Queer Bangkok Peter A. Jackson, 2011-03-01 The Thai capital Bangkok is the unrivalled centre of the country's gay, lesbian and transgender communities. These communities are among the largest in Southeast Asia, and indeed in the world, and have a diversity, social presence and historical depth that set them apart from the queer cultures of many neighbouring societies. The first years of the 21st Century have marked a significant transition moment for all of Thailand's LGBT cultures, with a multidimensional expansion in the geographical extent, media presence, economic importance, political impact, social standing, and cultural relevance of Thai queer communities. This book analyzes the roles of the market and media - especially cinema and the Internet - in these transformations, and considers the ambiguous consequences that the growing commodification and mediatization of queer lives have had for LGBT rights in Thailand. A key finding is that in the early 21st Century processes of global queering are leading to a growing Asianisation of Bangkok's queer cultures. This book traces Bangkok's emergence as a central focus of an expanding regional network linking gay, lesbian and transgender communities in Hong Kong, Singapore, Taiwan, Indonesia, the Philippines and other rapidly developing East and Southeast Asian societies. Peter A. Jackson is associate professor in the School of Culture, History and Language at Australian National University. The myriad faces of Thai gender/sexuality culture have been an attraction for both pleasure-seekers and researchers/scholars/activists. Exploring the rapidly changing LGBT cultures and Thai queer identities, the essays collected here provide insightful analyses of historical continuities as well as developing variations within the highly complex erotic/economic texture of Thai society. A must-read for anyone in the booming field of gender/sexuality studies. -Josephine Ho, Chair Professor, Center for the Study of Sexualities, National Central University, Taiwan

The SAGE Encyclopedia of Trans Studies Abbie E. Goldberg, Genny Beemyn, 2021-02-26 Transgender studies, broadly defined, has become increasingly prominent as a field of study over the past several decades, particularly in the last ten years. The experiences and rights of trans people have also increasingly become the subject of news coverage, such as the

ability of trans people to access restrooms, their participation in the military, the issuing of driver's licenses that allow a third gender option, the growing visibility of nonbinary trans teens, the denial of gender-affirming health care to trans youth, and the media's misgendering of trans actors. With more and more trans people being open about their gender identities, doctors, nurses, psychologists, social workers, counselors, educators, higher education administrators, student affairs personnel, and others are increasingly working with trans individuals who are out. But many professionals have little formal training or awareness of the life experiences and needs of the trans population. This can seriously interfere with open communications between trans people and service providers and can negatively impact trans people's health outcomes and well-being, as well as interfere with their educational and career success and advancement. Having an authoritative, academic resource like The SAGE Encyclopedia of Trans Studies can go a long way toward correcting misconceptions and providing information that is otherwise not readily available. This encyclopedia, featuring more than 300 well-researched articles, takes an interdisciplinary and intersectional approach to trans studies. Entries address a wide range of topics, from broad concepts (e.g., the criminal justice system, activism, mental health), to specific subjects (e.g., the trans pride flag, the Informed Consent Model, voice therapy), to key historical figures, events, and organizations (e.g., Lili Elbe, the Stonewall Riots, Black Lives Matter). Entries focus on diverse lives, identities, and contexts, including the experiences of trans people in different racial, religious, and sexual communities in the United States and the variety of ways that gender is expressed in other countries. Among the fields of studies covered are psychology, sociology, history, family studies, K-12 and higher education, law/political science, medicine, economics, literature, popular culture, the media, and sports.

Desiring Thai Men Narupon Duangwises, Peter A. Jackson, 2025-10-15 *Desiring Thai Men* traces the transformative influence of vernacular Thai-language media on Thailand's gay communities from the 1980s through the 2010s. Narupon Duangwises and Peter A. Jackson analyze dramatic changes in the visual representation and languaging of masculine desire and sexual identity among Thai gay men that were reflected in Thai gay magazines and gendered practices in Bangkok's gay bars, fitness centers, and video chatrooms. Multiple masculine identities emerged in Thailand's communities of men who have sex with men from the intersecting influences of commercial gay media and gay venues. Distinctive class-based, contextualized, and flexible masculinities evolved among ethnically diverse Thai gay men in a capitalist setting of print and online media and expanding consumerist lifestyles. *Desiring Thai Men* argues that evolving forms of masculinity among Thai men who pursue men offer insights for reexamining class dynamics in transnational queer and media studies and for the applicability of hegemonic masculinity beyond Western contexts.

Mobile Subjects Aren Z. Aizura, 2018-10-25 The first famous transgender person in the United States, Christine Jorgensen, traveled to Denmark for gender reassignment surgery in 1952. Jorgensen became famous during the ascent of postwar dreams about the possibilities for technology to transform humanity and the world. In *Mobile Subjects* Aren Z.

Aizura examines transgender narratives within global health and tourism economies from 1952 to the present. Drawing on an archive of trans memoirs and documentaries as well as ethnographic fieldwork with trans people obtaining gender reassignment surgery in Thailand, Aizura maps the uneven use of medical protocols to show how national and regional health care systems and labor economies contribute to and limit transnational mobility. Aizura positions transgender travel as a form of biomedical tourism, examining how understandings of race, gender, and aesthetics shape global cosmetic surgery cultures and how economic and racially stratified marketing and care work create the ideal transgender subject as an implicitly white, global citizen. In so doing, he shows how understandings of travel and mobility depend on the historical architectures of colonialism and contemporary patterns of global consumption and labor.

The SAGE Encyclopedia of LGBTQ Studies Abbie E. Goldberg, 2016-05-10 This far-reaching and contemporary new Encyclopedia examines and explores the lives and experiences of Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) individuals, focusing on the contexts and forces that shape their lives. The work focuses on LGBTQ issues and identity primarily through the lenses of psychology, human development and sociology, emphasizing queer, feminist and ecological perspectives on the topic, and addresses questions such as: · What are the key theories used to understand variations in sexual orientation and gender identity? · How do Gay-Straight Alliances (GSA) affect LGBTQ youth? · How do LGBTQ people experience the transition to parenthood? · How does sexual orientation intersect with other key social locations, such as race, to shape experience and identity? · What are the effects of marriage equality on sexual minority individuals and couples? Top researchers and clinicians contribute to the 400 signed entries, from fields such as: · Psychology · Human Development · Gender/Queer Studies · Sexuality Studies · Social Work · Sociology The SAGE Encyclopedia of LGBTQ Studies is an essential resource for researchers interested in an interdisciplinary perspective on LGBTQ lives and issues.

Global Dialectics in Intercultural Communication Jolanta A. Drzewiecka, Thomas K. Nakayama, 2018 We have here a diverse, distinctive collection of essays concerned with the human implications and on-the-ground entanglements of life under globalization, that seemingly intractable but unavoidable phenomenon.-Crispin Thurlow, University of Bern (Switzerland)

To Have and to Hold Melanie Judge, Anthony Manion, Shaun De Waal, 2008 Written by an impressive selection of academics, attorneys, researchers, and activists, these essays explore the national debate in South Africa on the topic and consequences of their Civil Union Act. Contributions critically examine the legislative and advocacy process of marriage, the institution of marriage itself, and the meanings attached to it for lesbian, gay, bisexual, transgender, and intersex people. The

combination of historical documents, personal reflections, and academic and activist analyses of same-sex marriage makes this collection invaluable for understanding this historic journey and its legal, social, cultural and religious ramifications.
