Juan F. Pérez-Carballo Veiga

Ejercicios resueltos de finanzas Margarita (coord.) Prat, 2018-04-16 La principal aportación de este libro son los ejercicios comprensivos de la realidad empresarial, que pretenden ilustrar los problemas financieros sin excesivas simplificaciones, para permitir al lector un mejor entrenamiento. Además, todos los casos están acompañados de una solución detallada para que el lector pueda profundizar en la materia y no se quede con dudas.

El análisis económico-financiero en 100 ejercicios resueltos Juan F. Pérez-Carballo Veiga, 2010-02-01 La disociación de la teoría y la práctica es un grave error, en cuanto que ambas alimentan las capacidades imprescindibles de cualquier profesional. Entender los conceptos permite aplicarlos, con un esfuerzo adicional reducido, en situaciones diversas y múltiples, incluso en aquellas que surgen por primera vez. La experiencia, por su parte, favorece la formulación de reglas de decisión valiosas en la gestión cotidiana, que enseñan por los aciertos y los errores cometidos. Quizá, por ello, quien relega uno de los dos términos es porque carece de él. El profesional práctico tiene el riesgo de caer en los errores de la ignorancia, los más graves porque nacen de decisiones que se toman sin ser conscientes de sus posibles consecuencias. Además, ignora el aprendizaje que proporciona la experiencia ajena, más amplio y menos doloroso que el propio. El riesgo del profesional teórico es el de enredarse en elucubraciones estériles que inhiben la acción imprescindible en la gestión empresarial. La reciente crisis económica, cuyo origen se remonta al año 2007, sino antes, ha enseñado, una vez más, los peligros de conculcar los principios básicos que rigen el comportamiento de la empresa y de olvidar lo ya sucedido anteriormente. En la empresa, también, olvidarse de la historia conduce a repetir los mismos errores. Por ello, la integración, o mejor, la no separación de la teoría y la práctica, amplía la eficacia del profesional, pues hace que el saber hacer domine sobre los simples saber o hacer. Para romper la barrera artificial entre ambos términos lo importante es comprender, pues, sólo así se puede resolver lo que se ignora y saber lo que no se hace, los dos componentes siempre presentes en los auténticos problemas &–un problema es una situación que de entrada no se sabe solucionar&–. La formación empresarial, en concreto de las finanzas, debe propiciar con humildad y firmeza la sabiduría aplicada, si se desea recomponer el puente entre la experiencia y el conocimiento, tantas veces roto y no sólo por la excesiva especialización. En este empeño han de trabajar

juntos, exigiéndose mutuamente y en un ambiente de trabajo en equipo, nunca de enfrentamiento, el profesor y los alumnos, para que otorgar o conseguir el título que corresponda sea la consecuencia lógica del esfuerzo colectivo. Con este propósito se ofrece este Cuaderno dirigido al estudiante de finanzas, que aborda algunos instrumentos del análisis financiero, dejando para otra publicación los relacionados con la gestión de las finanzas. Los cien ejercicios que aquí se presentan, clasificados en los cuatro apartados del índice, presentan situaciones concretas que ilustran conceptos generales. Su objetivo es ayudar al alumno a razonar para comprender cómo resolverlos, evitando aplicar mecánicamente fórmulas o recetas. Porque no se trata de hacer muchos ejercicios sino de comprender bien los que se resuelvan. Índice 1. Contabilidad financiera 2. Análisis de costes para la toma de decisiones 3. Cálculo financiero 4. Diagnóstico económico-financiero Bibliografía

Una introducción a las finanzas en 100 ejercicios resueltos Juan F. Pérez-Carballo Veiga, 2011-06-13 El estudiante de postgrado y el profesional, que por su formación y experiencia no están especializados en finanzas, suelen tener dificultades en la interpretación de la información contable y en el análisis de los problemas financieros. Para ellos, se ha escrito este Cuaderno, en el que se plantean y resuelven detalladamente, cien ejercicios con el objetivo de que el lector se familiarice con la problemática de esta especialidad de la empresa. Estos ejercicios representan algunas de las situaciones más generales y sencillas de las finanzas y se han seleccionado y agrupado en diez epígrafes para mostrar los principios básicos que rigen el comportamiento financiero de la empresa y las decisiones más representativas a las que tiene que hacer frente. El último apartado se centra en el presupuesto y su control, pues en muchas empresas, sobre todo en las medianas y las pequeñas, esas tareas se incluyen bajo la responsabilidad del departamento financiero. Los cien ejercicios, con su enunciado y sus soluciones comentadas, presentan situaciones concretas que ilustran conceptos generales. Se pretende que el lector razone para que comprenda cómo resolverlas, recomendándole que evite aplicar mecánicamente las fórmulas que conozca. El objetivo es que comprenda esos principios básicos de manera que pueda aplicar los conceptos que introducen a otras situaciones distintas de las que aquí se ofrecen. Se anima al lector a que, en cada ejercicio, trate de encontrar su solución para luego cotejarla con la del autor. En el caso de que no sepa resolverlo debe evitar mirar la solución y, por el contrario, esforzarse todavía más. Al fin y al cabo se pretende entrenar a resolver problemas que, de entrada y por definición, no se saben resolver. Leer las respuestas para aprenderlas va en contra de algo más importante, como es enfrentarse con decisión a problemas para resolverlos, aplicando, fundamentalmente, el razonamiento. En este sentido, las matemáticas que se requieren para trabajar con el contenido de este Cuaderno son elementales. Por último, este nuevo Cuaderno complementa a los ya publicados bajo los títulos El análisis económico financiero en 100 ejercicios resueltos y La gestión financiera en 100 ejercicios resueltos de manera que sirva de introducción a ambos al menos experto en finanzas. Índice 1. La información contable 2. Análisis de costes para la toma de decisiones 3. El cálculo financiero para la toma de decisiones 4. Diagnóstico económico-financiero 5. Previsiones financieras 6. La gestión de la tesorería 7. La evaluación económica de

inversiones 8. El coste de capital y la estructura de financiación 9. Las finanzas internacionales 10. El presupuesto y el control de gestión Bibliografía
