Extinct Pennsylvania Animals: The panther and the wolf.-Pt. II. Black moose, elk, bison, beaver, pine marten, fisher, glutton, Canada lynx Henry Wharton Shoemaker,1917

Humans and Hyenas Keith Somerville,2021-03-18 Humans and Hyenas examines the origins and development of the relationship between the two to present an accurate and realistic picture of the hyena and its interactions with people. The hyena is one of the most maligned, misrepresented and defamed mammals. It is still, despite decades of research-led knowledge, seen as a skulking, cowardly scavenger rather than a successful hunter with complex family and communal systems. Hyenas are portrayed as sex-shifting deviants, grave robbers and attackers of children in everything from African folk tales through Greek and Roman accounts of animal life, to Disney's The Lion King depicting hyenas with a lack of respect and disgust, despite the reality of their behaviour and social structures. Combining the personal, in-depth mining of scientific papers about the three main species and historical accounts, Keith Somerville delves into our relationship with hyenas from the earliest records from millennia ago, through the accounts by colonisers, to contemporary coexistence, where hyenas and humans are forced into ever closer proximity due to shrinking habitats and loss of prey. Are hyenas fated to retain their bad image or can their amazing ability to adapt to humans more successfully than lions and other predators lead to a shift in perspective? This book will be of great interest to students and scholars in the environmental sciences, conservation biology, and wildlife and conservation issues.

Cattle, Their Predators and Geomatics Research Michael O'Neal Campbell,2025-08-06 Cattle are currently the most important domesticated mammals, with populations numbering in the hundreds of millions and occupying large tracts of land, while the conservation of large mammalian carnivores is becoming a dominant discourse in modern geopolitics, also claiming large portions of the Earth's land surface. Computer-based surveying and communication systems, including geomatics, Big Data and Big Tech, are becoming an essential part of human communication and environmental assessments and are critical to large-scale assessments of land conflicts. A current, critical, potent but neglected issue concerns the

measurement of the interfaces of large carnivore and cattle ecologies, in a cross continental format. This book offers a novel approach to the interfaces of the sciences of conservation biology, animal ecology, agricultural development and geomatics, which are increasingly interconnected in modern, global development scenarios. For animal ecology and conservation biology, it is about the management systems that have developed from ecological and human parameters. For agricultural development, topics concern ancestral development, physiological characteristics, ecological requirements, and predation opportunities and conflicts of cattle breeds. For geomatics, the topics concern the image-based and survey-based technologies that enable more critical environmental assessments. The book takes a novel approach by examining the ancestry of cattle, including the aurochs and current wild buffalos, gaur, banteng, yaks, bison, the process of domestication into taurine and indicine cattle, the semi-domestication of yaks and water buffalo, the ecologies of ancestral and modern large carnivores, including bears, big cats and canids, and how the requirements of these large charismatic mammals conflict with the requirements of cattle and agricultural development, in Asia, Europe, Africa, North America, and South America. This integrative approach contributes to the interests of academic researchers, students, practitioners and policy makers, and general readers.

Theoretical Computer Science Zhiping Cai, Yijia Chen, Jialin Zhang, 2022-12-09 This book constitutes the refereed proceedings of the 40th National Conference on Theoretical Computer Science, NCTCS 2022, held in Changchun, China, during July 29-31, 2022. The 13 full papers and 6 short papers included in this book were carefully reviewed and selected from 58 submissions. They were organized in topical sections as follows: computational theory and model; approximation algorithms; artificial intelligence; and system and resource scheduling.

The Commentaries of D. García de Silva y Figueroa on his Embassy to Shāh ‘Abbās I of Persia on Behalf of Philip III, King of Spain Jeffrey Scott Turley, George Bryan Souza, 2017-06-06 The Commentaries is the first complete English language translation, with complete annotations, of a unique and extraordinary memoir from the pen of the erudite Spanish soldier-diplomat D. García de Silva y Figueroa over the course of his embassy to Persia (1614-1624). The Commentaries transcend the travel-literature genre, emerging as a precocious European intellectual global history that is remarkable for its encyclopedic breadth, its historical depth, and its ethnographic and even artistic sensitivity. The Commentaries will be of interest to historians, ethnographers, and literary critics, or anyone with an interest in early modern European accounts of the encounter between the Portuguese and Spanish Empires and Safavid Persia during the early modern period.

Uganda Philip Briggs, 2024-12-13 Bradt's Uganda has for many years been considered the go-to source of information for travellers interested in this extraordinary country, which boasts Africa's most biodiverse – and arguably most exciting – safari

circuit. Written by Philip Briggs, the world's foremost guidebook writer on Africa, this new tenth edition of the most detailed travel guidebook available to Uganda has been thoroughly updated by local resident and experienced travel writer Andrew Roberts. Uganda excels for wildlife-watching, and recent transport improvements now make for relatively easy year-round access to key sites. Visit the lush montane forests of Bwindi, which protect one of the world's largest remaining populations of mountain gorillas, watch habituated chimpanzees in Kibale and tree-climbing lions in Queen Elizabeth National Park, or enjoy outstanding birdwatching throughout – with more than a thousand bird species in a country similar in size to Great Britain. As well as treating readers to a dedicated wildlife chapter with over 100 colour wildlife photographs, Bradt's Uganda guides visitors around key wildlife-watching experiences. It provides up-to-date coverage of gorilla-tracking options, describing gorilla groups and their locations – everything anyone who dreams of encountering these remarkable primates needs to know. Uganda is not just about wildlife. Hikers love some of Africa's tallest mountains, notably the snow-capped Rwenzori (the 'Mountains of the Moon'), the massive collapsed caldera that tops Mount Elgon, and the forest-swathed volcanic peaks of the Virungas. A highlight for adrenaline junkies is rafting the 'Grade Five' white-water rapids on the Nile shortly after it emerges from the inland sea that is Lake Victoria. In this tenth edition, carefully selected accommodation listings have been updated, providing critical appraisals of optimum options in each price bracket. While tourism has long focussed on western Uganda, this edition strengthens attention on the country's remote northeast corner, which is emerging as a popular destination that includes the untrammelled savannah of Kidepo National Park and offers opportunities to interact with traditional Karamojong pastoralists. Boasting detailed maps of the country, updated or created from scratch using GPS, and all the travel advice a visitor might want, Bradt's Uganda remains the essential companion guide to this compelling country.
