Six Concepts for the End of the World Steve Beard, 2019-10-08 A navigational aid to the apocalypse. Steve Beard's *Six Concepts for the End of the World* mixes scientific research with experimental fiction to produce a manual for the apocalypse. The author examines six disciplines—technology, sociology, geography, psychology, theology and narratology—and for each one creates a fictional scenario that both reflects and energizes the research, all under the guiding light of the philosopher Paul Virilio's theories. This approach allows Beard to create one surprising idea after another: Hollywood viewed as a research and development lab for the end times, a first-person account of a UFO abduction, a blog on the disappearance of the Malaysian Airlines flight 370, a voice-over for an imaginary film by a doomsday cult member. Highly original in both form and content, the book surprises and delights in its scope. The approach is multidisciplinary and multidirectional, and Beard's exploration ranges over many areas and themes, always bringing distinctive insights to bear. *Six Concepts for the End of the World* is an expertly guided tour through the author's imagination, and toward the end of the world.

Malaysia Airlines Flight 370 David Soucie, 2015-02-17 On March 8, 2014, Malaysia Airlines Flight 370 loaded 239 people on board and took off for what should have been a six-hour flight. It never made it—and it's still missing. It's been a year since Malaysia Airlines Flight 370 vanished, and there's still no sign of the aircraft, its passengers, or its crew—nor confirmation of what happened or where the aircraft resides. In this gripping investigation of the events that led to the plane's disappearance—and why they could happen again—CNN aviation analyst David Soucie exposes the flaws in the aviation industry, shares what needs to be done so a plane doesn't go missing again, and uses a Bayesian analysis model to reveal what most likely happened on board the plane that led to its downfall. Comprehensive in scope, personal and empathetic in voice, Soucie draws on his thirty years of experience as an accident investigator working with the Federal Aviation Administration. He allows you to put the wild speculation about the plane's disappearance aside and assess the facts through the eyes of an experienced accident investigator.

The Vanishing of Flight MH370 Richard Quest, 2016 CNN Aviation Correspondent Richard Quest offers a gripping and definitive account of the disappearance of Malaysian Airline Flight MH370 in March 2014. On March 8, 2014, Malaysian Airlines Flight MH370 disappeared with barely a trace, carrying 239 people on board--seemingly vanishing into the dark night. The airplane's whereabouts and fate would quickly become one of the biggest aviation mysteries of our time... Richard Quest, CNN's Aviation Correspondent, was one of the leading journalists covering the story. In a coincidence, Quest had interviewed one of the two pilots a few weeks before the disappearance. It is here that he begins his gripping account of those tense weeks in March, presenting a fascinating chronicle of an international search effort, which despite years of searching and tens of millions of dollars spent has failed to find the plane. Quest dissects what happened in the hours following the plane's disappearance and chronicles the days and weeks of searching, which led to nothing but increasing despair. He takes apart the varying responses from authorities and the discrepancies in reports, the wide range of theories, the startling fact that the plane actually turned around and flew in the opposite direction, and what solutions the aviation industry must now implement to ensure it never happens again. What emerges is a riveting chronicle of a tragedy that continues to baffle everyone from aviation experts to satellite engineers to politicians--and which to this day worries the traveling public that it could happen again. The Mysterious Final Flight of MH-370 Robert Dominguez, 2019-03-08 When we board a modern twenty-first century aircraft, we are all confident of, hopefully, a smooth flight, and delivery, to our destination of choice. This was not the case of Malaysia Airlines Flight no. MH-370. It never landed at its destination, nor any other airport. This chronology of the facts of

its final flight is written to help soothe the nerves of the international flying public. Because MH-370 vanished mysteriously, its story was written beginning as an unsolved mystery disappearance. Later, when arriving at the conclusion of a tale of a mysteriously missing aircraft, with 239 souls aboard, I realized I had composed a history of the facts and human stories, chronicled within the saga of The Mysterious Final Flight of MH-370. Therefore, the inclusion of the safety of today's human flight is annotated, but also the future of human air flight safety, by describing new safety measures designed to replace outdated twentieth century black box invention, with twenty-first century digitized data recording innovative technologies. Cost seems to be the inhibition of installing, then implementing, the now preexisting twenty-first century technologies on all aircraft worldwide, hopefully sooner rather than later. The good news is the United States Air Force has it already implemented and utilized daily today. One day, MH-370 may be located, certainly providing solace and closure for the 239 families missing their loved ones, who comprised the flight manifest of the 239 missing souls aboard MH-370. Plus, both black boxes may provide answers to what transpired during The Mysterious Final Flight of MH-370. Additionally, it is said and felt Hope springs daily, living eternally.

