Women Representation in Governance in Nigeria Prof. Abubakar O. Sulaiman,2025-06-16 Despite accounting for 49.47% of the Nigerian population, progress towards gender equity and women's empowerment in Nigeria has remained low, in contrast to the Sustainable Development Goals (SDG Target 5.5). In light of this, NILDS, under the leadership of Prof. Abubakar O. Sulaiman and with support from the management of the National Assembly, is creating a platform for intellectual discourse and engagements on women socio-economic and political empowerment. The NILDS International Conference on Women in Governance provided a platform for experts, government officials, policymakers, and other relevant stakeholder across Africa, to discuss the challenges that women face in political participation and governance in Nigeria and Africa at large. This ultimately led to this evidence-based scientific reader that contributes to the corpus of literature in Africa.

Infrastructure Development in Nigeria Michael O. Onolememen,2020-01-22 This book examines the politics and economics of infrastructure development in Nigeria from Independence in 1960 up to 2015, and the role of good governance in promoting the socioeconomic wellbeing of citizens. Arguing for the need for transformational leadership in infrastructure development, the chapters examine policy issues and survey the various administrative, economic, and social-political reforms that have impacted infrastructure development in Nigeria. The author also discusses current national development

plans and Vision 20:2020; challenges to infrastructure development, including corruption; and the future potential of a strong infrastructure network for the economy and citizens. Drawing upon his experience within government departments, as well as existing models of leadership and governance, the author explores the role of infrastructure development in promoting the wellbeing and growth of Nigeria. Combining theory with practical examples of good governance, this book will be of interest for students and researchers of political science and infrastructure development in Africa.

Governance in Nigeria post-1999: Revisiting the democratic 'new dawn' of the Fourth Republic Edited by Romola Adeola & Ademola Oluborode Jegede,2020-03-06 At the start of Nigeria's Fourth Republic on 29 May 1999, there was great optimism as to the emergence of a new democratic future representing a significant break from the political undulations of the past. Social Work, Social Welfare, and Social Development in Nigeria Mel Gray,Solomon Amadasun,2023-05-23 This groundbreaking book provides a comprehensive account of social work, social welfare, and social development in Nigeria from a postcolonial perspective. It examines the historical development of social work and social welfare and the colonial legacies affecting contemporary social welfare provision, development planning, social work practice, and social work education. Against this historical backdrop, it seeks to understand the position of social work within Nigeria's minimalist structure of welfare provision and the reasons why social work struggles for legitimacy and recognition today. It covers contexts of social work practice, including child welfare, juvenile justice, disabilities, mental health, and ageing, as well as areas of development-related problems and humanitarian assistance as new areas of practice for social workers, including internally displaced and trafficked people, and their impact on women and children. It seeks to understand Nigeria's ethnoreligious diversity and indigenous cultural heritage to inform culturally appropriate social work practice. This book offers a global audience insight into Nigeria's developmental issues and problems and a local audience – social science and human service researchers, educators, practitioners, students, and policymakers - a glimpse of what's possible when people work together toward a common goal. It will be of interest to all scholars and students of social work, development studies and social policy.

Open Access to Knowledge in Nigeria Kunle Ola,2018-10-17 This book provides an analysis of the legal and policy dimensions of open access to research, education and public sector information with a focus on Nigeria. Kunle shows how

open access has evolved across the world and how such initiatives could be implemented in Nigeria and other countries in the developing world. The author argues for a platform where Nigerians are able to freely connect to the 'global library', through the open access dual platforms of self-archiving and open access publishing, thereby providing access to knowledge. The importance of connecting local works to the 'global library' to increase visibility and impact of such works is also underscored. This book furthers our understanding of open educational resources as alternative avenues to accessing education and seeks to foster citizenry participation, good governance, accountability, democratic values and spur creativity and innovation through open governance and access to public sector information. Providing a framework for open access in developing countries, Open Access to Knowledge in Nigeria is an important read for scholars interested in knowledge production in Africa, development of the knowledge economy and the open access and Access to Knowledge movements.

Routledge Handbook of Human Rights and Climate Governance Sébastien Duyck, Sébastien Jodoin, Alyssa Johl, 2018-02-15 Over the last decade, the world has increasingly grappled with the complex linkages emerging between efforts to combat climate change and to protect human rights around the world. The Paris Climate Agreement adopted in December 2015 recognized the necessity for governments to take into consideration their human rights obligations when taking climate action. However, important gaps remain in understanding how human rights can be used in practice to develop and implement effective and equitable solutions to climate change at multiple levels of governance. This book brings together leading scholars and practitioners to offer a timely and comprehensive analysis of the opportunities and challenges for integrating human rights in diverse areas and forms of global climate governance. The first half of the book explores how human rights principles and obligations can be used to reconceive climate governance and shape responses to particular aspects of climate change. The second half of the book identifies lessons in the integration of human rights in climate

advocacy and governance and sets out future directions in this burgeoning domain. Featuring a diverse range of contributors and case studies, this Handbook will be an essential resource for students, scholars, practitioners and policy makers with an interest in climate law and governance, human rights and international environmental law.

