Proceedings of the Worldwide Music Conference 2021 Ildar D. Khannanov, Roman Ruditsa, 2021-04-12 This book presents sixteen chapters in Volume 1. This Volume I of the Proceedings of the Worldwide Music Conference 2021 offers a smorgasbord of scientific approaches to music. The congress is one of a kind; it is dedicated not to a specific field but to the interdisciplinary developments and the interaction with the representatives from actual scientific disciplines. The languages of mathematics, computer science, semiotics, palaeography, and medicine are in the mix; geography of the studies is also impressive—Greece, Mexico, China, Russia, India, Poland, and USA, to name just a few. The purpose of such juxtaposition is to see how the terminology, categorical apparatus, and interpretations of music vary from science to science and how this can enrich the terminology of music theory. They cover a wide range of topics that the editors divided into four subfields: music in interdisciplinary contexts, music and current technology, musical instruments and voice, and music pedagogy and medicine. The opening section of the Proceedings is thus dedicated to the idea of interdisciplinarity, relationship of creator of theory of harmony Rameau to sciences of his time, the idea of number in music, co-creation, and the category of musical network. Three more chapters here deal with Russian palaeography, Indian musical genre, and the idea of musical semiotics. It is a kind of opening statement from music theorists. Part two, music and current technology, united three chapters, on “zero gravity” concept in modern music, discussion of scales as mathematical networks, and the innovation in digital music making, transforming it from stationary to mobile applications. The third part, musical instruments and voice, is of special interest because it is in the study of the instruments, the design, acoustic characteristics, and tuning, and sciences have cooperated with music theory for centuries. In addition to instruments, one chapter here is dedicated to voice. The last part, musical pedagogy and medicine, takes the reader even further into the interdisciplinary domain. The Proceedings is written in standard English language, prepared for the pleasure of reading of wide circles of professionals in different fields. The purpose of the editors is to bring this rather diverse set of texts into the context of a fruitful dialogue.

Musica, chitarra e... Corso di chitarra acustica ed elettrica e di teoria musicale Marco Passerini, 2008 Un metodo innovativo nel panorama dei corsi pratici per chitarra: partendo dal presupposto della stretta connessione tra l'abilità tecnica e una buona conoscenza della teoria musicale, questo libro guida lo studente lungo un percorso formativo completo e

stimolante. I vari argomenti correlati e necessari per orientarsi nel mondo della musica vengono esposti in una continua alternanza: teoria musicale necessaria per la lettura, la comprensione e l'interpretazione di spartiti e tablature e per la completa padronanza delle tecniche di costruzione degli accordi, delle scale e delle loro armonizzazioni; esercizi di carattere generale per il coordinamento e il rafforzamento delle dita; tecniche di fingerpicking, crosspicking, stumming, per chitarra acustica ed elettrica; esercizi specifici per praticare in modo immediato le tecniche presentate; porzioni di partiture di brani famosi per consentire una immediata soddisfazione dopo la fatica degli esercizi; spunti di psicologia della percezione musicale; curiosità e aneddoti legati alla musica; tecniche di set-up dello strumento (acustico ed elettrico). Le tecniche, gli accordi e le scale sono corredati di una spiegazione rigorosa, per evitare allo studente la mera memorizzazione di schemi fissi - problema comune alla maggior parte dei corsi di chitarra - e consentire la comprensione delle ragioni che si celano dietro a quelli che potrebbero altrimenti sembrare gli esiti di formule rigide e predefinite.

Galileo Galilei, The Tuscan Artist Pietro Greco, 2018-04-19 This book is a distinctively original biography of Galileo Galilei, probably the last eclectic genius of the Italian Renaissance, who was not only one of the greatest scientists ever, but also a philosopher, a theologian, and a man of great literary, musical, and artistic talent - "The Tuscan Artist", as the poet John Milton referred to him. Galileo was exceptional in simultaneously excelling in the Arts, Science, Philosophy, and Theology. These diverse aspects of his life were closely intertwined; indeed, it may be said that he personally demonstrated that human culture is not divisible, but rather one, with a thousand shades. Galileo also represented the bridge between two historical epochs. As the philosopher Tommaso Campanella, a contemporary of Galileo, recognized at the time, Galileo was responsible for ushering in a new age, the Modern Age. This book, which is exceptional in the completeness of its coverage, explores all aspects of the life of Galileo, as a Tuscan artist and giant of the Renaissance, in a stimulating and reader-friendly way.

