**Vinesh Y. Hookoomsing, Sandra Evers**

*The United Nations and Decolonization: The Role of Afro — Asia* Y. El-Ayouty, 2012-12-06 When the United Nations' Charter was signed in San Francisco in 1945, the number of African member states of the Organisation was only 4. By the end of 1960 it had risen to 22. Today it is 41. How has this come about? The answer is given in this valuable book by Dr. Yassin El-Ayouty. The handful of Asian and African countries who had the privilege of foundation membership made it their business to see to it that their brethren who were still under the colonial yoke attained their freedom and independence as soon as possible and, in the meanwhile, that they were treated with decency and fairness by their colonial masters. It was a tough assignment. The struggle was long, requiring a great deal of patience and endurance. It was at times fierce, requiring much dogged resolution. It also called for the deployment of intellectual agility of the highest order. Fortunately all these qualities were available in the representatives of Asia and Africa who led the great struggle. These distinguished delegates also demonstrated a wonderful degree of solidarity which has, happily, become an Afro-Asian tradition at the United Nations. The battle began even before the Organisation had itself become a fact. It would have been a more difficult struggle, had there been no provision in the Charter at all in respect of colonies, by whatever name called.

**Education, Decolonization and Development** Dip Kapoor, 2009-01-01 Education, development and decolonization provides a historical, theoretical and practical inter-disciplinary analysis of the contemporary trajectory of colonization (including internal colonization) through the linked projects of eurocentric development, globalization and the uncritical adoption of colonial modes of education and learning in schools, communities, social movements and the “progressive” church in Asia, Africa and the Americas. Critical perspectives on colonialism, education and development are deployed in the interests of a continued praxis of decolonization. This collection is intended for graduate and senior undergraduate students in adult/education, development studies, social movement learning and de/colonization and cultural studies, as well as for civil society and social movement actors, development practitioners and socio-cultural workers and popular educators working in North-South engagements. A mix of theoretical and applied/practical content ensures that this collection will be of use to theoreticians, analysts and practitioners alike.

**Routledge Handbook of Africa-Asia Relations** Pedro Amakasu Raposo, David Arase, Scarlett Cornelissen, 2017-10-30 The Routledge Handbook of Africa-Asia Relations is the first handbook aimed at studying the interactions between countries

across Africa and Asia in a multi-disciplinary and comprehensive way. Providing a balanced discussion of historical and on-going processes which have both shaped and changed intercontinental relations over time, contributors take a thematic approach to examine the ways in which we can conceptualise these two very different, yet inextricably linked areas of the world. Using comparative examples throughout, the chronological sections cover: • Early colonialist contacts between Africa and Asia; • Modern Asia-Africa interactions through diplomacy, political networks and societal connections; • Africa-Asia contemporary relations, including increasing economic, security and environmental cooperation. This handbook grapples with major intellectual questions, defines current research, and projects future agendas of investigation in the field. As such, it will be of great interest to students of African and Asian Politics, as well as researchers and policymakers interested in Asian and African Studies.

**The Decolonization Of Africa** David Birmingham, 2008-02-20 This bold, popularizing synthesis presents a readily accessible introduction to one of the major themes of the twentieth-century world history. Between 1922, when self-government was restored to Egypt, and 1994, when non-racial democracy was achieved in South Africa, no less than 54 new nations were established in Africa. Written within the parameters of African history, as opposed to imperial history, this study charts the process of nationalism, liberation and independence that recast the political map of Africa in these years. Ranging from Algeria in the North, where a French colonial government used armed force to combat the Algerian aspirations of home rule, to the final overthrow of apartheid in the South, this is an authoritative survey that will be welcomed by all students tackling this complex and challenging topic.

