**Discovering Computers 98** Gary B. Shelly,1998 With this latest edition, Shelly and Cashman have successfully blended coverage of the latest technology with core computer concepts to make learning about computers interesting and easy. This text provides the most current computer information available. Includes a dedicated Web site that underscores the importance of the World Wide Web.

Discovering the Universe William J. Kaufmann,Neil F. Comins,2008-12-26 Discovering the Universe: From the Stars to the Planets engages students with an inquiry-based exploration of the universe and the scientific process. Developed with a “big picture” approach, the text first explains how the stars, the galaxies, and the entire universe formed, and then discusses planets and other components of our solar system. Students follow this natural conceptual progression within a proven learning method designed to address misconceptions and build a deep understanding of science and the world around us.

*Understanding and Creating Art* Robert J. Saunders,Earl W. Saunders,1986 The authors selected fifteen works from each of two textbooks for inclusion in a slide program. This supplemental resource book for teachers offers helpful teaching suggestions for each slide, along with correlated activities to help students understand and create art.

**Flora's Fieldworkers** Ann Shteir,2022-08-09 When Catharine Parr Traill came to Upper Canada in 1832 as a settler from England, she brought along with her ties to British botanical culture. Nonetheless, when she arrived she encountered a new natural landscape and, like other women chronicled in this book, set out to advance the botanical knowledge of the time from the Canadian field. Flora’s Fieldworkers employs biography, botanical data, herbaria specimens, archival sources, letters, institutional records, book history, and abundant artwork to reconstruct the ways in which women studied and understood plants in the nineteenth century. It features figures ranging from elite women involved in imperial botanical projects in British North America to settler-colonial women in Ontario and Australia – most of whom were scarcely visible in the historical record – who were active in “plant work” as collectors, writers, artists, craft workers, teachers, and organizers. Understood as an appropriate pastime for genteel ladies, botany offered women pathways to scientific education, financial autonomy, and self-expression. The call for more diverse voices in the present must look to the past as well. Bringing botany to historians and historians to botany, Flora’s Fieldworkers gathers compelling material about women in colonial and imperial Canada and Australia to take a new look at how we came to know what we know about plants.
