Child Abuse Allison Krumsiek, 2017-12-15 Child abuse does not always leave visible marks; sometimes the abuse is emotional or sexual. Often, a child is abused in more than one way. Through informative text, full-color photographs, discussion questions, and detailed infographics, this volume teaches young adults what abuse looks like and how to get help for themselves or for others if they recognize signs of an abusive situation.

Sexual Abuse in Christian Homes and Churches Carolyn Holderread Heggen, 1993 What sets this book apart from the many others on the topic is the emphasis on how a church congregation can begin to work to heal the wounds of sexual abuse and prevent further abuses from happening. Church members often must, at the same time, offer love, understanding, and healing to survivors while confronting (and still loving) the perpetrator.

Healing the Whole Family Mary Lee Allen,Jamila Larson,1998 This report details characteristics of 50 family care programs that provide comprehensive, individualized services to families struggling with various problems, as well as services that allow parents and children to continue living together in supervised living arrangements for extended periods. Data were collected through in-depth telephone interviews with staff supplemented with site visits. The report, intended as a resource for practitioners and policymakers, describes family care programs' daily operations and the elements differentiating them from other social services. The report explores the origins of family care, those whom the program serves, types of living arrangements, lengths of stay, the services offered, and aftercare approaches, illustrating each discussion with examples and quotes from program staff. The report highlights program elements found to make family care programs effective, including comprehensive services, longer treatment timelines and aftercare procedures, priority given to children's safety, an accepting yet demanding treatment environment, staff quality, and active peer support among residents. Also noted are the significant challenges in evaluating the effectiveness of family care programs, and evidence of women's enhanced participation in education and employment, decreased homelessness, increased self-esteem, and decreased depression and stress. Highlighting evidence of the positive impact of family care on children involved in such programs, the report concludes with recommendations for enlarging the impact of family care. Five appendices include a description of the

study's methodology, one-page program summaries for all the programs surveyed, and a selective annotated bibliography on family care and related issues. Contains approximately 50 references. (KB)