Someone Is Hiding Something Richard Belzer, George Noory, David Wayne, 2015-02-17 A year after the disappearance and commencement of the international search for Malaysia Airlines Flight 370, no sign of the plane has been found—no debris, no bodies, no sign of the much-talked-about black box. Richard Belzer, George Noory, and David Wayne want to know why. Scrutinizing the theories the media and politicians claim are the “most likely” reasons the plane crashed, Belzer, Noory, and Wayne argue that if a year after a huge Boeing 777 has gone missing, and there’s still no sign of it whatsoever, it’s time to think outside the box. The public needs to stop being misled. If a plane and its passengers went missing once, what's to stop it from happening again? Some of the theories the authors consider seem implausible on the surface, but the thorough research they've done and the continual failure of politicians, aviation authorities, and military members around the world to give any indication they're wrong makes their arguments as good—if not better—than the more widely shared ones. The title of this thought-provoking volume, Someone is Hiding Something, is a line spoken by former Malaysian Prime Minister Mahathir Mohamad—perhaps the only government official to publicly acknowledge the true reason that neither Flight 370 nor the 239 people onboard have been found.

AIR CRASH INVESTIGATIONS - THE DISAPPEARANCE OF MH370 - Did Captain Zaharie Ahmad Shah prevent a disaster? Dirk Jan Barreveld,2015-08-06 On 07 March 2014 at 1642 UTC, a Malaysia Airlines Flight MH370, bound for Beijing departed from Kuala Lumpur International Airport with 239 persons on board. It was a Boeing 777-200ER. A half hour in the flight all communication stopped suddenly and the plane changed course to the remote South Indian Ocean. Nothing was heard or seen of the plane until on 1 August 2015 a piece of the wing was found on the Beach of Reunion Island in the Southwest Indian Ocean. The accident is very similar to the crash of Helios Flight 5223 on 13 August 2005. This plane suffered from a sudden leak in the cabin pressure, crew and passengers suffered from hypoxia, three hours later the plane hit a mountain near Athens, Greece. Did Captain Shah of MH370 try to avoid crashing on Beijing? What is the role of the huge American base of Diego Garcia in the Indian Ocean in the story?

Last Flights Of Malaysian Airlines Mh370 And Mh17, The: A Firsthand-look Azharuddin Abdul

Rahman, 2022-10-14 Having always been in love with all things related to aviation since childhood, Azharuddin Abdul Rahman's dream came true when he was given a chance to enter the field of aircraft engineering. Serving as Director-General for eleven years with the Department of Civil Aviation (DCA), he had had many valuable experiences. However, the two biggest tragedies that occurred in 2014, that of MH370 and MH17, had the greatest impact on his life, and affected not just the victims and their families, but the entire Malaysian aviation industry. Azharuddin was directly involved in leading the search missions of the tragic disappearance of MH370 on 8 March 2014, and in a series of investigations concerning the downing of MH17 in eastern Ukraine on 17 July of the same year. As Director-General, Azharuddin faced a heavy burden in the aftermath of the twin disasters, of which MH370 remains unsolved to the present day. No one was prepared for the MH370 tragedy despite all the training they had received. As for MH17, Azharuddin laments that the tragedy may have been prevented had full information on the level of conflict in Ukraine been made available during that time. In both cases, all passengers and crew on board were killed. Both tragic events marked a new history in the aviation industry, both in Malaysia and in the international arena, causing new reforms to burst into action to ensure similar incidents will not happen again. In writing this book, Azharuddin draws from personal experience, conducting his research with and around aviation industry professionals, and drawing insights from others involved in both incidents to present a full and raw take on the twin disasters of the Malaysian aviation industry in 2014.

The disappearance of MH370 has been described as the greatest mystery in the history of aviation. No one has been able to determine what really happened. Until now...
