Raging against the Mass-Schooling Machine Andrew Miller,2016-12-27 The biggest danger for beginning teachers is to teach as they were taught. In order to create teaching identities capable of resisting the mind-numbing orthodoxies of the mass-schooling machine, beginning teachers need to interrogate the theories and practices that have shaped them as teachers. Raging against the Mass-Schooling Machine is a compelling autoethnographic account of one beginning teacher's struggle to transform his future teaching identity by unpacking the bruising encounters that shaped him as a student. This is a must-read book for all teachers wishing to 'teach against the grain.' The journey from student to teacher involves almost two decades of junior, primary, secondary, and tertiary education. Few of us critique this journey to see what emotional legacies and taken-for-granted assumptions we carry from one identity to the other. If we remain unconscious of the social and cultural discourses and practices that have shaped and defined us as students and teachers, we may unwittingly reproduce the inequalities, prejudices, and traumas we experienced or observed while growing up, or resort to transmission teaching and authoritarian control because this is the formula of schooling most of us know. Empowering education relies on teachers resisting these toxic scripts and becoming agents of change.

Delivery and Adoption of Cloud Computing Services in Contemporary Organizations Chang, Victor, Walters, Robert John, Wills, Gary, 2015-03-31 The ubiquity of technology has not only brought the need for computer knowledge to every aspect of the modern business world; it has also increased our need to safely store the data we are now creating at a rate never experienced before. *Delivery and Adoption of Cloud Computing Services in Contemporary Organizations* brings together the best practices for storing massive amounts of data. Highlighting ways cloud services can work effectively in production and in real time, this book is an essential reference source for professionals and academics of various disciplines, such as computer science, consulting, information technology, information and communication sciences, healthcare, and finance.

The Routledge Companion to Labor and Media Richard Maxwell, 2015-07-16 Labor resides at the center of all media and communication production, from the workers who create the information technologies that form the dynamic core of the global capitalist system and the designers who create media content to the salvage workers who dismantle the industry's high-tech trash. *The Routledge Companion to Labor and Media* is the first book to bring together representative research from the diverse body of scholarly work surrounding this often fragmentary field, and seeks to provide a comprehensive resource for the study and teaching of media and labor. Essays examine work on the mostly unglamorous side of media and cultural production, technology manufacture, and every occupation in between. Specifically, this book features: -wide-ranging international case studies spanning the major global hubs of media labor; -interdisciplinary approaches for thinking about and analyzing class and labor in information communication technology (ICT), consumer electronics (CE), and media/cultural production; -an overview of global political economic conditions affecting media workers; -reports on chemical environments and their effect on the health of media workers and consumers; -activist scholarship on media and labor, and inspiring stories of resistance and solidarity.

The Persistence of Whiteness Daniel Bernardi, 2007-09-12 *The Persistence of Whiteness* investigates the representation and narration of race in contemporary Hollywood cinema. Ideologies of class, ethnicity, gender, nation and sexuality are central concerns as are the growth of the business of filmmaking. Focusing on representations of Black, Asian, Jewish, Latina/o and Native Americans identities, this collection also shows how whiteness is a fact everywhere in contemporary Hollywood cinema, crossing audiences, authors, genres, studios and styles. Bringing together essays from respected film scholars, the collection covers a wide range of important films, including *Guess Who's Coming to Dinner*, *The Color Purple*, *Star Wars* and *The Lord of the Rings*. Essays also consider genres from the western to blaxploitation and new black cinema; provocative filmmakers such as Melvin Van Peebles and Steven Spielberg and stars including Whoopi Goldberg and Jennifer Lopez. Daniel Bernardi provides an in-depth introduction, comprehensive bibliography and a helpful

glossary of terms, thus providing students with an accessible and topical collection on race and ethnicity in contemporary cinema.

Wilderness Management Chad P. Dawson,John C. Hendee,2025-02-20 For 45 years, this classic textbook on wilderness management has served as the most comprehensive information available on the stewardship and protection of wilderness resources and values. The seventeen chapters outline the history, legislation, policies, planning, and stewardship carried out by the four federal land managing agencies—Forest Service, National Park Service, Bureau of Land Management, and Fish and Wildlife Service—entrusted with stewardship and protection of the more than 110-million-acre National Wilderness Preservation System. Written for wilderness and wildlands planners, managers, stewards, advocates, and educators, this revised fifth edition builds on the material of the first four editions and extensively updates chapters on: international wilderness; managing for appropriate wilderness conditions; wilderness ecosystems; fire in wilderness ecosystems; ecological impacts of wilderness recreation and their management; and wilderness visitor management. This textbook is an invaluable guide for resource managers, students, scientists, policy makers, and for wilderness advocates and visitors around the world.
