Marine Transportation of Liquefied Natural Gas Robert P. Curt, Timothy D. Delaney, 1973

Maritime Security Jim Wells, 2007-08 Liquefied natural gas (LNG) is a super-cooled liquid form of natural gas. U.S. LNG imports are projected to increase to 17% of natural gas supplies by 2030, from about 3% today. To meet this increase, energy co's. have submitted 32 applications for new terminals. If a terrorist attack on an LNG tanker caused a spill, potential hazards, such as fire, asphyxiation, & explosions, could result. The Dept. of Energy funded a study to conduct small- & large-scale experiments to refine & validate models that calculate how heat from large LNG fires would affect the public. This testimony is based on a recently released report, ¿Maritime Security: Public Safety Consequences of a Terrorist Attack on a Tanker Carrying LNG Need Clarification.¿ Includes recommend.
