Handbook of Medieval Studies Albrecht Classen,2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades. The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field. The handbook consists of four parts. The first, large section offers articles on all of the main disciplines and discussions of the field. The second section presents articles on the key concepts of modern medieval studies and the debates therein. The third section is a lexicon of the most important text genres of the Middle Ages. The fourth section provides an international bio-bibliographical lexicon of the most prominent medievalists in all disciplines. A comprehensive bibliography rounds off the compendium. The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together.

Culinary Aspects of Ancient Rome Almudena Villegas Becerril,2021-02-23 This book provides a thrilling account of a thoughtful gastronomic journey through the Roman Empire. It reviews the role that food and its associated constituents had in the evolution of Roman life, and highlights the cookery processes practised by both social elites and humble peasant and common households. The hypotheses and conclusions presented here shed light onto the significance that Ancient Romans attached to food, the banquet, and the simple daily act of sharing food, while the text also offers new research findings on recipes and cooking technologies that have passed unnoticed.