**South Asia and Africa After Independence** Bernard Waites, 2012-01-17 Post-colonial South Asia and Africa invite comparison: along with their political boundaries, they inherited from colonial regimes administrative languages, a cluster of sovereign state institutions and modern economic nuclei. When they became independent, South Asian and African states were - for all their diversity - thrust into a common position in the international system, and embarked on a common history as 'emergent', 'non-aligned', 'developing nations'. This is the first book to offer a single-volume comparative history of postcolonial South Asia and sub-Saharan Africa in the first generation since independence. *South Asia and Africa After Independence* draws together the political and economic history of these two regions, assessing the colonial impact, establishing breaks and continuities, and highlighting their diversity and interplay. Waites sets out a framework for analysing the first generation of post-colonial history, offering an interpretation of 'post-colonialism' as a historical phenomenon, and provocatively challenging us to re-think this term in relation to South Asian and African history. This book is an important reference for the study of global, world, African and South Asian history.

Decolonization Jan C. Jansen, Jürgen Osterhammel, 2019-06-11 The end of colonial rule in Asia, Africa, and the Caribbean was one of the most important and dramatic developments of the twentieth century. In the decades after World War II, dozens of new states emerged as actors in global politics. Long-established imperial regimes collapsed, some more or less peacefully, others amid mass violence. This book takes an incisive look at decolonization and its long-term consequences, revealing it to be a coherent yet multidimensional process at the heart of modern history. Jan Jansen and Jürgen Osterhammel trace the decline of European, American, and Japanese colonial supremacy from World War I to the 1990s. Providing a comparative perspective on the decolonization process, they shed light on its key aspects while taking into account the unique regional and imperial contexts in which it unfolded. Jansen and Osterhammel show how the seeds of decolonization were sown during the interwar period and argue that the geopolitical restructuring of the world was intrinsically connected to a sea change in the global normative order. They examine the economic repercussions of decolonization and its impact on international power structures, its consequences for envisioning world order, and the long shadow it continues to cast over new states and former colonial powers alike. Concise and authoritative, *Decolonization* is the essential introduction to this momentous chapter in history, the aftershocks of which are still being felt today. --

*Problems in the History of Modern Africa* Robert O. Collins, 2008 Presents the important issues in the study of modern Africa such as: Decolonization and the End of Empire; Democracy and the Nation-State; Epidemics in Africa: The Human and Financial Costs; Development: Failure or Success; The African Environment: Origins of a Crisis; and, Return of the Empires.

**Beyond Empire and Nation** ,2013-03-28 The decolonization of countries in Asia and Africa is one of the momentous events in the twentieth century. But did the shift to independence indeed affect the lives of the people in such a dramatic way as the political events suggest? The authors in this volume look beyond the political interpretations of decolonization and address the issue of social and economic reorientations which were necessitated or caused by the end of colonial rule. The book covers three major issues: public security; the changes in the urban environment, and the reorientation of the economies. Most articles search for comparisons transcending the colonial and national borders and adopt a time frame extending from the late colonial period to the early decades of independence in Asia and Africa (1930s-1970s). The volume is part of the research programme 'Indonesia across Orders' of the Netherlands Institute for War Documentation. Contributors to the volume are: Greg Bankoff, Raymond Betts, Ann Booth, Cathérine Coquéry-Vidrovitch, Freek Colombijn, Frederick Cooper, Bill Freund, Karl Hack, Jim Masselos and Willem Wolters.

The process was peaceful in some regions; Nigeria, Ghana, violent in some; South Africa, Angola, Congo, and protracted in a few; South Sudan.

**The Routledge Companion to Decolonization** Dietmar Rothermund,2006-04-18 This is an essential companion to the process of decolonization - perhaps one of the most important historical processes of the twentieth century. Examining decolonization in Africa, Asia, the Caribbean and the Pacific, the Companion includes: thematic chapters a detailed chronology and thorough glossary biographies of key figures maps. Providing comprehensive coverage of a broad and complex subject area, the guide explores: the global context for decolonization nationalism and the rise of resistance movements resistance by white settlers and moves towards independence Hong Kong and Macau, and decolonization in the late twentieth century debates surrounding neo-colonialism, and the rise of 'development' projects and aid the legacy of colonialism in law, education, administration and the military. With suggestions for further reading, and a guide to sources, this is an invaluable resource for students and scholars of the colonial and post-colonial eras, and is an indispensable guide to the reshaping of the world in the twentieth century.
