Daphne Adler

Debunking the Bump Daphne Adler, 2018-04-01 Stay away from sushi! Cut out caffeine! Get rid of your cat! Step away from the microwave! Pregnant women are bombarded with risk factors they must avoid from the moment the stick turns pink. Heroic mothers-to-be sacrifice their favorite foods and activities for the sake of their baby, but with such long lists of don'ts and conflicting information, it is easy to feel overwhelmed. Daphne Adler, a mathematician, management consultant, and self-proclaimed numbers junkie turns her expertise to pregnancy and the real research behind the risks. With thousands of cited sources, Adler wades through the research to reveal which factors are truly threats to a healthy pregnancy and which are simply red herrings or old wives' tales. From cheese to sex to saunas, *Debunking the Bump* sheds light on everything expectant mothers need to know to avoid the real risks without skipping the sushi.

HACCP and ISO 22000 Ioannis S. Arvanitoyannis, 2009-11-09 Food Safety is an increasingly important issue. Numerous food crises have occurred internationally in recent years (the use of the dye Sudan Red I; the presence of acrylamide in various fried and baked foods; mislabelled or unlabelled genetically modified foods; and the outbreak of variant Creutzfeldt-Jakob disease) originating in both primary agricultural production and in the food manufacturing industries. Public concern at these and other events has led government agencies to implement a variety of legislative actions covering many aspects of the food chain. This book presents and compares the HACCP and ISO 22000:2005 food safety management systems. These systems were introduced to improve and build upon existing systems in an attempt to address the kinds of failures which can lead to food crises. Numerous practical examples illustrating the application of ISO 22000 to the manufacture of food products of animal origin are presented in this extensively-referenced volume. After an opening chapter which introduces ISO 22000 and compares it with the well-established HACCP food safety management system, a summary of international legislation relating to safety in foods of animal origin is presented. The main part of the book is divided into chapters which are devoted to the principle groups of animal-derived food products: dairy, meat, poultry, eggs and seafood. Chapters are also included on catering and likely future directions. The book is aimed at food industry managers and consultants; government officials responsible for food safety monitoring; researchers and advanced students interested in food safety.

Histamine and Histamine Receptors in Health and Disease Yuichi Hattori, Roland Seifert, 2017-05-22 This book provides a comprehensive overview on current histamine and histamine receptor research in context of human health and

disease and reflect the multidisciplinary nature of the field. While the editors realize that it is almost impossible to cover the field completely within the constraints of a single HEP volume, nonetheless, all important aspects will be covered in one way or the other. An overarching introductory chapter will link the individual chapters and provide an overview on the field. This chapter will also link the book to the previous HEP volume on histamine receptors and the recent HEP volume on the pharmacology of itch. Great attention will be paid to complementation of existing literature while avoiding undue duplication. The book will cover new methods for analysis of histamine and histamine metabolites, development of methods for histamine receptor analysis, signal transduction, histamine release, regulation of immune cells by histamine, histamine metabolism and associated diseases, regulation of major organ systems by histamine and development of new drugs and experimental tools for the study of histamine receptors.
