Adventures of an Optimist Donald Mitchell, 2012-03-19 In 1995, Donald Mitchell began an audacious task: Demonstrate ways for the whole world to make 400 years worth of normal improvements in the 20 years between 2015 and 2035, a task he calls the 400 Year Project. The results could be as dramatic for humanity as going from sending smoke signals to watching videos sent via cell phones and email had been for extending communications. With guidance from management guru Peter Drucker, direction from clients, and assistance from talented colleagues and students, the project has identified many breakthrough solutions which meet the project's goals. Mitchell describes the roots of his practical optimism, identifies how he organized the project, shares what he learned from pursuing this investigation into untapped breakthroughs, and spells out the focus needed to accelerate global improvements by 20 times from 2015 to 2035. Mitchell also summarizes the books he's coauthored on creating accelerated breakthroughs as part of the 400 Year Project. This is the 2012 revised edition of the

2007 book.

Making a Difference Peter Hernon, Nancy Rossiter, 2006-12-30 Leadership is separate from, but integral to, management; and library directors today and for the foreseeable future can be expected to play an institutional role as they lead the library to contribute towards the mission of their college and university. Similarly, new courses in library leadership now accompany more traditional ones on managing organizations and information resources. However, much of the literature on LIS leadership represents a distilled application of principles and practices borrowed from other disciplines, with few reports of research from the library field. Conceived as a companion to *The Next Library Leadership* (Libraries Unlimited, 2003), *Making a Difference* includes not only a discussion of effective attributes, but of issues central to the development of leadership qualities, strategies, and dispositions. Essential reading for anyone interested in advancing the quality of leadership within LIS, particularly academic librarians in or aspiring to positions of managerial leadership.

It'S Business, It'S Personal Saad Amanullah Khan, 2015-11-20 *Its Business, Its Personal* is an appropriate reminder that building a successful and sustainable business depends on many interdependent factors, not just one latest flavor of the month practice. Saad also reminds us of the vital importance of foundational values and principles guiding an organization. The book goes beyond the theory of business success but also provides very practical how to guidance. Werner Geissler, Vice Chairman of Global Operations, Procter & Gamble Mr. Saad brilliantly demonstrates the need for consumer-centric purpose as a basis for enduring business success. Equally important is his conviction that good organizational practice is rooted in a strong value system. Equipped with twenty-five years of hard-earned business experience at Procter & Gamble, the author goes beyond lofty principles and provides time-honored advice on how to turn a vision into a winning in-market execution. Peter Corijn, Vice President for the Regional Business Unit of Gillette, Procter & Gamble I was proud to have worked with Saad and found him an effective leader a most honest and dependable associate. A person I would like to work with in any assignment. Fouad Kraytem, President Middle East Africa and General Export (MEAGE), Procter & Gamble Saad has captured a treasure trove of insights from his long career at P&G. Insights that contributed to the outstanding success of the subsidiaries he was an important part of. It is almost criminal that non-P&Gers are offered the opportunity to read and learn from this book! Philippe Bovay, Vice President/General Manager, Procter & Gamble Pakistan Excellent synopsis of the entire business exercise of vision setting and its associated processes. Saad captures in tremendous detail the entire process and goes into great depth on how to drive organizational excellence without which the vision would be powerless. The key to executing this process with excellence is what I call BOF i.e. Brutal Obsession with Fundamentals. Al Rajwani, Vice President

Practitioner's Handbook of Risk Management for Water & Wastewater Systems Gordon Graham, Paul Fuller, 2021-11-23 Real risk management is predicated on the eventuality of human erraticism and therefore necessitates the design of resilient systems, such as control measures, policies, procedures, processes, rules, checklists, and protocols, to protect organizations against unpredictability. However, these systems aren't enough to prevent tragedies, they must be paired with an organizational culture that drives employee understanding, adherence, questioning, and enforcement of these systems. Success is conditioned on this interdependent relationship, meaning employees do the right thing, the right way every time, as they unequivocally support the underlying rationale of their organizational systems, mission, and purpose. This dynamic, inculcated way of thinking is intrinsic to high-reliability organizations and should be the aspiration of all executives, managers, and supervisors. Authors Gordon Graham and Paul Fuller impart a wide range of practical information on resilient systems- as these thoughtfully designed protocols, kept up-to-date and properly implemented, serve to minimize organizational risk in the water and wastewater industry. Features: Offers guidance for organizations to maximize service, enhance safety, and minimize liability. Presents fundamental background on risk, systems, risk management, as well as factors leading to industrial tragedies and how to avoid or mitigate them. Includes practical examples to demonstrate the necessary steps to transform a water facility into a highly reliable and safe organization. Centering on organizational risk management, Practitioner's Handbook of Risk Management for Water & Wastewater Systems provides the investigative tools for risk assessments and risk/frequency matrixes to effectively recognize and prioritize the thousands of risks facing professionals working in the water and wastewater industry today.
