Plato is my friend - Aristotle is my friend - but my greatest friend is truth. Truth is ever to be found in simplicity, and not in the multiplicity and confusion of things. What we know is a drop, what we don't know is an ocean. 'Tis much better to do a little with certainty & leave the rest for others that come after than to explain all things by conjecture without making sure of any thing. Quotes... Turning Points in Natural Theology from Bacon to Darwin S. Peterfreund,2012-08-20 Discusses crucial moments in the historical development of natural theology in England from the time of Francis Bacon to that of Charles Darwin. Economics as an Empirical Social Science Daniel Weißbrodt, 2024-07-08 Economics still adheres entirely unreflectively to a mechanistic worldview and machine thinking. Epistemologically, it thus remains in the 19th century, and its assumptions and theories, methods, and models therefore stand in stark contradiction to the findings of all other social and natural sciences as well as a multitude of empirical facts. Through a discourse-analytical examination of sixteen basic concepts in economics, based on twelve standard economics textbooks, their ideahistorical origin and use are worked out and compared and related to the current state of knowledge of other disciplines. This reveals the structural, methodological, and content errors of economics in a clear manner. Especially for critical students, who have long been demanding an economics that is in line with the current state of research and faces the challenges of the 21st century, this opens up the possibility of a new approach to economics. The Content Discourse-analytical examination of fundamental assumptions and concepts of economics from labor to wealth Structural, methodological, and content critique of economic thinking from an epistemological perspective Critical examination of the use of empirical and statistical data, the method of gaining knowledge, and the model thinking in economics
