Roadmap for Humanities and Social Sciences in STEM Higher Education Sayantan Mandal, 2024-09-01 This edited book focuses on the interconnections of STEM and Humanities and Social Sciences (HSS) in higher education and offers novel approaches to reintegrating them. It paradoxically informs readers of how HSS got relegated to the periphery in the capitalist-driven higher education market and the pressing need to re-organise higher education to meet the demands of competencies in the same education industry. The contributors, including eminent scholars from academia and industry, decision-makers, and researchers, bring nuanced perspectives on integrating HSS into STEM through the global north and south lens. The book is divided into seven parts providing a comprehensive understanding of the critical position of STEM, its interaction with HSS, some exemplars to elucidate holistic education, the importance of HSS in industry, and the roadmap facilitating the organic integration across disciplines. It provides an in-depth analysis of the difficulties HSS faces in science and technical higher education and offers creative solutions to these difficulties, a plausible roadmap for teachers and educational planners wishing to incorporate HSS into STEM higher education. The book stresses the importance of integrating the social sciences and humanities to foster innovation and success in STEM education. It is a must-read for those dedicated to integrating and advancing HSS in STEM higher education, such as educational policymakers, institutional leaders, higher education managers, and educational policy and management researchers.

Contemporary Issues and Challenge in Early Childhood Education in the Asia-Pacific Region Minyi Li, Jillian Fox, Susan Grieshaber, 2016-10-26 This book investigates the unique and dynamic approaches to key issues of changing images of child and childhood, by different countries in the Asia-Pacific. Key concepts considered are re-conceptualizing early childhood education and care, re-examining early learning standards and redefining professionalism. The Asia Pacific region includes countries belonging to both the Majority and Minority worlds and which vary widely in terms of their cultural geography, social-cultural beliefs, and levels of development, demographic profiles, political systems and government commitments to early childhood services. An international team of experienced researchers from different countries guarantees diverse perspectives. By examining different countries' policy choices and evidence-based practices, the authors show how best to provide for young children based on their countries' strategies.
