The Complete Learner's Toolkit Jackie Beere,2020-10-02 Written by Jackie Beere, The Complete Learner's Toolkit: Metacognition and mindset - equipping the modern learner with the thinking, social and self-regulation skills to succeed at school and in life will empower teachers to transform their pupils' learning. Jackie Beere knows that schools have a much more important job to do than simply to prepare children for exams. In this book she hands busy teachers the tools they need to weave personal development into the curriculum in powerful and exciting ways. The Complete Learner's Toolkit focuses on the most important skills identified by the World Economic Forum - including critical thinking, emotional intelligence and judgement and decision making - and presents 36 lessons that can either be used as stand-alone sessions or be incorporated into a topic or subject context. Furthermore, they can be employed in whole-class lessons or when working with individuals/small groups who need extra support to become more independent, confident learners. Jackie has devised each lesson to develop the habits of reflection and metacognition in all learners, setting them up with the skills they will need in order to thrive and the emotional intelligence that will help them pursue a happy future. To make the most of the material in this book and create the best outcomes for students, Jackie suggests teachers also treat these lessons as personal CPD. Doing so can help embed in teachers' day-to-day practice the skills and mindsets which this book promotes, and so model them for their students. Teachers can also consider how best to adapt the lessons in this book and how to incorporate the World Economic Forum essential skills within their subject specialisms. Suitable for use with learners aged 7 to 16. The lesson plans in this book are available as editable PDFs sold under an annual licence. For more details contact books@crownhouse.co.uk. Parts of this book were previously published in The Learner's Toolkit, ISBN 978-184590070-0.

The Twilight Years Gilbert Soo Hoo, 2024-02-29 The well-known idiom about death and taxes being the two certainties in life may require a revision with a potential third certainty--old age. Barring the unexpected or the unthinkable, people nowadays can expect to grow old with life expectancies increasing due to medical and scientific advances. Hence, old age is a timely and compelling subject that affects us all. But it can be a mixed blessing. We know of old people struggling with health issues or financial woes. In that sense, old age, like death and taxes, is not a comfortable topic. Yet, the Bible portrays God as having a high view of the aged. Utilizing a biblical hermeneutics of ageism, we can read Scripture to extract important lessons and principles not only as an encouragement to older readers but as a guide for younger readers in relating to senior members of the faith. Since aging is a global phenomenon, the personal points of view of the old people themselves living in Asia assume equal importance with those living in the West, particularly America. In fact, can we not all learn from each other, adopting good ideas from our global neighbors to strengthen our own lives and relationships?
