Values of Art Malcolm Budd,1995 Auth: University College London, Distributed by Viking.

The Value of Culture Arjo Klammer,1996 Culture manifests itself in everything human, including the ordinary business of everyday life. Culture and art have their own value, but economic values are also constrained. Art sponsorships and subsidies suggest a value that exceeds market price. So what is the real value of culture? Unlike the usual focus on formal problems, which has 'de-cultured' and 'de-moralized' the practice of economics, this book brings together economists, philosophers, historians, political scientists and artists to try to sort out the value of culture. This is a book not only for economists and social scientists, but also for anybody actively involved in the world of the arts and culture.

Music, the Arts, and Ideas Leonard B. Meyer,2010-04-15 Meyer makes a valuable statement on aesthetics, criteria for assessing great works of music, compositional practices and theories of the present day, and predictions of the future of Western culture. His postlude, written for the book's twenty-fifth anniversary, looks back at his thoughts on the direction of music in 1967.

How to Market the Arts Anthony Rhine,Jay Pension,2022 Conventional business marketing often suggests that the primary function of business is to market a product in order to maximize efficiency and profit. In *How to Market the Arts: A Practical Approach for the 21st Century*, expert authors Anthony Rhine and Jay Pension propose a new paradigm to better explain how nonprofit arts marketing can and should work. *How to Market the Arts* provides a history of both nonprofit arts and critical marketing concepts to show how standard methods of marketing are ill-suited for the nonprofit arts industry. Through visual models and case studies of several arts organizations, the book offers instead a practical look at how this industry might adopt more holistic marketing strategies that better reflect their true function which is often to serve communities over persuading consumers. Rhine and Pension offer a theoretical framework for reconsidering the nature of nonprofit arts marketing, as well as useful steps an organization might take to increase its value to a community and develop a broader audience base.

Well-Being as Value Fulfillment Valerie Tiberius, 2018-10-18 What is human well-being? Valerie Tiberius argues that our lives go well to the extent that we succeed in terms of what matters to us emotionally, reflectively, and over the long term. In other words, well-being consists in fulfilling or realizing our appropriate values over time. In the first half of the book, Tiberius sets out the theory of well-being as value fulfillment. She explains what valuing is and what it is to fulfill values over time. In the second half of the book she applies the theory to the problem of how to help others, particularly our friends. We don't always know how to provide the help we know others need; but we also have the problem of knowing what help they need in the first place, and this is a problem that requires ethical thinking. Tiberius argues that when we want to help others achieve greater well-being, we should pay attention to their values. This entails attending to how others' values fit together, how they understand what it means to succeed in terms of these values, and how things could change for them over time. Being a good and helpful friend, then, requires cultivating some habits of humility that overcome our tendency to think we know what's good for other people without really understanding what it's like to be them.