Storia della musica dall'antichità classica al Novecento Claudio Casini, 2022-06-08 In un affascinante viaggio lungo la storia dell'umanità, Claudio Casini ci guida alla scoperta delle tappe decisive attraverso le quali la musica ha cambiato di volta in volta forma, sostanza e ruolo. In origine ancella anonima ma necessaria della parola, la musica ha guadagnato autonomia per svilupparsi ed evolvere in un caleidoscopio di generi e di personalità. Dalla sua funzione nella società greca, al canto gregoriano, dai madrigali del Rinascimento all'epoca barocca, dalla nascita dell'opera allo stile classico, al romanticismo, alle nuove strade percorse nel secolo scorso, l'autore illumina in modo magistrale gli autori e le zone fondamentali di passaggio, svelando la vita che esiste oltre i pentagrammi. Per la prima volta in unico volume e aggiornata con una postfazione dedicata alla contemporaneità, questa raccolta di avvincenti racconti di avventura legge la musica come un'arte capace di esprimere le nostre passioni, anche le più segrete, e di farsi testimone della nostra vita sociale e delle sue trasformazioni.

Sound Work Jonathan Impett, 2021-12-15 The practices and perception of music creation have evolved with the cultural, social and technological contexts of music and musicians. But musical authorship, in its many technical and aesthetic modes, remains an important component of music culture. Musicians are increasingly called on to share their experience in writing. However, cultural imperatives to account for composition as knowledge production and to make claims for its uniqueness inhibit the development of discourse in both expert and public spheres. Internet pioneer Philip Agre observed a discourse deficit in artificial intelligence research and proposed a critical technical practice, a single disciplinary field with “one foot planted in the craft work of design and the other foot planted in the reflexive work of critique. ... A critical technical practice rethinks its own premises, re-evaluates its own methods, and reconsiders its own concepts as a routine part of its daily work.” This volume considers the potential for critical technical practice in the evolving situation of composition across a wide range of current practices. In seeking to tell more honest, useful stories of composition, it hopes to contribute to a new discourse around the creation of music.

Female-Voice Song and Women's Musical Agency in the Middle Ages , 2022-08-22 This collection of seventeen essays newly identifies contributions to musical culture made by women before 1500 across Europe. You will learn about repertoire from such diverse locations as Iceland, Spain, and Italy, and encounter examples of musicianship from the gender-fluid professional musicians at the Islamicate courts of Syria to the nuns of Barking Abbey in England. The book shows that women drove musical patronage, dissemination, composition, and performance, including within secular and ecclesiastical contexts, and also reflects on the reception of medieval women's musical agency by both medieval poets and by modern

recording artists. Contributors are David Catalunya, Lisa Colton, Helen Dell, Annemari Ferreira, Rachel Golden, Gillian L. Gower, Anna Kathryn Grau, Carissa M. Harris, Louise McInnes, Lisa Nielson, Lauren Purcell-Joiner, Megan Quinlan, Leah Stuttard, Claire Taylor Jones, Melissa Tu, Angelica Vomera, and Anne Bagnall Yardley.

CranioSacral Therapy for Grief and Loss Diego Maggio, 2024-09-03 • Explains how CranioSacral Therapy and SomaEmotional Release can help you through the common traumas of the life cycle, from birth to death • Shares techniques and exercises to help process emotions and experiences, assess the functionality of the body's systems and energetic framework, and recognize and transform destructive energies into constructive processes • Looks at how to enhance CST techniques with other protocols, including the Holmes and Rahe Stress Scale and Elisabeth Kübler-Ross' stages of grief Loss, abandonment, separation, and grief—many of life's most challenging experiences—are also the most common. But the trauma created by these experiences does not need to hold us back in life. As Diego Maggio shows, we can use the techniques of CranioSacral Therapy (CST) and SomaEmotional Release (SER) to understand, address, and overcome the stress that traumatic events cause and transform the painful experiences inherent in life into opportunities for growth and expanded awareness. Sharing Dr. Upledger's techniques and his own innovative applications of CST and SER across 20 years of practice, Maggio presents tools and exercises to facilitate your inner self-healing mechanisms and support yourself and others through the stages of grief and bereavement following a loss—whether the loss is large or one of the “small deaths,” such as losing a job or ending a relationship. The author explores all of the biological and energetic evolutionary stages of the life cycle through the lens of CST and shares manual therapy techniques and self-help exercises to process emotions and experiences, assess the energetic framework of the body and the chakras, and recognize and transform destructive energies into constructive processes. He looks at how to combine CST techniques with other protocols for managing the grieving process, including the Holmes and Rahe Stress Scale and Elisabeth Kübler-Ross's stages of grief. He also explores how CST and SER techniques can help support the dying and those around them in the process of transition. Revealing how CranioSacral Therapy can help us integrate challenges and traumas whether recent or long past, Maggio shows how our experiences can give us the opportunity to evolve and grow as we journey through the beautiful cycles of life.
