**The Changing Space Economy of City-Regions** Koech Cheruiyot, 2017-10-30 This book addresses the South African  
Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City-Region - the largest  
economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges. The book's  
focus on understanding the overall character of Gauteng City-Region's Space Economy - through data mining/analysis and  
mapping - comprehensively supplements the Space Economy literature on the region. It covers the disparities exacerbated  
by an overlay of apartheid planning ideology and top-down regional development based on selective encouragement of  
manufacturing investments in growth points or poles and how implementation of past policies intended to cure these  
disparities have yielded mixed results. This book further offers the Gauteng City-Region as a microcosm of the national  
economy in the form of evident significant placed-based variations in the intensity and character of economic structure that  
on the one hand enjoys massive agglomeration economies, while on the other, has high levels of poverty and large numbers  
of people living below the Minimum Living Level. This book should appeal to urban studies specialists, economists and  
development studies researchers in the Global South.

**Urban Development and Planning** Bikram Pattanaik, 2025-03-20 This book details the most contemporary concerns related to urban development, governance, and planning, as well as the challenges to urban administration. It analyses the policies and programmes adopted by both high-income and lower-middle-income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic, practical perspective of the issues at hand. This volume elucidates urban development theories and approaches, coupled with urban planning, local government finance, urban management, and urban governance. It also discusses urban issues and challenges such as education, health, waste management, land use planning, housing, and transport. Critical concerns related to urban water bodies, open spaces, urban heritage and smart cities, and urban future are similarly addressed. This book will be useful to students, researchers, and teachers of urban planning and architecture, urban sociology, economics, geography, environmental science, and public administration. It shall also be useful to NGOs, parastatal bodies, and trainers of urban planning and development. Planners, policymakers, functionaries, and elected representatives of urban local bodies may also use this book as a capacity-building instrument.

**The Collectors of Lost Souls** Warwick Anderson, 2008-11-28 This riveting account of medical detective work traces the story of kuru, a fatal brain disease, and the pioneering scientists who spent decades searching for its cause. When whites first encountered the Fore people in the isolated highlands of colonial New Guinea during the 1940s and 1950s, they found a people in the grip of a bizarre epidemic. Women and children succumbed to muscle weakness, uncontrollable tremors, and lack of coordination, until death inevitably supervened. Facing extinction, the Fore attributed their unique and terrifying affliction to a particularly malign form of sorcery. *The Collectors of Lost Souls* tells the story of the resilience of the Fore through this devastating plague, their transformation into modern people, and their compelling attraction for a throng of eccentric and adventurous scientists and anthropologists. Battling competing scientists and the colonial authorities, the brilliant and troubled American doctor D. Carleton Gajdusek determined that the cause of kuru was a new and mysterious

agent of infection, which he called a slow virus (now called prions). Anthropologists and epidemiologists soon realized that the Fore practice of eating their loved ones after death had spread the slow virus. Though the Fore were never convinced, Gajdusek received the Nobel Prize for his discovery. The study of kuru opened up a completely new field of medical investigation, challenging our understanding of the causes of disease. But *The Collectors of Lost Souls* is far more than a tantalizing case study of scientific research in the twentieth century. It is a story of how a previously isolated people made contact with the world by engaging with its science, rendering the boundary between primitive and modern completely permeable. It tells us about the complex and often baffling interactions of researchers and their erstwhile subjects on the colonial frontier, tracing their ambivalent exchanges, passionate engagements, confused estimates of value, and moral ambiguities. Above all, it reveals the primitive foundations of modern science. This astonishing story links first-contact encounters in New Guinea with laboratory experiments in Bethesda, Maryland; sorcery with science; cannibalism with compassion; and slow viruses with infectious proteins, reshaping our understanding of what it means to do science.

**The Monuments of Piedras Negras, an Ancient Maya City** Flora S. Clancy, 2009-03-15 Patronized by royalty between the sixth and eighth centuries, the monuments of Guatemala's ancient Maya city of Piedras Negras were carved by sculptors with remarkable skills and virtuosity. Together patrons and sculptors created monumental imagery in a manner unique within the larger history of ancient Maya art by engaging public viewers through illustrations of ceremonies focusing on family and the feminine in royal agendas. Flora Clancy's introduction contextualizes her work with other studies and lays out her methodological framework. She then discusses the known monuments of the city sequentially by reigns. Individual rulers are characterized by a biography drawn from the hieroglyphic texts and the icons or imagery of their monuments are analyzed and discussed. Although the monuments of Piedras Negras are acknowledged as social, political, and cultural productions, Clancy also treats them as works of art that at their best operate on transcendent levels dissolving and overruling the contingencies of history and cultural differences.

*Stone Cold Souls* Gregory K. Moffatt, 2008-07-30 History's most notorious and brutal killers still enjoy fame as public fascination with their lives and their crimes continues to grow. *Stone Cold Souls* is a detailed examination of the most brutal killers in history. Moffatt does what he does best by looking at historical accounts of events, analyzing them from a psychological perspective, and presenting his assessment in captivating fashion. He examines different types of killers, offers case studies and historical context, and describes what sets these cases apart from other kinds of killings. Even in a day and age where pop culture has made serial crime a mainstay of movies and books, the depravity of the killers profiled in this work will still shock even a desensitized reader. Men, women, and children alike have committed crimes so atrocious that it is hard

to imagine that these events are not works of fiction. Moffatt examines the difficult questions that inevitably arise when one reads cases of unthinkable torture and cruelty. Why? Were these people simply evil or is it possible that, given other circumstances, they could have redirected their energies into more productive outlets? The author answers these questions and others and reveals the lives and crimes of these ruthless killers. *Stone Cold Souls* features such well-known cases as: Andrei Chikatilo, Marc Dutroux, Herman Webster Mudgett, Charles Ng, Leonard Lake, Lawrence Bittaker, Roy Norris, Ed Gein, Edmund Kemper, Henry Lee Lucas, Gilles de Rais, Ivan the Terrible, Richard Ramirez, Holly Ann Harvey, Sandy Ketchum, Mary Bell, Jesse Pomeroy, Josef Mengele, Marshall Applewhite, Jeffrey Lundgren, David Koresh, Jim Jones, Father Oliver O'Grady, Charles Cullin, Harold Shipman, Michael Swango, Myra Hindley, Karla Homolka, Aileen Carol Lee Wuornos, Elizabeth Bathory, Charles Sobhraj, Albert Fish, Donald Harvey, and Dennis Rader.

**Sources of World Societies, Volume II: Since 1450** Denis Gainty, Walter D. Ward, 2011-10-04 Designed to accompany McKay et al.'s *A History of World Societies*, each chapter of *Sources of World Societies* contains approximately six sources that present history from the perspectives of well-known figures and ordinary individuals alike. Now with visual sources and two more documents per chapter, this edition offers breadth and depth. Headnotes and questions supplement each document, while a new "Viewpoints" feature highlights two or three sources per chapter that address a single topic from different perspectives. Comparative questions ask students to make connections between sources and across time.
