The World is a Text: Writing About Visual and Popular Culture Jonathan Silverman,Dean Rader,2018-04-30 Wherever we look today, popular culture greets us with "texts" that make implicit arguments; this book helps students to think and write critically about these texts. The World Is a Text teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to "read" everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to

the updated compact edition are chapters on fashion, sports, and nature and the environment.

Theatre as Human Action Thomas S. Hischak, 2019-04-04 This book engages students—particularly those who may not be very familiar with many plays—in the theatre experience by focusing on just four plays: the tragedy Macbeth, the landmark African American drama A Raisin in the Sun, the American comedy classic You Can't Take It with You, and the contemporary hip-hop musical Hamilton.

What Does 'Art' Mean Now? Bruce Fleming, 2023-06-22 What Does 'Art' Mean Now? asks, and answers, fundamental questions about the nature of aesthetic experience and role of the arts in contemporary society. The Modern Age, Romanticism and beyond, viewed art as something transcending and separated from life, and usually something encountered in museums or classrooms. Nowadays, however, art tends to be defined not by a commonly agreed-upon standard of "quality" or by its forms, such as painting and sculpture, but instead by political and ideological criteria. So how do we connect with the works in museums whose point was precisely that they stood apart from such considerations? Can we and should we be educated to "appreciate" art—and what does it do for us anyway? What are we to make of the so-different newer works—installations, performances, excerpts from the world—held to be art that increasingly make it into museums? Adopting a subjectivist approach, this book argues that in the absence of a universal judgment or standard of taste, the experience of art is one of freedom. The arts give us the means to conceptualize our lives, showing us ourselves as we are and as we might wish—or not wish—to be, as well as where we have been and where we are going. It will appeal to scholars of sociology, philosophy, museum studies, and art history, and to anyone interested in, or puzzled by, museums or college courses and their presentation of art today.
