*Romantic Conventions* Anne K. Kaler, 1999 Finding that romance novels are an important literary genre not only because they comprise nearly half of paperback fiction sold, but also because they employ sympathetic values and identifiable conventions, critics present 12 studies analyzing a selection of specific conventions, patterns, themes, and images and trace them back to origins in folktales or fairy tales and back again to the latest adaptations available in the supermarkets. Cinderella, a Casebook Alan Dundes, 1988 Covering a period of more than one hundred years of work by renowned folklorists, these enlightening essays explore the timeless tale of Cinderella. In addition to the most famous versions of the story (Basile's Pentamerone, Perrault's Cendrillon, and the Grimm's Aschenputtel), this casebook includes articles on other versions of the tale from Russian, English, Chinese, Greek and French folklore. The volume concludes with several interpretive essays, including a psychoanalytic view from Dundes and a critique of the popularization of Cinderella in America. Folklorists, scholars of children's literature, and feminists should appreciate particularly the wide scope of this collection . . . now in paperback with an updated Bibliographical Addendum. . . . Most helpful are the two-page introductions to each variant and to each essay which include a brief overview of the historical times as well as suggested additional sources for more discussion.--Danny Rochman, *Folklore Forum* A milestone, a near complete source of primary and secondary materials. . . . The selected analytical writing include definitive classic and new discoveries, covering the whole

range of methodological modes and theoretical perspectives from early forms and typology to myth-ritual, social-historical, anthropological, and psychoanalytical readings. The annotated bibliography is most helpful, illuminating, and comprehensive, encompassing publications in other Western languages and works by Asianists.--Chieko Mulhern, *Asian Folklore Studies* One can imagine several dimensions on which psychoanalysts might find such a collection interesting: as examples of applied psychoanalysis, in relation to philosophical and cultural examination of imaginative material, in relation to child development, and in the correlations between folktales of a particular culture and individual histories.--Kerry Kelly Novick, *Psychoanalytic Quarterly*

**Complex Text Decoded** Kathy T. Glass, 2015-09-01 In *Complex Text Decoded*, educational consultant and former master teacher Kathy T. Glass presents strategies, activities, and assessments that target students' ability to comprehend complex text—whether presented as traditional written text or in multimedia formats—in grades 5–10. You'll learn \* The essential elements of unit design and models for lesson planning. \* Specific, step-by-step instruction for teaching vocabulary. \* Effective questioning techniques. \* Strategies and activities explicitly designed for teaching complex text. \* How to measure text complexity and select appropriate texts that are aligned with curricular goals. It's important to provide opportunities for students to read a wide variety of texts for different purposes and along a spectrum of difficulty and length. To meet the goal of comprehensively grasping complex text, students must have concrete tools to help them become highly skilled readers. *Complex Text Decoded* enables teachers to provide precisely that.

*Writing the Materialities of the Past* Sam Griffiths, 2021-06-14 *Writing the Materialities of the Past* offers a close analysis of how the materiality of the built environment has been repressed in historical thinking since the 1950s. Author Sam Griffiths argues that the social theory of cities in this period was characterised by the dominance of socio-economic and linguistic-cultural models, which served to impede our understanding of time-space relationality towards historical events and their narration. The book engages with studies of historical writing to discuss materiality in the built environment as a form of literary practice to express marginalised dimensions of social experience in a range of historical contexts. It then moves on to reflect on England's nineteenth-century industrialization from an architectural topographical perspective, challenging theories of space and architecture to examine the complex role of industrial cities in mediating social changes in the practice of everyday life. By demonstrating how the authenticity of historical accounts rests on materially emplaced narratives, Griffiths makes the case for the emancipatory possibilities of historical writing. He calls for a re-evaluation of historical epistemology as a primarily socio-scientific or literary enquiry and instead proposes a specifically architectural time-space figuration of historical events to rethink and refresh the relationship of the urban past to its present and future. Written for postgraduate students, researchers and academics in architectural theory and urban studies, Griffiths draws on the space syntax tradition of research to explore how contingencies of movement and encounter construct the historical

imagination.
