Modular Online Learning Design Amanda Nichols Hess, 2020-12-14 Does your online instruction program sometimes feel like a constant scramble to keep pace with requests and deadlines? Modular design is the answer. Approaching projects, whether large and small, with an eye towards future uses will put you on the path to accomplishing broader, organizational goals. And by intentionally building documentation and structure into your process, you will create content that can easily be scaled, modified, adapted, and transformed to meet different learner needs. Hess, experienced in online instruction in both K-12 and academic libraries, shows you how, using project examples of various sizes to illustrate each chapter's concepts. Her resource guides you through such topics as the eight components of modular online learning design; key considerations for choosing the design model that best fits your organization and project; techniques for connecting your online learning goals with institutional strategy; using the IDEA process to align OER content with your instructional needs; documenting your planning with checklists, scaffolds, and templates; ensuring equity of access with all content formats using the Accessibility Inventory Index; principles for scaling up, down, or laterally; three models for more meaningful and functional collaboration with internal or external partners; and formative testing as a foundation for ongoing evaluation and assessment.

Ensuring Adult and Non-Traditional Learners' Success With Technology, Design, and Structure Jennings, Charity L. B., 2021-04-23 With the increasing share of adult and non-traditional students in the higher education student body, higher education faculty and administrators must ensure that the design of programs, courses, and student services support the success of all students. The needs and wants of these adult and non-traditional learners will differ, and it is important that research helps advance the understanding of these students to increase their success, acclimation, and experience in institutions. *Ensuring Adult and Non-Traditional Learners' Success With Technology, Design, and Structure* is designed to provide higher education professionals with current research and research-based best practices for ensuring student success for adult learners and non-traditional students. The research presented in this book will help ensure that programs, courses, and student services are designed and implemented in a manner that supports student success for all learners in the institution. Chapters include research on student motivation, program design, educational technology, student engagement, and more. This book is intended for post-secondary administrators, faculty, teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in relevant educational services for adult learners and non-traditional students.

Advancing Medical Education Through Strategic Instructional Design Stefaniak, Jill, 2016-12-28 Changes in technological innovation are altering modern educational systems. With instructional media continuously evolving, educators have a variety of options when deciding what tools are best for delivering their instruction. *Advancing Medical Education through Strategic Instructional Design* is an essential reference publication for the latest scholarly research on the importance of medical educators' adherence to instructional design principles to yield optimal learning outcomes. Featuring extensive coverage on several relevant topics and perspectives, such as medical simulation, instructional theory, and performance analysis, this book is ideally designed for educators, physicians, and nurses seeking current research on designing effective instruction for a variety of audiences and learning contexts.

Flipped Learning Robert Talbert, 2023-07-03 Flipped learning is an approach to the design and instruction of classes through which, with appropriate guidance, students gain their first exposure to new concepts and material prior to class, thus freeing up time during class for the activities where students typically need the most help, such as applications of the basic material and engaging in deeper discussions and creative work with it. While flipped learning has generated a great deal of excitement, given the evidence demonstrating its potential to transform students' learning, engagement and metacognitive skills, there has up to now been no comprehensive guide to using this teaching approach in higher education. Robert Talbert, who has close to a decade's experience using flipped learning for majors in his discipline, in general education courses, in large and small sections, as well as online courses – and is a frequent workshop presenter and speaker on the topic – offers faculty a practical, step-by-step, “how-to” to this powerful teaching method. He addresses readers who want to explore this approach to teaching, those who have recently embarked on it, as well as experienced practitioners, balancing an account of research on flipped learning and its theoretical bases, with course design concepts to guide them set up courses to use flipped learning effectively, tips and case studies of actual classes across various disciplines, and practical considerations such as obtaining buy-in from students, and getting students to do the pre-class activities. This book is for anyone seeking ways to get students to better learn the content of their course, take more responsibility for their work, become more self-regulated as learners, work harder and smarter during class time, and engage positively with course material. As a teaching method, flipped learning becomes demonstrably more powerful when adopted across departments. It is an idea that offers the promise of transforming teaching in higher education.

Curriculum in Context Leigh Chiarelott, 2006 CURRICULUM IN CONTEXT is a guidebook for teachers and curriculum designers who are preparing to write curricula for use in pre-K through 12 classrooms and post-secondary settings. This text focuses on contextual teaching and learning (CTL), a system of instruction that enables students to find meaning by connecting the content of the lesson with the context of their lives. The book's practical focus provides teachers and administrators with the concepts and skills they need to make curricular and instructional decisions appropriate for their

schools and classrooms. Author Leigh Chiarelott presents some of the most popular models for curriculum development, beginning with the classic Tyler 4 questions, and leading into more contemporary models, such as Wiggins and McTighe's Backward Design. Unlike other available texts, CURRICULUM IN CONTEXT treats the principles of contextual teaching and learning as an integral element of the curriculum design process.

