The SAGE Encyclopedia of Journalism Gregory A. Borchard, 2022-02-22 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

*Religion, Politics, Media in the Broadband Era* Alice Bach, 2004 Religion has gone public; and the much-discussed political pendulum has been swinging widely in its effort to keep up with the eruptions of faith swelling the broadband. Private faith finds very public outlets through the media's appetite for voices and choices. Faith-based networks have become media-savvy, urging their members to send barrages of emails, faxes, telephone calls, letters of praise or outrage to politicians. Those same politicians return the volley, using the broadcast media with great skill, wooing the faithful,

convincing the cynical that God is on their side. Only a deity could be on so many sides simultaneously. Alice Bach's new book reflects her long-time focus on the Bible, religion and culture. Popular religion is expressed within our culture in rock videos, televangelism, political rhetoric, children's books, films and animations. Every sort of media from print to electronic to broadband is imbued with subtle and blatant religious imagery. The media are new; the message is not. The tightly woven pattern of religion, politics and media has been part of the American fabric since the country was founded. When one examines this cultural cloth, threads of varying colours are revealed, threads whose twists reflect both media coverage of religion and religious views of the media.

Reading and the Reference Librarian Juris Dilevko, Lisa Gottlieb, 2014-10-16 Reference librarians are no longer expected to know much about the information they find; they are merely expected to find it. Technological competency rather than knowledge has become the order of the day. In many respects, reference service has become a matter of typing search terms into a library's online catalog or a web search engine and providing the patron with the results of the search. Calling for a re-intellectualization of reference librarianship, this book suggests another approach to providing quality reference service--reading. The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits. From the 950 responses, the authors present findings about the extent to which librarians read newspapers, periodicals, fiction and nonfiction, and recount and analyze stories about how reading has made them better librarians. The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide-ranging, subject-based knowledge as opposed to the type of process-based, functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs.

**Bestseller** Robert McParland, 2018-12-15 Whether curled up on a sofa with a good mystery, lounging by the pool with a steamy romance, or brooding over a classic novel, Americans love to read. Despite the distractions of modern living, nothing quite satisfies many individuals more than a really good book. And regardless of how one accesses that book—through a tablet, a smart phone, or a good, old-fashioned hardcover—those choices have been tallied for decades. In *Bestseller: A Century of America's Favorite Books*, Robert McParland looks at the reading tastes of a nation—from the beginning of the twentieth century to the present day. Through extensive research, McParland provides context for the literature that appealed to the masses, from low-brow potboilers like *Forever Amber* to Pulitzer-Prize winners such as *To Kill a Mockingbird*. Decade by decade, McParland discusses the books that resonated with the American public and shows how current events and popular culture shaped the reading habits of millions. Profiles of authors with frequent appearances—from Ernest Hemingway to Danielle Steel—are included, along with standout titles that readers return to year after year. A snapshot of America and its love of reading through the decades, this volume informs and entertains while also providing a handy

reference of the country's most popular books. For those wanting to learn more about the history of American culture through its reading habits, Bestseller: A Century of America's Favorite Books is a must-read.

**Steps to College Reading** Dorothy U. Seyler, 2001 The first in a two-book developmental reading series, Steps emphasizes the idea of reading as a three-step process in a prepare-read-respond strategy, stressing the importance of pre-reading preparing to read. This book offers more assistance to students with the pre-reading step than other texts. Steps reinforces the prepare step with pre-reading questions prior to each reading selection. Reading passages cover a broad range of topics that will interest students and be relevant to their college work. Chapters contain numerous short pieces for illustration and practice and move to longer pieces for more sustained reading. However, because the book is designed for

the more basic course, the readings are always of a manageable length for students. Steps differs from its more advanced companion text, *The Reading Context*, by providing shorter and simpler explanations of key concepts; by using more visuals to accommodate alternate learning styles; by providing more vocabulary work; by covering reading rates; and by using simpler readings. In addition, Steps offers more help with reading textbook material and provides full chapters on understanding the difference between specific and general statements, understanding implied ideas, reading graphics, and responding to expressive and persuasive writing.
