*Ibn Sina* B. Ja Šidfar,1981

*Ibn Sina's Remarks and Admonitions: Physics and Metaphysics* ,2014-06-17 Al-Isharat wat-Tanbihat (Remarks and Admonitions) is one of the most mature and comprehensive philosophical works of Ibn Sina (Avicenna, 980-1037). Grounded in an exploration of logic (which Ibn Sina described as the gate to knowledge) and happiness (the ultimate human goal), the text illuminates the divine, the human being, and the nature of things through a wide-ranging discussion of topics. The

sections of Physics and Metaphysics deal with the nature of bodies and souls as well as existence, creation, and knowledge. Especially important are Ibn Sina's views of God's knowledge of particulars, which generated much controversy in medieval Islamic and Christian philosophical and theological circles and provoked a strong rejection by eleventh-century philosopher al-Ghazali. This book provides the first annotated English translation of Physics and Metaphysics and edits the original Arabic text on which the translation is based where it is corrupt or incomprehensible. It begins with a detailed analysis of the text, followed by a translation of the three classes or groups of ideas in the Physics (On the Substance of Bodies; On the Directions and Their Primary and Secondary Bodies; and On the Terrestrial and Celestial Souls) and the four in the Metaphysics (On Existence and Its Causes; Creation Ex Nihilo and Immediate Creation; On Ends, on Their Principles, and on the Arrangement [of Existence]; and On Abstraction. The Metaphysics closes with a significant discussion of the concepts of providence, good, and evil, which Ibn Sina uses to introduce a theodicy. Researchers, faculty, and students in philosophy, theology, religion, and intellectual history will find in this work a useful and necessary source for understanding Ibn Sina's philosophical thought and more generally the medieval Islamic and Christian study of nature, the world beyond, psychology, God, and the concept of evil.

**Ibn Sina and his Influence on the Arabic and Latin World** Jules Janssens, 2020-09-10 This volume focuses on Ibn Sina - the Avicenna of the Latin West - and the enormous impact of his philosophy in both the Islamic and Christian worlds. Jules Janssens opens with a new introductory article, surveying the position of work in the field. The next studies look at Ibn Sina's work and thought, inspired by Alexandrian Neoplatonism on the one hand, and the Qur'an on the other, notably his views on the relationship between God and the world, within the context of Islam. There follow explorations of Ibn Sina's influence on later philosophers, first within the Islamic world and with particular reference to al-Ghazzali, but also, once translated into Latin, in the scholastic world of the West, on figures such as Albert the Great, Thomas Aquinas, and above all Henry of Ghent.

*The Amazing Discoveries of Ibn Sina* Fatima Sharafeddine, 2015-03-25 The life story of Ibn Sina (980-1037), one of the greatest philosophers, scientists and physicians of the Islamic world. Born in Persia more than a thousand years ago, Ibn Sina was one of the greatest thinkers of his time — a philosopher, scientist and physician who made significant discoveries, especially in the field of medicine, and wrote more than one hundred books. As a child, Ibn Sina was extremely bright, a voracious reader who loved to learn and was fortunate to have the best teachers. He memorized the Qur'an by the age of ten and completed his medical studies at sixteen. He spent his life traveling, treating the sick, seeking knowledge through research, and writing about his discoveries. He came up with new theories in the fields of physics, chemistry, astronomy and education. His most famous work is The Canon of Medicine, a collection of books that were used for teaching in universities across the Islamic world and Europe for centuries. Ibn Sina's story, told in the first person and beautifully illustrated,
