*Vigyan Bhairav Tantra* Lord Shiva,Mohan Murari,Mohan Kumar,2020-01-12 After getting love and positive response of

my previous book Shiv Swarodaya - A Divine Law of Breathing and The Basic Mantras, of the series The Mantras; now, I am presenting a new book on meditation Bhairav Tantra Science to boost and take your spiritual and meditation level in zenith. The Bhairav Tantra Science is an ancient Indian text book of around 5,000 years old which is considered by many as the only book of meditation. This book is originally in Sanskrit. The book, which is before you, is the exact translation of the original text book. No discussion is complete on meditation without mentioning this book. It contains 112 methods and techniques of meditation in the form of conversation between God Shiva and Goddess Parvati (Devi, Gazelle-eyed). Many Sadhus, Saints, Gurus, etc. are also using these techniques of meditation. The book Bhairava Tantra Science literally means: Bhairava - A God of Hindu religion or another name of God Shiva; Tantra - A mystical spiritual path, a specific ancient science; Science - Vigyan. In this book, 112 techniques of meditation are discussed which can also help you for realizing your own true self. The book Bhairav Tantra Science is started with conversation between God Shiva and Goddess Parvati (Shakti). Devi asked God Shiva about the nature of reality, about Universe, about fundamental nature of the world. She also asked God Shiva, how can one go beyond space and time to understand this truth. God Shiva does not answer her directly of her questions. Rather than he tells her about the methods and techniques to get answers of these questions. He tells her how one can realize this reality through 112 methods of entering in the self. As every person has his own specific problems and questions. This book not only helped Goddess Parvati to get her answers but also can help same to the entire world. The methods are in their seed form which points towards various powerful meditation and concentration techniques. On contemplating about these techniques, you will get one of the most powerful collections of meditation techniques which are simple and very effective. The Book Bhairav Tantra Science has 112 meditation methods and techniques which covered all meditation techniques and methods. These meditational techniques and methods can be used by the people of all ages and times (past, present and future). It is impossible to find a meditational method or technique beyond these 112 techniques. It is also impossible for anybody to find a technique which is not suitable to his own level of spiritual development and inner temperament.

Vijnana Bhairava Tantra Satya Narayana Sarma Rupenaguntla,2018-08-28 Vijnana Bhairava Tantra is a part of Rudra Yamala Tantra which again belongs to the category of Bhairava Agamas. This is a Jnana Tantra which contains one hundred and twelve meditation techniques as different from outer rituals prescribed by other Tantras. The techniques taught by many gurus of today in all mystic schools are found in the list of these 112 methods. We find the practitioners of these techniques more in East and North of India than in the South. Especially for the followers of the Trika system of Kashmir Shaivism, this book is a favourite. There are many commentaries available on these verses. Nevertheless, I too have tried to explain them in the light of my understanding and experience. Those who are adept in the control of Prana and mind, Dharana and Dhyana

could find it easy to practice these methods. For others, this book just satisfies their idle curiosity. The speciality of this Tantra lies in its simple and direct approach in teaching the meditation methods without beating around the bush indulging in theoretical jargon. Those who are interested in Tantra need to search for a competent guru, learn the subtleties of these methods from him directly, practice and experience the results mentioned in this book. We hope that this book too, like our earlier books, will be appreciated by readers.

Anyone interested in meditation can practice these methods, and the technique that resonates with them is considered the one suited for their practice.
