tribunals, including their institutional, substantive, and procedural aspects. Book jacket.

Minority Accommodation through Territorial and Non-Territorial Autonomy Tove H. Malloy, Francesco Palermo, 2015-10-08 Minority Accommodation through Territorial and Non-Territorial Autonomy explores the relationship between minority, territory, and autonomy, and how it informs our understanding of non-territorial autonomy (NTA) as a strategy for accommodating ethno-cultural diversity in modern societies. While territorial autonomy (TA) is defined by a claim to a certain territory, NTA does not assume that it is derived from any particular right to territory, allocated to groups that are dispersed among the majority while belonging to a certain self-identified notion of group identity. In seeking to understand the value of NTA as a public policy tool for social cohesion, this volume critically dissects the autonomy arrangements of both NTA and TA, and through a conceptual analysis and case-study examination of the two models, rethinks the viability of autonomy arrangements as institutions of diversity management. This is the second volume in a five-part series exploring the protection and representation of minorities through non-territorial means, examining this paradox within law and international relations with specific attention to non-territorial autonomy (NTA).

The World in 2050 Laurence C. Smith, 2011-10-25 “A compelling portrait of the future and vividly relates the big challenges facing the world now.”—Jared Diamond, New York Times bestselling author of *Collapse* and *Guns, Germs, and Steel* The world's population is exploding, wild species are vanishing, and our environment is degrading. What kind of world are we leaving for our children and grandchildren? Just who will flourish—and who will fail—in our evolving world? Combining the lessons of geography and history with state-of-the-art model projections and analytical data, Guggenheim fellow Laurence C. Smith predicts how the eight nations of the Arctic Rim (including the United States) will become increasingly powerful while the nations around the equator struggle for survival. Like Bjorn Lomborg's *The Skeptical Environmentalist*, *The World in 2050* is as credible as it is controversial, projecting the looming benefits as well as the problems of climate change.

The New North Laurence Smith, 2011-03-24 The New North is a book that turns the world literally upside down.

Analysing four key 'megatrends' - population growth and migration, natural resource demand, climate change and globalisation - UCLA professor Larry Smith projects a world that by mid-century will have shifted its political and economic axes radically to the north. The beneficiaries of this new order, based on a bonanza of oil, natural gas, minerals and plentiful water will be the Arctic regions of Russia, Alaska and Canada, and Scandinavia. Meanwhile countries closer to the equator will face water shortages, aging populations, crowded megacities and coastal flooding. Smith draws on geography, economics, history, earth and climate science, but what makes his arguments so compelling is that he has spent many months exploring the region, talking to people in once-inaccessible Arctic towns, noting their economies, politics and stories.
