The Troubled Rhetoric and Communication of Climate Change Philip Eubanks, 2015-05-15 Despite an overwhelming scientific consensus, climate change remains one of the most controversial issues of our time. Focusing on the rhetoric that surrounds the issue of climate change, this groundbreaking book analyses why the debate continues to rage and examines how we should argue when winning the argument really matters. Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests, the book explains the mutually exacerbating problems that permit many of us greet catastrophic predictions with an equivocal shrug. It argues that the argumentative situation around climate change makes a certain kind of skepticism – fair-minded skepticism – not only possible but likely. The book also strikes a hopeful note, reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values. Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically, as well as a new perspective on the rhetoric of science and technology, this book will be a valuable resource to students and scholars of climate change, environmental humanities, rhetoric, environmental communication, sociology and science and technology studies.

Inside Arguments Henrique Jales Ribeiro, 2012-04-25 This volume includes a collection of eighteen essays that provide a decisive input to the study of logic and argumentation theory by some of the finest specialists in these areas, covering the main schools of thought and contemporary trends at the beginning of the 21st century. In these essays, the authors clarify the status of what we currently call, ambiguously and problematically, “logic” and “argumentation theory”, and discuss the no less controversial issue of the relationship between these two concepts when applied to the study of argumentation and its problems. At the same time, they take stock of the most recent developments of argumentation theory considered as an ongoing research subject. It is the first time in the last few decades that a work this comprehensive and up-to-date on such matters has been published. This volume is an essential tool for all of those interested in the study of the relations between logic and argumentation, particularly at the university level. It provides not only an introduction to these subjects, but also the necessary framework for further specialised research development in the future.