Nigeria and the Nation-State John Campbell, 2024-08-13 Nigeria, despite being the African country of greatest strategic importance to the U.S., remains poorly understood. John Campbell explains why Nigeria is so important to understand in a world of jihadi extremism, corruption, oil conflict, and communal violence. The revised edition provides updates through the recent presidential election.

Human Rights in Nigeria's External Relations Philip Aka, 2016-12-20 This book is a broad-ranging argument for thorough reforms at home and abroad in Nigeria as the only antidote to the nation-building dilemmas Nigeria confronts in the first quarter of the twenty-first century. Because of its enormous material and human endowments, Nigeria is dubbed the "Giant of Africa." It is a moniker many of its leaders take seriously. Yet, Nigeria is a state rife with instability, some of it periodically erupting into violence. Given still-ongoing national security challenges in the land that notoriously includes a bloody religion-oriented terrorism, the Fourth Republic since 1999, the longest period of continuous democratic rule since independence—key to the timeline of this book—has not been insulated from the spell of instability. The main argument of this work is that internationally agreed-upon ethical standards embedded in human rights can save Nigeria. This book is a methodologically and theoretically-grounded, seminal discourse on Nigerian foreign relations that spells out the human rights or lack thereof in those relations, including underlying and impinging domestic forces. This work is set around six issues of application embedded in a temple of Nigeria's human rights foreign policy, comprising two steps and four pillars: reconstructed national interest, increased human rights at home, redesigned peacekeeping, reshaped foreign policy machinery, increased bilateralism in foreign relations, and the use of ECOWAS as human rights tool. Although focused on the period since independence, for proper understanding of events from the past that shape the current patterns of politics in the land, this book also embodies a historical background chapter that overviews the pre-colonial and colonial eras.

Dialogue on Citizenship in Nigeria Joseph H. P. Golwa, 2008 The ten chapters in the book are largely invited presentations by leading social scientist and activists in the field during the dialogue sessions organized by the institute to mobilise the support of the stakeholders' appropriate responses to the problem, as part of a larger programme that included studies of constitutional history and institutional response to the management of citizenship related phenomena in Nigeria as well as a cross cultural comparison of the management of the issue. Altogether, the book makes a strong case for continued research and advocacy in the area and the ideas contained herein, provides some useful guide in that direction.

Corruption and Nigeria's External Image, 1999-2007 Oluwasola Abiola,2020-05-06 Bachelor Thesis from the year 2019 in the subject Politics - Region: Africa, grade: 3.0, , course: International Relations, language: English, abstract: In Nigeria, corruption is one of the many unresolved problems that have robbed the nation of development. It remains a long-term major political and economic challenge for Nigeria. According to Alabi and Fashagba, Nigeria's search for enduring socio-economic, political and technological development as well as efficient and productive utilization of allocated have been undermined by pervasive corrupt practices in the polity. One cannot talk about Nigeria and neglect the reality of corruption in the country, and this is why the administration of Olusegun Obasanjo (1999 and 2007) gained unprecedented global attention on account of its unenviable record of corruption, especially in the political circles of the country. This is not to suggest that corruption in the country started with the Obasanjo administration in 1999, rather it is to emphasize how intensified corruption cases have been since the beginning of the Fourth Republic. The level of corruption in the country is very high, and its effects on the external image of the country is nothing closed to positive. The Nigerian state is a state dominated by the forces of corruption, especially the corrupt elites who has turned the resources of the Nigerian state into what is now popularly referred to as the "national cake" which they share as they like among themselves at the detriment of the masses, this further confirms the words of Ogbewere that corruption is a clog in the wheel of progress in Nigeria and has incessantly frustrated the realization of noble national goals, despite the enormous natural and human resources in Nigeria. The political elites ever since independence of the Nigerian state have not stopped to enrich their own personal pockets with the country's luxuries while hiding under the façade of fighting corruption in their respective political offices. This further explains why the Nigerian elites have so much interest in the political affairs of the state and in some way have turned it into a business venture rather than a serving avenue. The much reason Remi Chukwudi Okeke and Adeline Nnenna Idike made it known that indeed, in very simple and clear terms, the monumental enumerations indict the Nigerian elite in its generic connotations. It typifies the scenario of elites establishing an inverse relationship between the institutionalization of a state and its usefulness.
