**Sustainable Composites for Automotive Engineering** Vijay Raghunathan, Sanjay Mavinkere Rangappa, Vinod Ayyappan, Suchart Siengchin, 2025-09-01 Sustainable Composites for Automotive Engineering presents recent trends in this important research field. Emphasis is placed on the development, characterization, and application of lightweight composites in various automobile components. The types of materials covered include polymer composites, metal matrix and ceramic matrix composites. The book takes a 360-degree approach and covers all aspects of the product development cycle including materials selection, as well as design and development processes, testing, characterization, modelling and simulation, and applications. The book will be a valuable reference resource for academic and industrial researchers, materials scientists and engineers, industrial R&D, automotive engineers, and manufacturers working in the design and development of composite materials for applications in automotive components. - Provides in-depth knowledge about the materials, their properties and performance, and applications in automotive components - Covers polymer matrix composites, ceramic-matrix and metal-based composites - Discusses traditional manufacturing methods and recent developments in sustainable 'green' manufacturing and testing of automobile parts with various industrial case studies - Includes brake friction materials, as well as natural and rubber-based composites - Covers OEM regulations, environmental aspects, economic analysis, and life cycle assessment of composite-based products

High Performance Structures and Composites C. A. Brebbia, Willy Patrick Wilde, 2002 The papers featured in this book

cover a wide range of topics related to advanced types of structures and the behaviour of composites. Originally presented at the First International Conference on High Performance Structures and Composites, the contributions highlight the latest developments in design, optimisation, manufacturing and experimentation within these areas.

**I-CAR Unibody Collision Repair** Inter-Industry Conference on Auto Collision Repair,1992 This up-to-the minute text includes only the very latest techniques in unibody collision repair and refinishing. I-CAR matching and other I-CAR approved techniques and practices are thoroughly covered, including MIG welding, sectioning, and pulling. Information is presented in a logical sequence and progresses from covering shop procedures, tools, and equipment to estimating costs and restoring corrosion protection. This book is based entirely upon the I-CAR curriculum package and can be used in conjunction with other I-CAR materials.