The Effects of Backward Design on a Secondary Mathematics and Social Studies Charles Nachtman,2008 The English Valleys Community School District in North English, Iowa, Began the process of curriculum mapping during the spring of 2007. My colleague, Pam Nachtman, and I began to see several recurring gaps in the curriculum at English Valleys. This seemed to be caused, in part, from teachers teaching directly from textbooks and teachers providing their students with fun, hands-on activities that didn't seem to lead to any deep understandings. In the spring of 2008, I learned a method of curriculum design that addressed these concerns. In their book Understanding by Design, Grant Wiggins and Jay McTighe detail a backward design method which begins with teachers focusing on the enduring understandings that students need to learn and be able to apply. Next, Teachers design their assessments for the end of the unit and then design activities that help students achieve the desired goals. My colleague and I designed and implemented a unit in seventh grade mathematics and eleventh grade U.S. history using the Understanding by Design model during an eight week study during the fall semester of the 2008-2009 school year at English Valleys Jr/Sr High School. The study began with a unit using the traditional curriculum design method followed by a unit following the Understanding by Design model. Results showed significant growth for both the seventh grade mathematics classes and eleventh grade U.S. History classes with the Understanding by Design curriculum model appearing to be more successful in the eleventh grade U.S. history classes.

K-8 Instructional Methods Allan C. Ornstein,Richard I. Sinatra,2004-12 This general methods text presents the preservice teacher educator with relevant instructional methods, strategies, and techniques to help develop an understanding of how literacy instruction impacts the entire K-8 curriculum. Students' success in school, particularly in these days of vigorous

academic standards and high-stakes testing, is related to their abilities to read, comprehend, analyze, and reflect through critical thinking, writing, and computer interactions. The text is organized in a realistic and easy-to-use format, offering ideas for integrating theory with practice to improve the teaching and learning process. The authors demonstrate solid instructional practices that emphasize reading and related literacy development through the content areas in each grade K-8. The text also examines the impact that reading and literacy development have had upon diversity and multiculturalism, special learners, at-risk and economically disadvantaged students, and technology and computers.

Creating Curriculum in Early Childhood Julie Bullard, 2019-11-25 Creating Curriculum in Early Childhood explores the backward design model of curriculum development, equipping readers with the tools and methods they need to effectively apply backward design in the early childhood classroom. Clear yet comprehensive chapters walk new and veteran educators through an effective method for curriculum design that promotes meeting standards through intentional teaching while engaging children in developmentally appropriate, interest-based education focused on big ideas and conceptual understanding. Featuring desired results, assessment methods, and teaching techniques specific to birth to age eight, this critical guide also includes practical tips for educators new to the method. Designed to help students and practitioners alike, this powerful textbook combines early childhood philosophy and developmental research with highly practical descriptions, rationales, and examples for developing curricular units using backward design.

An Interdisciplinary Approach to Implementing Competency Based Education in Higher Education Barbara Goodman, Darren Henderson, Eileen Stenzel, 2006 The appropriateness of competency based education for higher education settings has been the subject of debate for decades. This study revisits that debate with an understanding of competency based education as a system of communication that focuses on intended outcomes expressed in observable measurable terms.

Creating Standards-Based Integrated Curriculum Susan M. Drake, 2007-02-21 The content is powerful. Seeing examples from all grade levels is important so that each reader, regardless of teaching level, can see that it can be done in his or her situation. --Sue DeLay, Curriculum Resource Teacher, Oak Creek Franklin School District, WI Contains real-life examples of integration, including examples of the author's own experience in the classroom, making the work much more appealing and credible for teachers. --Mary Ann Kahl, Assistant Professor of Educational Leadership, National-Louis University This is the first book I have read that lays out a big picture that I can buy into and explains how to look at accountability in a positive way. --Jane Adair, Resource Specialist, Long Beach Polytechnic High School, CA Help your learners connect big questions to big understandings! In today's accountability-driven environment, educators strive to develop an integrated, relevant, and measurable curriculum while also presenting engaging subject matter that inspires student learning. In this completely revised edition of the classic text, Susan M. Drake provides a new approach to standards-based curriculum, instruction, and assessment that helps educators identify what students must know, do, and be. This invaluable resource also offers: A framework allowing for multidisciplinary, interdisciplinary, and transdisciplinary approaches to curriculum integration; Sample models of integrated curriculum in action; Practical suggestions to simplify curriculum alignment and integration; Insights based on real classroom experience to connect the framework to the real world; End-of-chapter discussion questions and suggested activities; Discover how you can create an integrated, standards-based curriculum that inspires your students, and then watch them thrive.

Problem-based Learning Online Maggi Savin-Baden, Kay Wilkie, 2006-08 This text addresses the issues and debates about problem-based learning (PBL) online. It explores the range and diversity of application of PBL online and examines questions such as how course design and issues of power influence learning in PBL.
